Alliance Police Department Commits to Non-Lethal Response with Full BolaWrap® 150 Rollout

MIAMI, Dec. 17, 2025 (GLOBE NEWSWIRE) -- Wrap Technologies, Inc. (NASDAQ: WRAP) ("Wrap" or the "Company"), a global leader in non-lethal response and public-safety technology solutions, today announced that the Alliance Police Department ("Alliance PD") has partnered with Wrap to purchase and deploy BolaWrap® 150 devices across the department and is expected to become the first reported municipal police department in the State of Nebraska to equip every sworn officer with an immediate non-lethal response option.

We believe the deployment reflects Alliance PD's and Chief Leavitt's commitment to modern policing strategies that emphasize safer outcomes for both officers and the community. The program is structured as an integrated non-lethal response framework that combines equipment, training, tactics, and policy alignment rather than a standalone technology deployment.

As part of the initiative, participating officers are expected to be equipped with the BolaWrap® 150, along with access to WrapTactics™ digital training and modernized instructional resources designed to support lawful, measured responses during high-stress encounters. The training approach focuses on consistent decision-making, tactical awareness, and proportional response, aligned with constitutional policing principles and contemporary best practices.

We believe this integrated ecosystem connects training, operational guidance, and practical control tactics to help officers create time, space, and additional response options during rapidly evolving calls, particularly those involving behavioral-health crises, emotionally disturbed individuals, or situations where lethal force may not be necessary or appropriate.

The BolaWrap® 150 device is intended for use across a range of real-world scenarios, including mental-health and behavioral-health crises, encounters involving non-compliant but non-violent individuals, and situations where verbal de-escalation alone may be insufficient. The tool is designed to provide officers with a non-lethal option while reducing the need to escalate to higher levels of force, supporting safer outcomes for officers, subjects, and the community.

The Alliance PD has reported responding to an increasing number of behavioral- and mental-health calls, welfare checks, and complex encounters that fall outside traditional tools and tactics. By fully deploying BolaWrap® 150 devices to every officer, the department is aiming to expand its toolkit to better reflect the realities of modern policing.

Under this deployment, Alliance PD joins a growing number of agencies nationwide

implementing fully integrated non-lethal response programs, which we believe positions non-lethal tools not as a last resort, but as an early intervention option designed to reduce injuries, complaints, and unintended outcomes.

Wrap believes Alliance PD's approach may serve as a model for other municipal police departments seeking to build safer outcomes for their officers and the community they serve.

About Wrap Technologies, Inc.

Wrap Technologies, Inc. (Nasdaq: WRAP) a global leader in innovative public safety technologies and non-lethal tools, delivering cutting-edge technology with exceptional people to address the complex, modern day challenges facing public safety organizations.

Wrap's complete public safety portfolio includes the non-lethal BolaWrap 150 device, WrapReality™ immersive training platform, WrapVision™ body-worn camera system, WrapTactics™ training programs, and next-generation CUAS solutions like PAN-DA and the 1KC Kinetic Anti-Drone Cassette, all of which supports the Company's mission to provide safer, scalable, and cost-effective technologies for public safety, defense, and critical infrastructure markets. Wrap's BolaWrap® 150 solution leads in pre-escalation intended to provide law enforcement with a safer choice for nearly every phase of a critical incident. This innovative, patented device deploys a multi-sensory, cognitive disruption that leverages sight, sound and sensation to expand the pre-escalation period and gives officers the advantage and critical time to manage non-compliant subjects before resorting to higher-force options. The BolaWrap® 150 is not pain-based compliance. It does not shoot, strike, shock, or incapacitate, instead, it helps officers strategically operate pre-escalation on the force continuum, reducing the risk of injury to both officers and subjects. Used by over 1,000 agencies across the U.S. and in 60 countries, BolaWrap® is backed by training certified by the International Association of Directors of Law Enforcement Standards and Training (IADLEST), reinforcing Wrap's commitment to public safety through cutting-edge technology and expert training.

WrapReality™ VR is a fully immersive training simulator to enhance decision-making under pressure.

As a comprehensive public safety training platform, it provides first responders with realistic, interactive scenarios that reflect the evolving challenges of modern law enforcement. By offering a growing library of real-world situations, WrapReality™ is intended to equip officers with the skills and confidence to navigate high-stakes encounters effectively, which we believe leads to safer outcomes for both responders and the communities they serve.

WrapVision is an all-new body-worn camera and evidence management system built for efficiency.

Designed for efficiency, security, and transparency to meet the rigorous demands of modern law enforcement, WrapVision captures, stores, and helps manage digital evidence, ensuring operational security, regulatory compliance, and enhanced video picture quality and field of view.

The WrapVision camera, powered by IONODES, boasts streamlined cloud integration and

final North American assembly, with a critical made-in-America roadmap projected for early 2026. This track helps ensure data integrity and helps eliminate critical concerns over unauthorized access or foreign surveillance risks.
