Sonim Leads the LMR-to-LTE Evolution at IWCE's Critical LTE Communications Forum

SAN MATEO, Calif., Nov. 1, 2017 /PRNewswire/ --[Sonim Technologies](#), the global leader in mission critical LTE-based handsets for public safety, will be at IWCE's Critical LTE Communications Forum, Nov. 8-9 at the Hilton Dallas Park Cities in Dallas, Texas.

Over the past several years, Sonim collaborated with technology leaders to develop a robust communications solution for public safety. Sonim combines purpose-built LTE mobile handsets and ultra-rugged accessories with customized applications and services to increase first responder effectiveness and safety at a fraction of what agencies spend for other communications capabilities.

"The transition from LMR to LTE is an evolution, not a revolution," said Robert Escalle, Vice President – Public Safety & Defense Market Segments. "There are a number of factors involved in migrating an organization from LMR to LTE. Sonim has the technology, expertise and partnerships in place to help agencies manage the conversion with a clean, integrated solution that is easy to deploy."

Learn more at the Mission-Critical Push-to-Talk Roundtable on Thursday, Nov. 9 – from 10:20 a.m. to 11:20 a.m. where Escalle and other panelists will discuss the advantages and disadvantages of LMR and LTE technology. To schedule a meeting with Sonim during the event, contact us at publicsafety@sonimtech.com.
