

FORWARD LOOKING STATEMENTS

This press release contains "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include all statements that are not historical facts and may be identified by the use of words such as "will", "anticipate," "could," "continue," "expect," "estimate," "may," "plan," "outlook," "future" and "project" and other similar expressions and the negatives of those terms. These statements, which involve risks and uncertainties, relate to analyses and other information that are based on forecasts of future results and estimates of amounts not yet determinable and may also relate to Blade's future prospects, developments and business strategies. In particular, such forward-looking statements include statements concerning Blade's future financial and operating performance, results of operations, business and capital deployment strategies and plans, customer behavior, competitive position, industry environment and growth opportunities, and the development and adoption of EVA technology. These statements are based on management's current expectations and beliefs, as well as a number of assumptions concerning future events. Actual results may differ materially from the results predicted, and reported results should not be considered as an indication of future performance.

Such forward-looking statements are subject to known and unknown risks, uncertainties, assumptions and other important factors, many of which are outside Blade's control, that could cause actual results to differ materially from the results discussed in the forward-looking statements. Factors that could cause actual results to differ materially from those expressed or implied in forward-looking statements include: our continued incurrence of significant losses; the impact of the COVID-19 pandemic and its related effects, failure of the markets for our offerings to grow as expected, or at all; our ability to effectively market and sell air transportation as a substitute for conventional methods of transportation; the inability or unavailability to use or take advantage of the shift, or lack thereof, to EVA technology; our ability to successfully enter new markets and launch new routes and services; any adverse publicity stemming from accidents involving small aircraft, helicopters or charter flights and, in particular, any accidents involving our third-party operators; the effects of competition; harm to our reputation and brand; our ability to provide high-quality customer support; our ability to maintain a high daily aircraft usage rate; changes in consumer preferences, discretionary spending and other economic conditions; impact of natural disasters, outbreaks and pandemics, economic, social, weather, growth constraints, and regulatory conditions or other circumstances on metropolitan areas and airports where we have geographic concentration; the effects of climate change, including potential increased impacts of severe weather and regulatory activity; the availability of aircraft fuel; our ability to address system failures, defects, errors, or vulnerabilities in our website, applications, backend systems or other technology systems or those of third-party technology providers; interruptions or security breaches of our information technology systems; our placements within mobile applications; our ability to protect our intellectual property rights; our use of open source software; our ability to expand and maintain our infrastructure network; our ability to access additional funding; the increase of costs and risks associated with international expansion; our ability to identify, complete and successfully integrate future acquisitions; our ability to manage our growth; increases in insurance costs or reductions in insurance coverage; the loss of key members of our management team; our ability to maintain our company culture; our reliance on contractual relationships with certain transplant centers and Organ Procurement Organizations; effects of fluctuating financial results; our reliance on third-party operators; the availability of third-party operators; disruptions to third party operators; increases in insurance costs or reductions in insurance coverage for our third-party aircraft operators; the possibility that our third-party aircraft operators may illegally, improperly or otherwise inappropriately operate our branded aircraft; our reliance on third-party web service providers; changes in our regulatory environment; regulatory obstacles in local governments; the expansion of domestic and foreign privacy and security laws; the expansion of environmental regulations; our ability to remediate any material weaknesses or maintain internal controls over financial reporting; our ability to maintain effective internal controls and disclosure controls; changes in the fair value of our warrants; and other factors beyond our control. Additional factors can be found in our most recent Annual Report on Form 10-K and Quarterly Report on Form 10-Q, each as filed with the U.S. Securities and Exchange Commission. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect us. You are cautioned not to place undue reliance upon any forward-looking statements, which speak only as of the date made, and Blade undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, changes in expectations, future events or otherwise.

Blade is a Global Leader in Urban Air Mobility

We provide cost-effective and time-efficient alternatives to congested ground transportation for passengers and last-mile critical cargo

Our platform utilizes a technology-powered, asset-light business model, which was developed to be scalable and profitable using conventional aircraft today, while enabling a seamless transition to Electric Vertical Aircraft ("EVA") tomorrow

Q1 2023 Financial Highlights

Note: Definition of all non-GAAP numbers and reconciliation to GAAP numbers are provided in the Appendix of this presentation

Key Business Segments

Passenger Segment

Short Distance

- Passenger flights primarily between Blade terminals in New York, Vancouver and Southern Europe
- Flights are typically between 10 and 100 miles (e.g. Vancouver <> Victoria, Manhattan <> JFK Airport) and are primarily serviced on helicopters and amphibious seaplanes
- Available on both a by-the-seat and full aircraft charter basis

Trailing Twelve Months Revenue (in \$ mm)

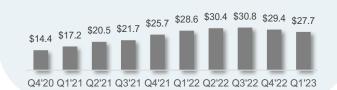

Jet and Other

- Seasonal by-the-seat jet flights, primarily between New York and South Florida, as well as jet charter
- Includes revenue from ancillary products and services, in addition to payments from brand partners

Trailing Twelve Months Revenue (in \$ mm)

Medical Segment

MediMobility Organ Transport

- Largest dedicated air transporter of human organs for transplant in the United States
- End-to-end air and ground transportation services for transplant centers and organ procurement organizations
- Fleet commonality with helicopter and fixed wing passenger services enables economies of scale across business lines

Blade is a Global Urban Air Mobility Platform

Given the urban air mobility ecosystem we have built, we believe no company is better positioned to benefit as traditional helicopters transition to Electric Vertical Aircraft and cargo drones in the future

Asset-Light Model

Global Footprint with Strategic Infrastructure

Proprietary Technology and Logistics Platform

Industry-Leading Brand

Loyal Customer Base with Over 250K+ Fliers in 2019⁽¹⁾

Manufacturer-Agnostic Play on Electric Vertical Aircraft

Blade Works With Operators on an **Asset-Light Basis**

Blade does not own or operate aircraft

Instead, Blade buys aircraft time by-the-hour, paying only for flights completed(1). Blade pays a fixed, all-inclusive rate which covers all costs associated with flights, including aircraft, fuel⁽²⁾, insurance, pilots and maintenance

Blade increases operators' volume and makes their revenues more predictable while reducing their fixed costs so that they can focus on doing what they love: flying, maintaining, and operating aircraft

OPERATORS PROVIDE BLADE:

BLADE PROVIDES OPERATORS:

Operator Technology

Strategic Infrastructure and **Terminal Network**

24/7 Flier Relations

Flier Experience Team

^{1.} Certain agreements with operators are subject to minimum capacity purchase requirements

^{2.} Certain agreements with operators may include provisions for fuel cost pass-throughs

Blade Safety Overview

Blade partners with third-party aircraft operators who are vetted quarterly by Blade's safety team

- Each core operator must pass comprehensive safety evaluations including:
 - In-person audits of flight departments including review and inspection of General Operations Manuals, Safety Management Systems, pilot training and maintenance practices, and compliance with FAA and DOT recordkeeping requirements
 - Confirmation of adequate insurance coverage, as well as certificates of insurance naming Blade as an additional insured on the operator's liability policy and indemnification agreements
- Operators must also meet Blade's standards for flier experience and operational efficiency:
 - Blade branded aircraft with "as-new" condition interiors and exteriors
 - Required use of Blade's operator dispatch and accounting dashboard technology
- Blade has adopted internal procedures for weather cancellations that are often more stringent than FAA minimum requirements to further reduce the likelihood of incidents and unpleasant or turbulent flight experiences

BLADE Safety Team Leadership

Keith Trepanier	Chief of Safety	 Brings 25 years of active-duty experience serving in both the Army and Coast Guard Most recently, spent 9 years as Aviation Safety Manager for the Mayo Clinic
Edward Schulze	Head of Rotorcraft Safety	 Brings 35 years of experience across military, police, and corporate capacities
Tony Kvassay	Fixed Wing Safety Inspector	 Brings 30 years of experience as Clay Lacy Aviation's Director of Operations Spent 15 years as Raytheon's chase pilot
Joseph Tepedino	Fixed Wing Safety Inspector	 Former Aviation Safety Inspector for FAA, responsible for operations in 11 states
Brian Holliday	Fixed Wing Safety Inspector	 Brings 30 years of pilot experience across turboprop and fixed wing jets; held various Part 91 Chief Pilot positions

Primary Aircraft Types Serviced

Bell 407

Airbus H125

Sikorsky S-76

Airbus H130

Airbus AS355

Global Footprint in Highly Strategic Urban Air Mobility Markets

Europe

Short Distance service primarily between Vancouver and Victoria with charter available across the **Pacific Northwest**

Short Distance service between key European destinations including Nice, Monaco, Cannes, Saint **Tropez and Courchevel**

Indian destinations including

Mumbai, Pune, Bangalore,

India⁽¹⁾

and Goa

United States

- Short Distance service primarily between Manhattan, New York airports and Long Island
- MediMobility organ transport available coast-to-coast
- Seasonal by-the-seat jet service and jet charter

Blade holds a minority stake in the Blade India joint venture with a right to receive royalty payments based on the revenues and profitability of the venture

Strategic Infrastructure and Terminal Network

Blade's strategic infrastructure and terminal network enables security, health and safety, and passenger management

Note: Other terminals not featured include East Hampton; Nantucket; Nanaimo, BC; Victoria, BC; Mumbai (Juhu); Shirdi and Pune, Maharashtra

Blade's Proprietary Technology and Logistics Platform

Blade built a Customer-to-Cockpit urban air mobility technology platform enabling us to manage hundreds of flights per day

Consumer Facing App

Intuitive interface allows fliers to book directly from app

Blade Proprietary Internal Logistics System

Integrates critical information received from customers to enable real-time manifest updates, optimize scheduling and increase aircraft utilization

Full stack solution includes accounting, invoicing, analytics, customer CRM and rich "data exhaust"

Operator and In-Cockpit Dashboard

Intelligent software integrates critical logistical information, including airport/airspace restrictions, from discreet sources into an easy-to-use dashboard

Provides relevant Blade teams with mission visibility to enable seamless multi-modal connections

Automated Flier Communications

Includes in-app portal for flight changes, status updates, and reservation information

Real-Time Multi-Modal Tracking

Ensures chain of custody throughout an organ's journey

Medical

Experienced staff available 24/7 to accept and execute organ transport missions across the US

BLADE

Brand Experience

Blade has created an unmatched brand and flier experience as evidenced by our 9.6 Net Promoter Score⁽¹⁾

We've made "Blade" into a verb in the markets we fly

Tech-Enabled Booking Process

Trusted Safety on Tarmac and in the Air

Seasoned Flier Experience Team

Seamless Multi-Modal Connectivity

Brands Partner with Blade

Blade works with brand partners on a category exclusive basis to amplify flier exposure across our suite of services and geographies. Deals can be for cash, products, or services in-kind

Beauty

Enabling Seamless Transition to Electric Vertical Aircraft

Given anticipated lower costs, quiet operation, and zero emissions, EVA are expected to enhance Blade's business, with several leading manufacturers targeting certification in 2024

Our existing network infrastructure, focused on short distance routes in high-friction locations, was designed for its compatibility to integrate EVA in the future, while generating profitable unit economics using conventional rotorcraft in the interim

Blade is aircraft-agnostic, though we have relationships with many EVA manufacturers, and are working closely with BETA Technologies, Wisk, and Eve

Short Distance Overview

- Passenger flights primarily between Blade terminals in New York, Vancouver, and Southern Europe
- Primarily serviced on helicopters and amphibious seaplanes
- Flights are typically between 10 and 100 miles (e.g. Vancouver <> Victoria, Manhattan <> JFK Airport)
- Available on both a by-the-seat and full aircraft charter basis

Key Products

Leisure/Commuter
By-the-Seat
Primarily routes in New
York, Vancouver, and
Southern Europe

Airport

Note: Definition of all non-GAAP numbers and reconciliation to GAAP numbers are provided in the Appendix of this presentation

Short Distance Footprint in Markets with Significant Growth Potential

Blade sees significant opportunity to grow within its existing footprint, while taking share from land and sea alternatives

Market Snapshot: Vancouver <> Nanaimo and Victoria

	Competition	BLADE
Mode	Ferry / Seaplane	Rotorcraft
Trip Length	1 - 4 hours ⁽¹⁾	20 - 40 minutes
Annual Pax	11 million+(2)	~100,000*
Trip Price	\$18 - \$319 ⁽³⁾	From \$149

	Competition	BLADE
Mode	Train / Car	Rotorcraft
Trip Length	30 - 90 minutes	7 minutes
Annual Pax	~6 million+(4)	~45,000*
Trip Price	\$5 - \$85 ⁽⁵⁾	From \$215 ⁽⁶⁾

Market Snapshot: Manhattan <> JFK and EWR Airports

	Competition	BLADE
Mode	Ground	Rotorcraft
Trip Length	Up to 2 hours	5 minutes
Annual Pax	27 million ⁽⁷⁾	~12,000*
Trip Price ⁽⁸⁾	NYC Taxi \$52+ UberX \$150+ Black Car \$175+	From \$195

Market Snapshot: Mumbai <> Pune

	Competition	BLADE
Mode	Car / Train	Rotorcraft
Trip Length	2.5 - 4.5 hours	40 minutes
Annual Pax	~33 million ⁽⁹⁾	<1,000*
Trip Price	\$2 - \$42(10)	From \$125

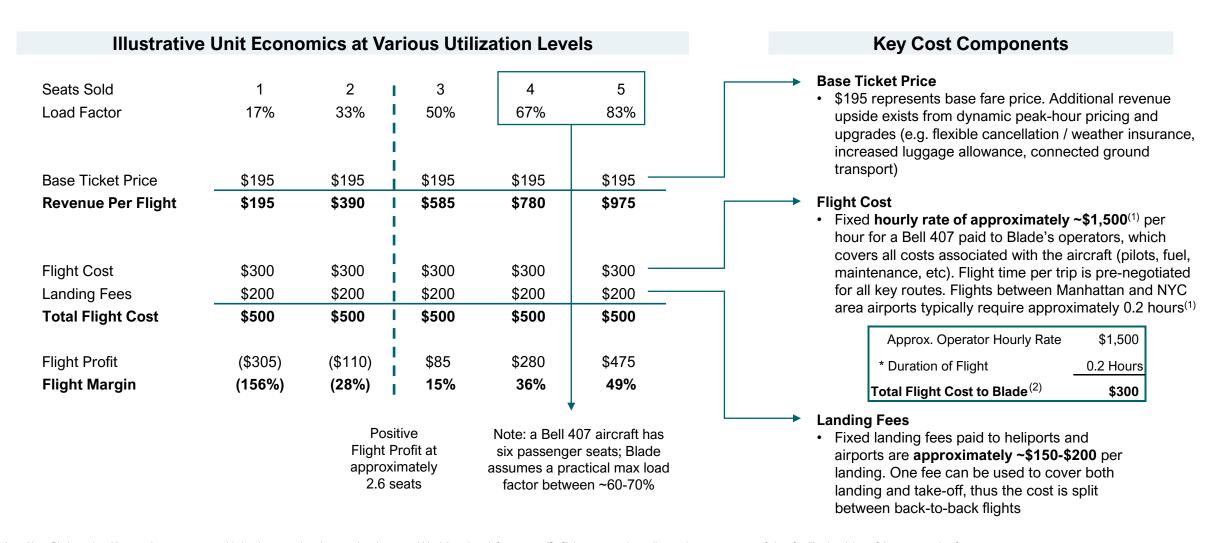

*Note: Blade annual passenger volumes for Vancouver and Nice are pro forma for the acquisitions of Helijet, Monacair, Héli Sécurité, and Azur Hélicoptère, and reflect 2019 seat volumes assuming Blade had owned the businesses beginning January 1, 2019. Manhattan annual passengers based on Blade Airport seats flown in 2019. India annual passenger count reflects 2019 seat volumes of the Blade India joint venture

- 1. Seaplane trip length inclusive of estimated 25 minutes for check-in. Ferry trip length considers drive from downtown Vancouver to Tsawwassen terminal and from Swartz Bay terminal to downtown Victoria
- 2. Source: BC Ferry Fiscal 2020 Annual Report. Annual passengers reflect total number of travelers on BC Ferry's Route 1 (Vancouver to Victoria), Route 2 (West Vancouver to Nanaimo), and Route 30 (Vancouver to Nanaimo)
- Lower end represents BC Ferry base fare from Vancouver Tsawwassen to Victoria Swartz Bay terminal for individual adult with no vehicle. Upper end represents same-day, peak-hour seaplane fare from Vancouver to Victoria inclusive of luggage allowance
- I. Source: Harvard Business School Institute for Strategy & Competitiveness. Annual passengers approximated based on ~5.8 million annual visitors to Monaco, the vast majority of whom travel to the principality via Nice
- 5. Lower end represents SNCF base fare from Nice Saint-Augustin to Monaco Monte-Carlo train station. Upper end represents weekend afternoon Uber Berline (Uber Black) fare from Nice Saint-Augustin to Monaco as of July 2022
- Reflects 2023 fare of 195 Euro inclusive of VAT
- Source: Big Three consultancy hired by the company, management analysis. Source: Big Three consultancy hired by the company, management analysis. Represents pre-COVID 2019 figures
- 8. NYC Taxi price reflects NYC Taxi and Limousine Commission flat fare from Manhattan to JFK. UberX & Black Car prices reflect peak-hour pricing from Hudson Yards to JFK as of July 2022
- 9. Source: The Times of India, "Road to Pune has more takers than train, plane" (2009)
- 0. Lower end represents Indian Railways base fare from Mumbai Chhatrapati Shivaji Terminus to Pune Railway Station. Upper end represent cost of driving self-owned car for 150km, approximated at \$0.28 / kilometer (Times of India estimate 2017)

Short Distance Business Offers Attractive Unit Economics

Illustrative by-the-seat unit economics for Blade Airport (West 30th Street to JFK)

^{1.} Note: Blade works with several operators to provide its airport service; the exact hourly rate and block hour length for any specific flight may vary depending on the operator, type of aircraft utilized and time of day, among other factors
2. Aircraft repositioning from overnight base to area of service may incur additional costs

Jet and Other Overview

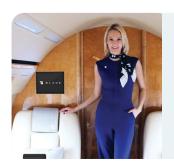

- Seasonal by-the-seat jet flights, primarily between New York and South Florida, as well as jet charter
- Includes revenue from ancillary products and services, in addition to payments from brand partners

Key Products

BladeOneBy-the-seat jet service

primarily between New York and Miami or West Palm Beach

Jet Charter

Asset-light charter service leveraging the Blade brand and a broad operator network

Partnerships and Branding

Includes payments from brand partners seeking exposure to Blade's fliers

Jet and Other Trailing Twelve Months Revenue (\$ in mm)

FAA Monthly Business Jet Operations(1)

MediMobility Organ Transport Overview

- Largest dedicated air transporter of human organs for transplant, providing end-to-end multi-modal solution incorporating rotorcraft, fixedwing aircraft, and ground vehicles
- Medical missions utilize the same aircraft that service passenger flights, with demand typically occurring at night, complementing consumer demand during the day and providing more hours for aircraft operators to amortize their fixed costs
- Fixed pricing model per trip enables predictable flight profit and allows for fuel cost pass-through
- Organ transport represents a clear use case for future drone or EVA adoption, particularly given necessary infrastructure and landing zones are already in place at many hospitals

Key Value Proposition

Attractive, Growing End Market Non-cyclical, B2B revenue with limited marketing and strong end market growth

Improves Patient
Outcomes
Shorter transport time
results in improved
organ quality and

higher success rates

Vast operator network provides customers appropriate aircraft for each mission with competitive pricing

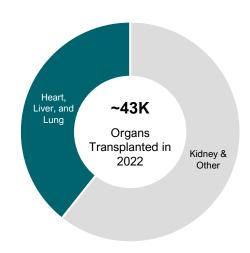

Complements
Consumer Business
Fleet commonality
increases utilization of
aircraft otherwise
idle at night

MediMobility Organ Transport Trailing Twelve Month Revenues (\$ in mm)

Organ Transplants in the US⁽¹⁾

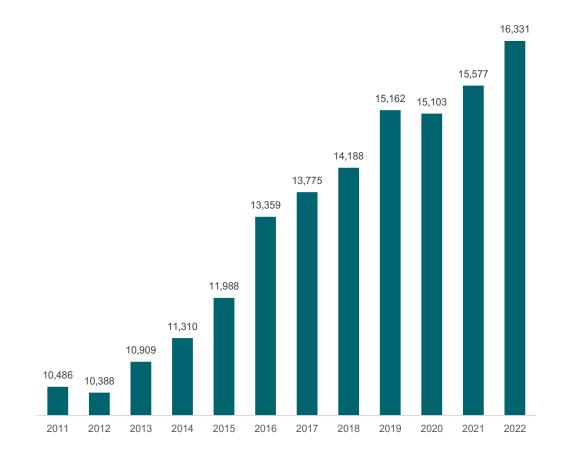

Note: Definition of all non-GAAP numbers and reconciliation to GAAP numbers are provided in the Appendix of this presentation

1. Source: United Network for Organ Sharing (UNOS) Data and Transplant Statistics. Blade primarily services the Heart, Liver, and Lung segment of the organ logistics market

MediMobility Market Overview

- Blade's MediMobility business, doing business as Trinity Medical Solutions, serves over 68 transplant centers and Organ Procurement Organizations across the United States
- Trinity primarily generates revenue from the transport of hearts, livers, and lungs given the very short time that these organs can survive outside of a human body often makes flying the only viable option
- Recent shifts in organ allocation policy have increased the average distances between recipients and donors by 50% since 2017, from 125 to nearly 200 miles, further increasing demand for organ flights⁽¹⁾
- Blade sees the potential to leverage its MediMobility platform, to pursue additional growth in adjacent markets such as kidney transport, medical radioisotopes, and critical cargo and parts delivery

National Heart, Liver, Lung Transplants by Year⁽²⁾

^{1.} Source: The American Society of Transplantation and the American Society of Transplant Surgeons, "Effects of broader geographic distribution of donor lungs on travel mode and estimated costs of organ procurement" (May 2021)

Adjusted EBITDA

(\$7.7m)

Note: Definition of all non-GAAP numbers and reconciliation to GAAP numbers are provided in the Appendix of this presentation

1. Pro forma growth reflects revenue growth as if Blade had owned the charter and scheduled air mobility businesses of Monacair, Héli Sécurité and Azur Hélicoptère in the prior year period

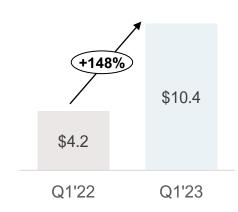

Q1 2023 Financial Highlights (continued)

 Growth led by organic growth in MediMobility Organ Transport and inorganic growth in Short Distance

Short Distance (\$ in millions)

 Growth driven by our acquisition of Blade Europe, a continued rebound in passenger travel in Canada, and continued growth in our Blade Airport service

MediMobility Organ Transport (\$ in millions)

 Growth driven by the addition of new transplant center customers, continued growth with existing customers, and strong end market demand

 Decline in revenue driven by a normalization in jet charter volume as well as lower average price per charter trip

Revenue and Adjusted EBITDA Overview

Both business segments contribute positive Flight Margin

	Three Months End	ed March 31,	
(\$ in millions)	2022	2023	%Δ vs 2022
Passenger Revenue	\$14.0	\$18.5	32.6%
Medical Revenue	12.7	26.8	111.2%
Total Revenue	\$26.6	\$45.3	70.0%
Passenger Flight Profit	\$0.7	\$2.8	308.1%
Medical Flight Profit	2.2	4.4	94.8%
Total Flight Profit	\$2.9	\$7.2	145.1%
Passenger Flight Margin	4.9%	15.2%	nm
Medical Flight Margin	17.6%	16.3%	nm
Total Flight Margin	11.0%	15.8%	nm
Passenger Segment Adj. EBITDA	(\$2.6)	(\$3.1)	(17.1%)
Medical Segment Adj. EBITDA	1.0	1.9	97.7%
Total Segment Adjusted EBITDA	(\$1.7)	(\$1.2)	29.1%
·			
Unallocated corporate and software expense	(6.1)	(6.5)	(7.9%)
Total Adjusted EBITDA	(\$7.7)	(\$7.7)	

Passenger revenue growth driven by (i) acquisition in Europe, (ii) continued growth in Canada and Blade Airport, and (iii) higher pricing across our by-the-seat and charter products. Growth partially offset by lower contribution from our Jet / Other business line

Medical revenue growth driven by the acquisition of Trinity, the addition of new transplant center clients, growth within existing clients, and strong market growth

Improvement in Passenger Flight Margin attributable to (i) improved profitability in Canada (given prior year period was adversely impacted by the COVID-19 Omicron variant), (ii) contribution from Europe, which generates above-average Flight Margin, and (iii) stronger pricing. Improvements were partially offset by lower margins in our Blade Airport and seasonal by-the-seat jet business line

Decline in Passenger Segment Adjusted EBITDA attributable to (i) the timing of Blade Europe acquisitions, when seasonally low revenues do not cover fixed costs, and (ii) lower contribution from our Jet / Other business line, partially offset by improved profitability in Canada

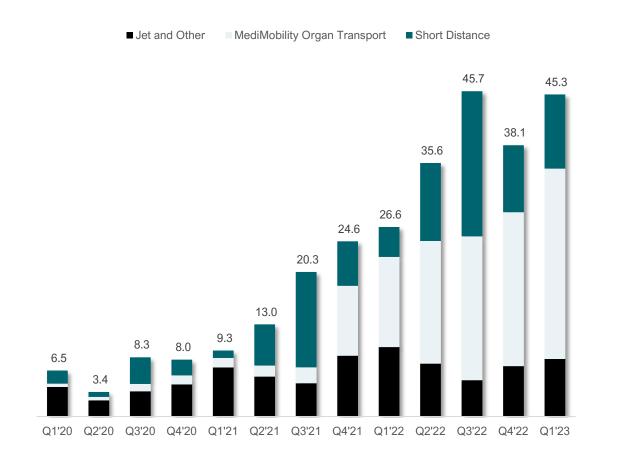

Growth in Medical Segment Adjusted EBITDA reflects flow through on significant revenue growth

Increase in corporate expense represents increased Software Development expenses, and establishment of Short-Term Incentive Plan, partially offset by cost savings

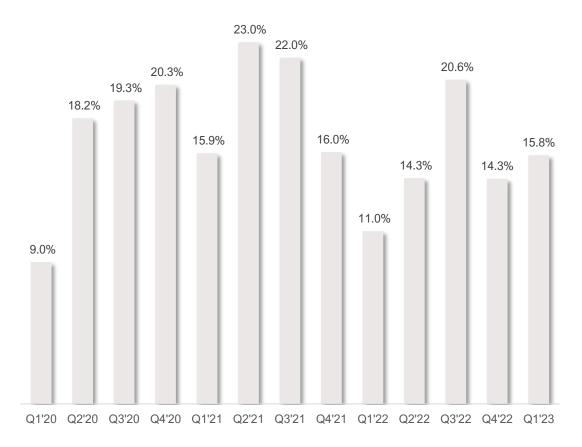

Note: Definition of all non-GAAP numbers and reconciliation to GAAP numbers are provided in the Appendix of this presentation

Track Record of Significant Revenue Growth with Positive Flight Margin

Quarterly Revenue (\$ in millions)

Quarterly Flight Margin

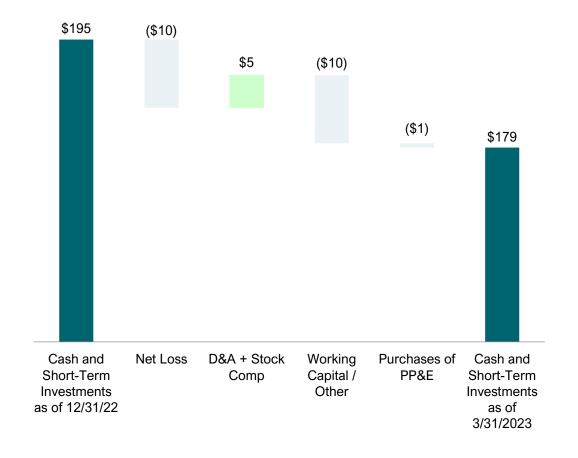

Note: Definitions and reconciliations of Flight Margin to GAAP numbers are provided in the Appendix of this presentation

Well Capitalized with Significant Liquidity

- As of March 31, 2023, Blade had \$179mm in cash and short-term investments⁽¹⁾ on its balance sheet
- Blade believes its current cash balance provides sufficient liquidity to fund the company's growth plan without the need to raise additional capital
- Blade seeks to deploy capital in a manner that generates the best risk-adjusted return for shareholders
- Key capital priorities include:
 - Organic expansion
 - Inorganic growth via acquisition
 - Investments in talent, technology, marketing, and strategic infrastructure

Cash and Short-Term Investments (\$ in millions)

^{1.} Cash and Short-Term Investments include Restricted Cash

Strong M&A Track Record

Blade views acquisitions as a key driver of shareholder value creation

Upfront Purchase Price	\$23 million ⁽¹⁾	US \$12 million	US \$48 million
Closing Date	September 15, 2021	November 30, 2021	September 1, 2022
	Trinity is an asset-light, multi- modal organ logistics company with operations in 16 U.S. States	 Helijet is North America's largest scheduled helicopter airline with operations in the Greater Vancouver area 	 Acquired the charter and scheduled air mobility businesses of Monacair, Héli Sécurité and Azur Helicoptere
Description	 Trinity generated revenues of approximately \$11 million in calendar year 2019 	 Helijet generated approximately US\$15 million in revenues while servicing approximately 100,000 fliers in 2019 	 The carriers generated an aggregate €30 million in revenues while servicing approximately 125,000 fliers in 2019

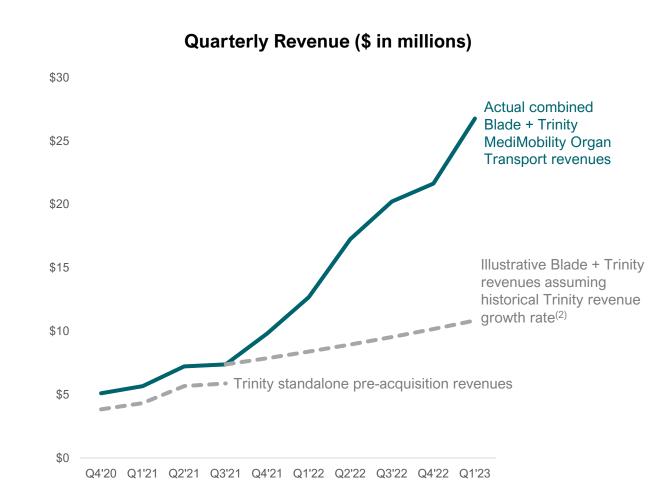

^{1.} Reflects upfront cash consideration paid to sellers; additional earnout payable based on Trinity's achievement of certain EBITDA growth targets

How Blade Creates Value via M&A: Trinity Air Medical Case Study

Since acquiring Trinity, Blade has significantly accelerated growth in the business, enhancing returns for shareholders

- Blade acquired Trinity in September 2021 for \$23mm
- Trinity's trailing twelve-month revenue prior to acquisition were approximately \$17.8mm⁽¹⁾, and had grown at an approximate 29% compound annual growth rate since 2019
- Post-acquisition, Trinity was able to leverage Blade's brand, aircraft operator network, and technologyenabled logistics and customer service, to accelerate organic growth and materially increase the size of its customer base
- In the year ended December 31, 2022, the combined Blade/Trinity Medical segment generated \$71.8mm in revenue, approximately 4x Trinity's trailing twelvemonth revenue prior to acquisition, and generated \$5.1 million in Segment Adjusted EBITDA

Note: Definition of all non-GAAP numbers and reconciliation to GAAP numbers are provided in the Appendix of this presentation

Estimated based on Trinity's historical pre-acquisition compound annual revenue growth rate of ~29% from 2019-2021

^{1.} Trinity's trailing twelve months ended June 30, 2021 revenues were \$17.8 million; a non-GAAP reconciliation is provided in the Appendix of this presentation

Blade Expects EVA to Catalyze Demand for Urban Air Mobility

Given anticipated lower costs, lower noise footprints, and zero emissions, Electric Vertical Aircraft are poised to enhance Blade's business once certified and available for commercial service, which some manufacturers expect in 2024

Expected Benefits of EVA

Quiet	Lower noise footprint will likely unlock new vertiports in markets that have historically been reluctant to embrace urban air mobility
Safe	Advanced design and rigorous certification process with engine redundancy, fly-by-wire technology, and fewer moving parts to ensure robust safety profile
Emission Free	Full battery-powered electric operation results in sustainable flight with zero carbon emissions
Fast	Anticipated cruising speeds up to 180 miles per hour nearly 20% faster than traditional rotorcraft
Lower Cost	Ultimately the combination of fewer moving parts and automotive-grade manufacturing could lower the cost of operation and ownership

Source: Public filing and management estimates

Over \$6 Billion Has Been Invested in Electric Vertical Aircraft

Blade is encouraged by the enormous amount of financial and intellectual capital being deployed to certify EVA

Partners

AIRBUS

- · Investor in Blade
- Developing airspace management system for EVA service
- Performing trial flights for last mile cargo delivery

- Approximately \$800mm capital raised
- · Partnered with U.S. Air Force's Agility Prime project

- Approximately \$370mm capital raised
- · Certified in Brazil with FAA/EASA reciprocity
- Expected entry into service 2026

(hagniX

· Partnership with Blade signed to electrify one of Blade's largest aircraft operating partners

 Received \$450mm in funding from Boeing in January 2022

ARCHER

- Approximately \$860mm capital raised
- \$1bn potential order for aircraft from **United Airlines**

· Major investments across the UAM landscape including SkyGrid and Kitty Hawk/Wisk

- Approximately \$2.4bn capital raised
- Began type certification program with FAA in 2018
- Airworthiness approval by US Air Force for military use

- Approximately \$800mm of capital raised
- Developed and flown two variations of EVA prototypes

- Approximately \$300mm proceeds from public listing
- Expected 2024 deployment

VOLOCOPTER

- Approximately \$700mm raised
- Currently testing cargo-only EVA prototypes
- Passenger flights in Singapore and Dubai

Source: Public filing and management estimates

Blade Has Partnerships with Leading EVA Manufacturers

Though Blade remains manufacturer-agnostic, we have cultivated a strong and growing list of strategic partners to ensure a seamless transition to EVA once certified

Partner	Date	Details
AIRBUS	March 2018	 Investor in Blade since 2018 Recently unveiled the new CityAirbus next generation lift-plus-cruise EVA with first flight expected in 2024 and certification as early as 2025
33/4	April 2021	 Agreement enables Blade operators to receive 5 - 20 of BETA's first passenger-configured EVAs BETA will provide and install charging infrastructure at BLADE's key terminal locations; Blade's operators will own and operate the EVAs with deliveries scheduled to begin in 2024 In February 2023, Blade and BETA Technologies completed the first test of a piloted EVA in the greater New York City area
wisk/	May 2021	 Blade to deploy up to 30 of Wisk's EVA on short-distance routes Wisk will own, operate, and maintain the EVAs with Blade chartering on a per hour basis Blade and Wisk will also engage with regulators and municipalities to pursue charging infrastructure and next-generation air traffic control systems
nagnix	May 2021	 Partnership with MagniX to electrify one of Blade's largest aircraft operating partners, Lima NY Corp Lima to use magniX's motors to convert its Blade-branded fleet of Cessna Caravans to electric In September 2021 the FAA released final special airworthiness conditions required to certify magni350 and magni650 electric propulsion systems with deliveries scheduled for 2023
MOBILITY REIMAGINED	June 2021	 Agreement with Eve to provide BLADE with up to 60,000 hours of flight time per year on its EVA beginning in 2026 Aircraft are expected to be deployed by Eve together with local partners, consistent with BLADE's assetlight business model In September 2022, announced strategic partnership between Blade India and Eve for acquisition of up to 200 Eve aircraft

Components of Aircraft Operating Costs

Given the fixed costs associated with operating any aircraft, along with the need for infrastructure owners to make profits from fuel / electricity sales and landing fees, we anticipate that early EVA will produce modest improvements in unit economics

Operator	Economics	Blade Economics
Fixed Costs	Direct Operating Costs (DOC)	Hourly Rate
Aircraft Ownership / Lease Insurance	Cost of fuel or electricity (including markup)	÷
Maintenance Labor Maintenance Parts	Battery reserves (assume replacement at max cycles over lifetime)	Flight Time
Avionics / Subscriptions Pilot Salaries ⁽¹⁾	Maintenance reserves (scheduled and unscheduled)	+
Pilot Training ⁽¹⁾ Hangar	and unscrieduled)	Landing Fees
Admin		=
Hours flown Fixed Costs + per aircraft per year	Direct Operating Hourly Rate Costs	Flight Cost

Note: Fixed costs are amortized over the total number of annual flight hours per machine

^{1.} Additional pilots and training are required to manage duty requirements depending on aircraft usage (i.e. hours flown per year)

Illustrative EVA Fixed Costs

We estimate that the fixed costs associated with EVA operation will largely resemble helicopter / fixed wing costs, equating to ~\$600-\$900 per hour assuming 1,000-1,500 hours flown per machine, per year

Category	Assumption	Annualized	Per Hour	Vs. Heli	`
Aircraft Ownership / Lease	12% of \$4mm aircraft value / year	\$480,000	\$480	1	These costs may decrease over time with large-scale
Insurance	3% of \$4mm aircraft value / year	120,000	120	1	manufacturing
Pilot Salaries ⁽¹⁾	\$100k / year salary for two IFR-rated pilots	200,000	200	•	
Pilot Training ⁽¹⁾	\$10k FlightSafety tuition 2x per year / pilot	40,000	40	•	
Maintenance Tech	Partial use of salaried maintenance tech	55,000	55	•	
Hangar	\$2k per month hangar lease near Manhattan	24,000	24	•	
Avionics / Subscriptions	Monthly commercial avionics subscription	14,000	14	•	
Parts	\$500 per month given limited moving parts	6,000	6	•

Source: Management estimates

^{1.} Additional pilots and training may be required to manage duty requirements depending on aircraft usage (i.e. hours flown per year)

^{2.} Management estimates of comparison to Bell 407 fixed costs

Illustrative EVA Unit Economics

Management estimates that EVA will initially enable a modest reduction in flying cost on key routes, with further savings expected over time

- 1. For comparison purposes, Bell 407 GXi Direct Operating Costs are \$589.31 / hour, including maintenance, fuel and engine reserve, as per Bell product specifications published in January 2020
- 2. Additional pilots and training are required to manage duty requirements depending on aircraft usage (i.e. hours flown per year)
- 3. Management estimate of EVA direct operating costs includes electricity costs (including vertiport markup), battery replacement, and maintenance reserve

Blade Management

Rob Wiesenthal
Founder and Chief Executive Officer

- Founder and Chief Executive Officer of BLADE Urban Air Mobility, Inc.
- Former CFO of Sony Corp. of America and Head of Global Corporate Development of Sony Corporation

Amir Cohen
Chief Accounting Officer

- Previously SVP of Finance at WPP, Wunderman Thompson network.
- Previously Manager at PwC

Melissa Tomkiel
President and General Counsel

- Previously President and General Counsel of LIMA NY Corporation (Part 135 Air Carrier)
- Previously Attorney at Pryor Cashman

Roisin Branch
Chief Marketing Officer

- Previously VP of Marketing at Equinox for the company's SoulCycle division
- Previously held senior marketing positions at ABInBev and Diageo

Will Heyburn
Chief Financial Officer

- · Previously at RedBird Capital Partners

Use Of Non-GAAP Information

Adjusted EBITDA - To supplement its consolidated financial statements, which are prepared and presented in accordance with U.S. generally accepted accounting principles ("GAAP"), Blade reports Adjusted EBITDA, which is a non-GAAP financial measure. This measure excludes non-cash items or certain transactions that are not indicative of ongoing Company operating performance and / or items that management does not believe are reflective of our ongoing core operations (as shown in the table below).

Flight Profit and Flight Margin - Blade defines Flight Profit as revenue less cost of revenue. Cost of revenue consists of flight costs paid to operators of aircraft and cars, landing fees, right-of-use ("ROU") asset amortization and internal costs incurred in generating ground transportation revenue using the Company's owned cars. Blade defines Flight Margin for a period as Flight Profit for the period divided by revenue for the same period. Blade believes that Flight Profit and Flight Margin provide a more accurate measure of the profitability of the Company's flight and ground operations, as they focus solely on the direct costs associated with those operations.

Blade believes that these non-GAAP measures, viewed in addition to and not in lieu of our reported GAAP results, provide useful information to investors by providing a more focused measure of operating results, enhance the overall understanding of past financial performance and future prospects, and allow for greater transparency with respect to key metrics used by management in its financial and operational decision making. The non-GAAP measures presented herein may not be comparable to similarly titled measures presented by other companies. Adjusted EBITDA and Flight Profit have been reconciled to the nearest GAAP measure in the tables within this presentation.

⁽¹⁾ Cost of revenue consists of flight costs paid to operators of aircraft and cars, landing fees and internal costs incurred in generating ground transportation revenue using the Company's owned cars. Prior period amounts have been updated to conform to current period presentation.

Pro forma revenue - Pro forma revenue gives effect to revenue from acquisitions that occurred after the commensurate period of the prior year as if they had been acquired on the first day of the commensurate period of the prior year. Pro forma change in revenue is calculated as the difference between the current reported GAAP revenue and the comparative period pro forma revenue. Management believes that discussing pro forma revenue contributes to the understanding of Blade's performance and trends, because it allows for comparisons of the current year period to that of prior years, normalized for the impact of acquisitions. Management believes that pro forma change in revenue assists in measuring the underlying revenue growth of our business as it stands as of the end of the current year period, which we believe provides insight into our then-current operations. Pro forma change in revenue does not represent organic revenue generated by our business as it stood at the beginning of the prior year period.

Constant currency - The unaudited interim condensed consolidated financial statements included here are presented in U.S. dollars. However, Blade's international operations give rise to fluctuations in foreign exchange rates. To compare results between periods as if exchange rates had remained constant period-over-period and allow change in revenue to be evaluated without the impact of foreign currency exchange rate fluctuations, Blade has included results in constant currency. These are calculated by applying the current period exchange rates to local currency reported results for both the current and prior year.

BLADE AIR MOBILITY, INC. RECONCILIATION OF REPORTED REVENUE TO PRO FORMA REVENUE

(in thousands except percentages, unaudited)

The following unaudited pro forma financial information presents what our revenue would have been if Blade Europe business had been acquired on March 1, 2022. As a result, pro forma revenue includes revenue generated during periods when we did not yet own the acquired business. This unaudited pro forma financial information should not be relied upon as being indicative of the historical results that would have been obtained if the acquisition had occurred on that date, nor the results that may be obtained in the future.

We operate our business as two reportable segments - Passenger and Medical.

Segment Flight Profit and Flight Margin - Flight Profit is calculated as revenue less cost of revenue excluding non-cash timing of ROU asset amortization. Cost of revenue consists of flight costs paid to operators or aircraft and cars, landing fees and internal costs incurred in generating organ ground transportation revenue using the Company's owned cars. Flight Margin is calculated as Flight Profit divided by revenue. Flight Profit and Flight Margin are measures that management uses to assess the performance of the business. Blade believes that Flight Profit and Flight Margin provide a more accurate measure of the profitability of the Company's flight and ground operations, as they focus solely on the direct costs associated with those operations. Blade believes the exclusion of the ROU asset amortization from Flight Profit and Flight Margin is helpful as it better represents the Company's actual payable expenses in exchange for the flights served by the operators in the fourth quarter. We also believe that excluding this non-cash ROU amortization expense will aid comparable to prior and future periods as we do not expect it to re-occur after the fourth quarter of 2022.

Adjusted EBITDA and Segment Adjusted EBITDA - Blade reports Adjusted EBITDA, which is a non-GAAP financial measure. This measure excludes non-cash items or certain transactions that are not indicative of ongoing Company operating performance and / or items that management does not believe are reflective of our ongoing core operations (as shown in the table below). Blade defines Segment Adjusted EBITDA as segment net income (loss) excluding non-cash items or certain transactions that management does not believe are reflective of our ongoing core operations.
