### **About Aqua Metals, Inc.**

Aqua Metals is reinventing lead recycling with its patent-pending AquaRefining technology. Unlike smelting, AquaRefining is a modular, room temperature, water-based process that is fundamentally non-polluting. These modular systems allow the lead acid battery industry to simultaneously improve environmental impact and scale production to meet demand. Aqua Metals is based in Alameda, California, and is building its first recycling facility in Nevada's Tahoe Reno Industrial Complex. ### **Safe Harbor**

This press release contains forward-looking statements concerning Aqua Metals, Inc., the lead-acid battery recycling industry, the future of lead-acid battery recycling via traditional smelters, the Company's development of its commercial lead-acid battery recycling facilities and the quality, efficiency and profitability of the Company's proposed lead-acid battery

recycling operations. Those forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause actual results to differ materially. Among those factors are: (1) the fact that Company has not yet commenced revenue producing operations or developed its initial commercial recycling facility, thus subjecting the Company to all of the risks inherent in a pre-revenue start-up; (2) risks related to Aqua Metals' ability to raise sufficient capital, as and when needed, to develop and operate its recycling facilities; (3) changes in the federal, state and foreign laws regulating the recycling of lead-acid batteries; (4) the Company's ability to protect its proprietary technology, trade secrets and know-how and (5) those other risks disclosed in the section "Risk Factors" included in the Annual Report on Form 10-K filed with the SEC on March 28, 2016. Aqua Metals cautions readers not to place undue reliance on any forward-looking statements. The Company does not undertake, and specifically disclaims any obligation, to update or revise such statements to reflect new circumstances or unanticipated events as they occur.
