Capstone Energy+ to Participate in the H.C. Wainwright 28th Annual Global Investment Conference

LOS ANGELES--(BUSINESS WIRE)--

Capstone Energy+, Inc. (NASDAQ: CEPL) (“Capstone” or the “Company”), a leading provider of behind-the-meter clean microturbine energy solutions for industrial and commercial businesses, as well as solutions designed for emerging data center applications, today announced that members of its management team are scheduled to participate in the [H.C. Wainwright 28th Annual Global Investment Conference](#).

Date: September 14-16, 2026

Location: New York City, NY

Format: Presentation and one-on-one meetings

Management will deliver a presentation on Monday, September 14 at 10:00 a.m. Eastern Time (7:00 a.m. Pacific Time). The presentation will be webcast live and available for replay [here](#).

Vince Canino, President & Chief Executive Officer, John Miller, Interim Chief Financial Officer, Candice Graves, Chief Accounting Officer, and Kimberly Nisler, Director, Investor Relations & Marketing, will represent Capstone Energy+ at the conference.

If you are interested in attending the presentation or scheduling a time to meet with management, please contact your H.C. Wainwright representative.

About Capstone Energy+

For nearly four decades, Capstone Energy+ has designed, developed, and delivered proven behind-the-meter, on-site energy solutions that help businesses operate with certainty in an increasingly constrained power environment. Our evolution from “Green” to “Plus” reflects who we are today, delivering clean, innovative energy solutions that go beyond electricity.

Capstone Energy+: *On Site. On Demand. Always On.*

With more than 10,800 units shipped across 89 countries through our global distributor network, Capstone provides highly reliable, low-maintenance, fuel-flexible power systems engineered for mission-critical operations. Built on our core 30kW, 65kW, and 200kW microturbine platforms, our scalable multi-megawatt solutions are designed for rapid deployment, continuous operation, and simplified maintenance.

Capstone Energy+ serves hospitals, agriculture, and industrial facilities and is developing solutions for emerging data center applications where uptime and energy certainty are essential. Beyond power generation, our solutions support the circular economy by using fuels derived from waste streams and capturing waste heat to produce valuable thermal energy that can reduce overall fuel consumption and associated emissions compared with separate electricity and heat production, depending on the fuel, application, and operating conditions.

To support evolving customer needs, Capstone also offers flexible Energy as a Service solutions, including power purchase or energy service agreements (PPAs/ESAs), leasing, rentals, and embedded service contracts (ESCs) designed to reduce upfront costs, accelerate deployment, and provide life-cycle cost predictability.

Our modular plug-and-play architecture is designed to help customers scale capacity, simplify integration, and adapt to growing energy demands with resilient on-site power solutions.
