"Data from our Love in Lockdown survey shows that the pandemic hasn't prevented singles from sparking online connections" said Eric Eichmann, Spark's CEO. "If anything, it's expanded the ways in which singles can bond. While people do still seek out matches based on perennially popular traits like a good sense of humor, we're also seeing them connect over new, pandemic-related topics like working from home."

"Restrictions on gatherings and travel have also had an effect on daters, as a majority of singles state that social distancing has made them more motivated to look for a partner. This is echoed by an increased success rate throughout our biggest brands: Zoosk, EliteSingles, and SilverSingles have seen a 16% increase in users reporting that they have found love online. In short, while singles have had some in-person dating practices affected by the global pandemic, they're still prioritizing the search for love. Connection matters more than ever, and Spark brands are helping people find it."
