# Titan Pharmaceuticals to Explore Strategic Alternatives

SOUTH SAN FRANCISCO, Calif., Dec. 21, 2021 /PRNewswire/ -- Titan Pharmaceuticals, Inc. (NASDAQ: TTNP) ("Titan" or the "Company") today announced that it has commenced a process to explore and evaluate strategic alternatives to enhance shareholder value. Titan has engaged Maxim Group LLC as its exclusive financial advisor to assist in this process.

Potential strategic alternatives that may be explored or evaluated as part of this process include an acquisition, merger, reverse merger, other business combination, sales of assets, licensing or other strategic transactions involving the Company. There can be no assurance that the exploration of strategic alternatives will result in any agreements or transactions, or that, if completed, any agreements or transactions will be successful or on attractive terms. Titan does not expect to disclose developments with respect to this process unless and until the evaluation of strategic alternatives has been completed or the board of directors has concluded that disclosure is appropriate or legally required.

## About Titan Pharmaceuticals

Titan Pharmaceuticals, Inc. (NASDAQ:TTNP), based in South San Francisco, CA, is a development stage company developing proprietary therapeutics with its ProNeura® long-term, continuous drug delivery technology. The ProNeura technology has the potential to be used in developing products for treating a number of chronic conditions, where maintaining consistent, around-the-clock blood levels of medication may benefit the patient and improve medical outcomes. Ultimate validation of the ProNeura® delivery system has been exemplified by approval of Probuphine in the US (FDA), EU (EMA) and Canada (Health Canada).

Key ongoing ProNeura implant programs include IND-enabling, non-clinical assessment of TP-2021, a potent peptide kappa opioid agonist for the long-term treatment of severe, chronic pruritis, and nalmeferene, a mu opioid receptor blocker designed to decrease relapse and potential death from overdose in detoxed patients with Opiate Use Disorder.
