Strong Alignment for Joby and Reinvent to Drive Significant Long-Term Value for Shareholders

Transaction Summary

Transaction Structure

- Joby and Reinvent are in discussion to combine in order to grow the industry leading aerial ridesharing business as a public company and achieve commercialization for its eVTOL aircraft by 2024
- Restructured founder shares and private warrants to create long-term alignment

Valuation

- Transaction implies a fully diluted pro-forma aggregate value of \$4.6Bn (2.3x AV / 2026E Revenue)
- Existing Joby shareholders to roll 100% of their equity and expected to receive 76% of the pro-forma equity⁽¹⁾⁽²⁾

Capital Structure

- The transaction will be funded by a combination of Reinvent cash held in a trust account and Committed Funding for an aggregate of up to $1.6Bn^{(1)(2)}$
- Pro-forma for the transaction, Joby expects to have up to ~\$2.0Bn of cash to fund growth and commercialize its operations

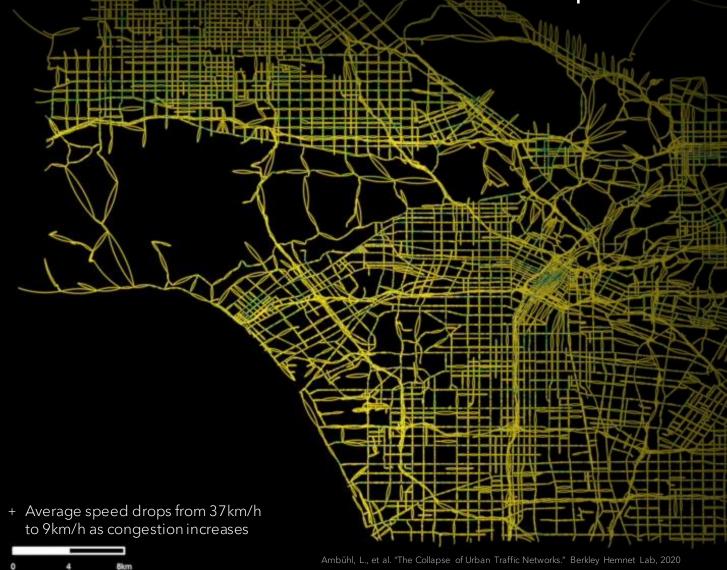

- 1. Pro-forma ownership based on \$10.00 per share price and excludes potential dilution from outof-the-money Reinvent warrants and out-of-of the-money founder shares. Pro-forma further assumes no redemptions by Reinvent's existing public shareholders
- 2. Committed Funding is inclusive of an \$835MM fully committed PIPE and a \$75MM Uber convertible note which converts immediately prior to transaction closing; the 7.5MM shares to be issued to Uber are excluded from the Equity Consideration to Joby's Existing Investors

Base Financial Plan Underpinned by Significant Progress to Date

Base Case

- 2-3 city initial rollout starting in 2024 and achieving scale by 2026
- Add newer cities only after meaningful penetration of initial rollout cities

Potential Upside Levers

- More efficient scaling of manufacturing
- Faster reduction in Revenue per Available Seat Mile ("RASM")
- Improvement in energy density for energy storage
- Faster global adoption of advanced transportation technology than in the U.S.
- Utilization upside to drive improvement in plane unit economics

Significant Progress Towards Our Business Plan

- Significant data assets from Uber Elevate with leading operational launch team
- World-class engineering and certification team
- Route-by-route demand analysis for target launch cities
- Streamlined certification process with FAA under Part 23 that will have global acceptability
- · Identified and acquired manufacturing facilities including factory location and land
- Majority of components and tooling designed in-house

Key Assumptions and Performance Indicators in 2026 Joby Service

Aircraft

- Average of 963 total aircraft (850 in Service segment)
- Fully loaded manufacturing cost of **\$1.3MM** per aircraft
- Average useful life of ~50k flight hours which equates to over 15 years

Utilization

- ~7 hours spent in flight per day with ~12 operating hours (1)
- ~12.4MM total flights per year with ~35.4k flights per day
- Average trip length of **24** miles
- Load factor of **2.3** passengers per trip

Bottoms-Up Cost Analysis

- Fully loaded annual COGS, operating expense, depreciation, and interest of \$1.2MM per aircraft
 - COGS includes pilots, landing fees, customer service, and maintenance
 - Operating expenses includes SG&A
- Fully burdened CASM of \$0.86 (2)

Revenue & Payback

- Net revenue of \$2.2MM and \$1.0MM annual profit per plane
- Based on \$1.3MM cost, payback period of ~1.3 years
- Price point of \$3.00 per seat mile (\$1.73 RASM at full load factor) is cheaper than Uber Black for an individual

Analogous Autonomous Ridesharing Precedents Validates Valuation Upside

- +Recent validations from autonomous ridesharing precedents
- +Large, untapped addressable markets
- +Pre-commercialization phase
- +Service-based models with strong network effect
- +Specialized hardware
- +Significant ability to scale

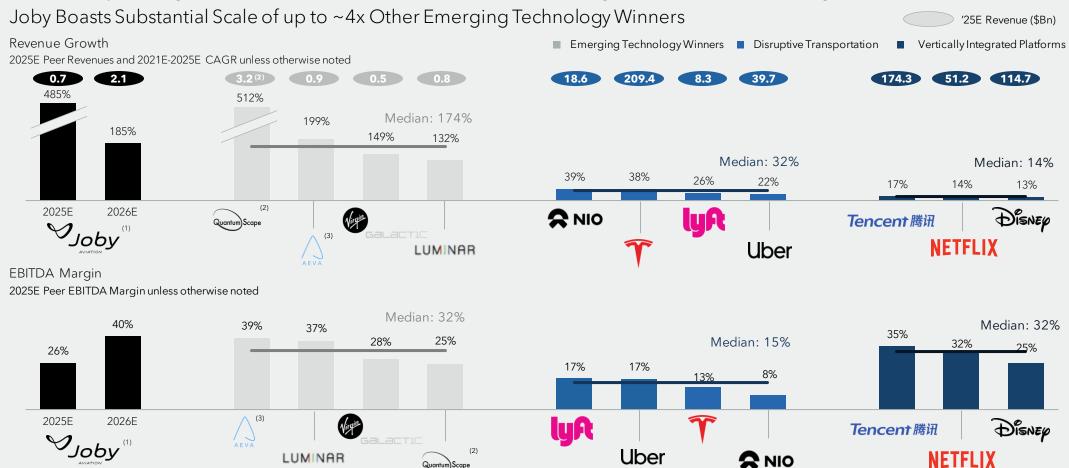

- + Waymo and its autonomous taxi business was most recently valued at \$31Bn
- + Service based model, with limited vertical integration
- + Low margins given expectation for continued aggressive growth
