Titan Pharmaceuticals Reports Third Quarter 2015 Financial Results

Management Team to Host Conference Call Nov. 16 at 4:05 p.m. ET / 1:05 p.m. PT

SOUTH SAN FRANCISCO, CA -- (Marketwired) -- 11/16/15 -- [Titan Pharmaceuticals, Inc.](#) (NASDAQ: TTNP), a specialty pharmaceutical company developing proprietary therapeutics for the treatment of select chronic diseases utilizing its ProNeura™ long-term, continuous drug delivery technology, today reported financial results for its third quarter ended Sept. 30, 2015.

Titan recognized no revenue in the third quarter of 2015. This compared with approximately \$0.9 million of revenue recognized in the third quarter of 2014, which consisted of license revenue and reflected the amortization of the upfront license fee received from the company's development and commercialization partner, Braeburn Pharmaceuticals, in December 2012.

Total operating expenses for the quarter ended Sept. 30, 2015 were approximately \$1.8 million, an increase of approximately \$0.1 million over the approximately \$1.7 million expense reported for the same quarter in 2014. The increase was driven primarily by higher research and development ("R&D") expenses of approximately \$1.0 million in the third quarter of 2015, compared with approximately \$0.8 million in the same period of 2014. This was a result of increases in external R&D costs related to the support of Titan's Probuphine® and ProNeura-ropinirole product development programs, employee-related and other R&D expenses. General and administrative expenses were approximately \$0.8 million this quarter, compared with approximately \$0.9 million in the same quarter in 2014. The decrease of approximately \$0.1 million was primarily related to a reduction in professional fees and other outside services.

Net other expenses for the third quarter ended Sept. 30, 2015 were approximately \$5,000, compared with net other income of approximately \$1.5 million in the same quarter a year ago. Net other income and expense has consisted primarily of non-cash gains and losses on changes in the fair value of warrants.

Net loss for the 2015 third quarter was approximately \$1.8 million, or approximately \$0.09 per share, compared with net income of approximately \$0.7 million, or approximately \$0.04 per share in the same period in 2014.

At Sept. 30, 2015, Titan had cash of approximately \$9.7 million, which the company believes is sufficient to fund planned operations at least into the fourth quarter of 2016.

"Titan made meaningful progress on all fronts during the third quarter. The U.S. Food and

Drug Administration (FDA) accepted the resubmission of the New Drug Application (NDA) for Probuphine for the long-term maintenance treatment of opioid addiction, and set the agency action date of February 27, 2016. Additionally, we advanced the development of our ropinirole implant for treating Parkinson's disease, and we expect to submit briefing materials in support of a pre-Investigational New Drug (IND) meeting request during the fourth quarter of this year," said Titan President Sunil Bhonsle. "Titan also achieved an important milestone with the up-listing of our stock to the NASDAQ Capital Market, a move that raises our visibility among a broader range of investors and potentially generates more value for our shareholders."

"We are very well positioned as we close the year and prepare for a potentially transformational 2016," said Titan Executive Chairman Marc Rubin, M.D. "The board is pleased with Titan's progress, and in particular looks forward to the potential approval of Probuphine in February. As government officials call for greater access to evidence-based medication-assisted therapy, and consider a revision to the cap on the number of patients who can be treated with buprenorphine products by physicians, Probuphine has the potential to play an important and expanding role in the treatment of opioid addiction."

Conference Call

Titan management will host a conference call today at 1:05 p.m. PT / 4:05 p.m. ET to discuss the company's financial results for the third quarter of 2015. A live webcast of the call may be accessed by visiting the Titan website at www.titanpharm.com. The call can also be accessed by dialing 888-428-9490, participant code 4650396, five minutes prior to the start time. A replay of the call will be available on the company's website approximately two hours after completion of the live call and will be archived for two weeks.

About Titan Pharmaceuticals

Titan Pharmaceuticals Inc. (NASDAQ: TTNP), based in South San Francisco, CA, is a specialty pharmaceutical company developing proprietary therapeutics primarily for the treatment of serious medical disorders. The company's lead product candidate is Probuphine®, a novel and long-acting formulation of buprenorphine for the long-term maintenance treatment of opioid dependence. Probuphine employs Titan's proprietary drug delivery system ProNeura™, which is capable of delivering sustained, consistent levels of medication for three months or longer. Titan has granted North American commercial rights for Probuphine to Braeburn Pharmaceuticals. If approved, Probuphine would be the first and only commercialized treatment of opioid dependence to provide continuous, around-the-clock blood levels of buprenorphine for six months following a single procedure. The ProNeura technology has the potential to be used in developing products for treating other chronic conditions, such as Parkinson's disease, where maintaining consistent blood levels of a dopamine agonist may benefit the patient and improve medical outcomes. For more information about Titan, please visit www.titanpharm.com.
