CROSSPATHS, the Mobile Christian Dating App, Is Now Available on Android

Patented "Mutual Matching" Technology and One-of-a-Kind "Faith Spectrum" Connects Christian Singles Who Are Mutually Interested in Meeting

LOS ANGELES, CA -- (Marketwired) -- 06/08/16 -- [CROSSPATHS](#), the free mobile Christian dating app that connects like-minded Christians, is now available for the first time to Android users. CROSSPATHS on Android is the latest app launched by Spark Networks®, owner of dating communities [ChristianMingle®](#) and [JDate®](#). The popular mobile platform has been helping millennial Christians meet, date and relate since first launching on the Apple iOS platform in the fall of 2015.

A better way for finding like-minded single Christians, CROSSPATHS uses patented mutual matching technology which only connects two people when they're both interested, allowing them to get to know each other and then meet when they're ready to take that next step. CROSSPATHS uses Facebook to verify each and every member's profile so that people can make real connections with actual people on the app. Once a mutual interest has been established, CROSSPATHS connects members to chat for free in real-time.

Encouraging genuine connections and personal interactivity, CROSSPATHS offers the following user benefits to its young Christian community:

- Connections are based on a one-of-a-kind "Faith Spectrum," so users can connect, match, chat and find love built on the mutual foundation of a shared faith.
- Easy to get started and make connections "around me" with single Christian men and women in local areas.
- Free online chatting to determine if there's any chemistry and a mutual desire to move to the next step.
- Opportunities to meet face-to-face by arranging dates, attending local sponsored events, and community volunteerism.

"We are thrilled to offer Android members the opportunity to join the tens of thousands of people who have already downloaded and are successfully using our CROSSPATHS app," said Michael Egan, Chief Executive Officer, Spark Networks. "With Android now launched, we fully expect to grow the community to serve the needs of the tens of millions of young, single Christians in the United States and international markets."

CROSSPATHS is available for install nationwide now in the [Google Play Store](#) and on [Apple iTunes](#). For additional information, please visit www.CROSSPATHSapp.com.

ABOUT CROSSPATHS

CROSSPATHS is the premiere go-to destination for young single Christians looking to meet, date and relate. As one of the only dating apps with a focus on faith, CROSSPATHS aims to give young Christian users a new and fun way to make meaningful connections with other like-minded Christians.
