# MabVax Therapeutics to Present at the BIO Investor Forum

SAN DIEGO, Oct. 13, 2016 /PRNewswire/ --[MabVax Therapeutics Holdings, Inc.](#) (Nasdaq: MBVX), a clinical-stage oncology drug development company, announced today that it will be presenting at the BIO Investor Forum being held October 18 & 19, 2016 at the Westin St. Francis Hotel, San Francisco, California.

**Event:** BIO Investor Forum  
**Location:** Westin St. Francis Hotel, San Francisco  
**Date:** Tuesday, October 18th  
3:00 PM (PT) in the Elizabethan B  
**Time:** Room

MabVax Therapeutics President and CEO David Hansen will deliver the Company's presentation and discuss recent business highlights, as well as upcoming milestones related to its phase 1 clinical trials of MVT-5873 for the treatment of pancreatic cancer and MVT-2163 as a companion diagnostic. Mr. Hansen will also be available for one-on-one meetings. To arrange a meeting with management, please contact Robert Haag at [mbvx@irthcommunications.com](mailto:mbvx@irthcommunications.com) or visit the BIO Investor Forum One-on-One Partnering webpage to schedule a one-on-one directly.

## About BIO Investor Forum

For the past 15 years, the BIO Investor Forum has been the leading biotech investor conference serving early and established private companies, and emerging public companies by placing them in front of venture capital, private equity and public investors, research analysts, and industry executives focused on investment and business development opportunities in the life sciences.

This year's meeting will feature panel sessions on emerging business development trends and critical therapeutic breakthroughs, plus fireside chats led by industry thought leaders. Attendees will also have the opportunity to access the BIO One-on-One Partnering™ System, which will allow delegates to schedule private meetings with investors, business development professionals and licensing executives.

## About MabVax

MabVax Therapeutics Holdings, Inc. is a clinical-stage biotechnology company focused on the development of antibody-based products to address unmet medical needs in the treatment of cancer. MabVax has discovered a pipeline of human monoclonal antibody

products based on the protective immune responses generated by patients who have been vaccinated against targeted cancers with the Company's proprietary vaccines. MabVax's HuMab-5B1 antibody is fully human and was discovered from the immune response of cancer patients vaccinated with an antigen-specific vaccine during a Phase I trial at Memorial Sloan Kettering Cancer Center, or MSK. In preclinical research, the 5B1 antibody has demonstrated high specificity and affinity, and has shown potent cancer cell killing capacity and efficacy in animal models of pancreatic, colon and small cell lung cancers. The antigen the antibody targets is expressed on more than 90% of pancreatic cancers making the antibody potentially broadly applicable to most patients suffering from this type of cancer. MabVax's two lead antibody clinical programs, currently in Phase I clinical trials, utilize HuMab-5B1 as a naked antibody (MVT-5873) and as an immuno-PET imaging agent (MVT-2163). Additional information is available at [www.mabvax.com](http://www.mabvax.com).

### **Forward Looking Statements:**

This press release contains "forward-looking statements" regarding matters that are not historical facts, including statements relating to the Company's clinical trials and product development pipeline. We have no assurance that all of the product development pipeline will be fully developed by the Company. Because such statements are subject to risks and uncertainties, actual results may differ materially from those expressed or implied by such forward-looking statements. Words such as "anticipates," "plans," "expects," "intends," "will," "potential," "hope" and similar expressions are intended to identify forward-looking statements. These forward-looking statements are based upon current expectations of the Company and involve assumptions that may never materialize or may prove to be incorrect. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of various risks and uncertainties. Detailed information regarding factors that may cause actual results to differ materially from the results expressed or implied by statements in this press release relating to the Company may be found in the Company's periodic filings with the Securities and Exchange Commission, including the factors described in the section entitled "Risk Factors" in its annual report on Form 10-K for the fiscal year ended December 31, 2015, as amended and supplemented from time to time and the Company's Quarter Reports on Form 10-Q and other filings submitted by the Company to the SEC, copies of which may be obtained from the SEC's website at [www.sec.gov](http://www.sec.gov). The parties do not undertake any obligation to update forward-looking statements contained in this press release.
