Mirion Technologies Contributes Radiation Monitoring Equipment to Japan

SAN FRANCISCO--(BUSINESS WIRE)-- [Mirion Technologies](#) today announced the donation of 700 radiation monitoring [dosimeters](#) to support the first responders assisting with the ongoing relief efforts in Japan. Mirion's customer EDF/GRP-Saint-Denis (Electricite de France / Groupe Prevention des Risques) supported the donation by supplying part of these dosimeters which Mirion then retrofitted, while Mirion provided the balance from its own stock. The donated dosimeters will assist with the measurement and recording of the total accumulated dose of ionizing radiation received by the first responders in Japan.

"Mirion Technologies and its employees are deeply saddened by the loss life and devastation caused by the earthquake and tsunami in Japan," stated Antony Besso, President of Mirion's Health Physics Division. "As a recognized expert in nuclear detection and monitoring devices, our systems are critical to the safety of these responders."

ABOUT MIRION TECHNOLOGIES

Mirion Technologies is a world leader in radiation detection, measuring and monitoring. Mirion has facilities in Europe, Asia, and North America. Mirion Technologies is headquartered in the San Francisco Bay area and is a portfolio company of American Capital (NASDAQ: ACAS).
