⁽¹⁾ Revenue generated from our Brazilian operations that were merged with Boa Vista Servicos, S.A. in the second quarter of 2011. See

Fees associated with the acquisition of CSC Credit Services— During the fourth quarter of 2012, the Company acquired certain business assets and the operations of CSC Credit Services, Inc., a subsidiary of Computer Sciences Corporation. In conjunction with this acquisition, the Company incurred approximately \$5.0 million of transaction fees (\$3.2 million, net of tax). Management believes excluding these fees from certain financial results provides meaningful supplemental information regarding our financial results for the three and twelve months ended December 31, 2012, as compared to 2011, since an acquisition and fees of such an amount are not comparable among the periods. This is consistent with how our management reviews and assesses Equifax's historically performance and is useful when planning, forecasting and analyzing future periods.

Pension settlement – During the fourth quarter of 2012, the Company offered certain employees a voluntary lump sum payment option of their pension benefits or a reduced monthly annuity. The Company recorded a non-cash settlement charge of \$38.7 million (\$24.1 million, net of tax). Management believes excluding this charge from certain financial results provides meaningful supplemental information regarding our financial results for the three and twelve months ended December 31, 2012, as compared to 2011, since this charge is unusual in nature and not comparable among the periods. This is consistent with how our management reviews and assesses Equifax's historically performance and is useful when planning, forecasting and analyzing future periods.

International tax restructuring - During the fourth quarter of 2012, the Company completed an international tax restructuring resulting in the recognition of tax expense of \$20.5 million. Management believes excluding this income tax expense from certain financial results provides meaningful supplemental information regarding our financial results for the three and twelve months ended December 31, 2012, as compared to 2011, since income tax expense associated with tax restructuring of such an amount is not comparable among the periods. This is consistent with how our management reviews and assesses Equifax's historical performance and is useful when planning, forecasting and analyzing future periods.

Income tax benefits – During the fourth quarter of 2012, the Company recorded a tax benefit as a result of tax authorities approving a tax method change which impacted the tax expense recorded in connection with the merger of our Brazilian business in the second quarter of 2011. During the fourth quarter of 2011, the Company recorded a cumulative income tax benefit resulting from the recognition of an income tax deduction related to several prior years. Management believes excluding these income tax benefits from certain financial results provides meaningful supplemental information regarding our financial results for the three and twelve months ended December 31, 2012, as compared to 2011, since these specific income tax benefits of such an amount are not comparable among the periods. This is consistent with how our management reviews and assesses Equifax's historical performance and is useful when planning, forecasting and analyzing future periods.

Loss on the deconsolidation of Brazilian business – During the second quarter of 2011, the Company completed the merger of our Brazilian business with and into Boa Vista Servicos, S.A. ("BVS") in exchange for a 15 percent equity interest in BVS. The Company recorded a \$27.8 million loss on the transaction. Management believes excluding the loss from certain financial results provides meaningful supplemental information regarding our financial results for the twelve months ended December 31, 2011, as compared to 2012,

since a deconsolidation and loss of such an amount is not comparable among the periods. This is consistent with how our management reviews and assesses Equifax's historical performance and is useful when planning, forecasting and analyzing future periods.

Diluted EPS and net income from continuing operations attributable to Equifax, adjusted for CSC acquisition fees, pension settlement, certain income tax items, the loss on the deconsolidation of Brazilian business and acquisition-related amortization **expense** - We calculate this financial measure by excluding the impact of acquisition-related amortization expense and including a benefit to reflect the material cash income tax savings resulting from the income tax deductibility of amortization for certain acquired intangibles. These financial measures are not prepared in conformity with GAAP. Management believes excluding the impact of amortization expense is useful because excluding acquisition-related amortization, and other items that are not comparable, allows investors to evaluate our performance for different periods on a more comparable basis. Certain acquired intangibles result in material cash income tax savings which are not reflected in earnings. Management believes that including a benefit to reflect the cash income tax savings is useful as it allows investors to better value Equifax. Management makes these adjustments to earnings when measuring operating profitability, evaluating performance trends, setting performance objectives and calculating our return on invested capital.

Adjusted operating income and operating margin, excluding CSC acquisition fees and pension settlement - Management believes excluding the CSC acquisition fees and the pension settlement from the calculation of operating income and margin, on a non-GAAP basis, is useful because management excludes items that are not comparable when measuring operating profitability, evaluating performance trends, and setting performance objectives, and it allows investors to evaluate our performance for different periods on a more comparable basis by excluding items that impact comparability.

Adjusted operating revenue, excluding the results of our Brazilian operations-Management believes excluding the Brazilian revenue from the calculation of operating revenue, on a non-GAAP basis, is useful because it allows investors to evaluate the Company's growth on a basis consistent with the current composition of our business.
