June 10, 2015

Titan Pharmaceuticals to Present at the BIO International Convention

SOUTH SAN FRANCISCO, CA -- (Marketwired) -- 06/10/15 -- Titan Pharmaceuticals, Inc. (OTCQB: TTNP), a specialty pharmaceutical company developing proprietary therapeutics for the treatment of select chronic diseases utilizing its ProNeura™ long-term drug delivery technology, announced today that President Sunil Bhonsle will present at the BIO International Convention 2015 being held June 16-18 at the Pennsylvania Convention Center in Philadelphia. The presentation will take place on Tuesday, June 16 at 4:15 p.m. in Theater 3.

Mr. Bhonsle will review topline results of the final Phase 3 trial of Probuphine® for the long-term maintenance treatment of opioid dependence. The trial met all primary and secondary efficacy endpoints and plans are under way for the resubmission of the New Drug Application (NDA) later this year. He will also provide an overview of the company's ProNeura for Parkinson's disease program and other upcoming milestones for 2015.

About the BIO International Convention

The BIO International Convention is considered one of the world's largest, most influential biotech meetings and regularly attracts 15,000 of the most powerful biotech and pharma players from 65 countries, offering powerful business partnering, networking and education that go far beyond professional development. For more information, please visit http://convention.bio.org.

About Titan Pharmaceuticals

Titan Pharmaceuticals Inc. (OTCQB: TTNP), based in South San Francisco, CA, is a specialty pharmaceutical company developing proprietary therapeutics primarily for the treatment of serious medical disorders. The company's lead product candidate is Probuphine®, a novel and long-acting formulation of buprenorphine for the long-term maintenance treatment of opioid dependence. Probuphine employs Titan's proprietary drug delivery system ProNeura™, which is capable of delivering sustained, consistent levels of medication for six months or longer. Titan has granted North American commercial rights for Probuphine to Braeburn Pharmaceuticals. If approved, Probuphine would be the first and only commercialized treatment of opioid dependence to provide continuous, around-the-clock blood levels of buprenorphine for six months following a single procedure. The ProNeura technology has the potential to be used in developing products for treating other chronic conditions, such as Parkinson's disease, where maintaining consistent blood levels of a dopamine agonist may benefit the patient and improve medical outcomes.
