(NYSE: VRE) ("the Company"), a forward-thinking, environmentally- and socially-conscious REIT that primarily owns, operates, acquires and develops Class A multifamily properties, today released its [2022 ESG Report](#). The report, which is available on the Company's website [here](#), details the initiatives Veris Residential executed over the last year to fulfill its commitment of creating 'Communities with Purpose.' Throughout 2022, Veris Residential continued to implement sustainable best practices valuing diversity, equity, and inclusion, becoming an even more responsible company for the benefit of all stakeholders.

With the release of its report, Veris Residential is today announcing that it has been recognized as the first company globally to receive the WELL Equity Rating across its managed portfolio, as well as for its corporate headquarters. Mahbod Nia, Chief Executive Officer of Veris Residential, said, "At Veris Residential, we recognize that the built sector has an outsized impact on global carbon emissions and as such, have taken meaningful steps to further mitigate our carbon footprint and combat climate change for the well-being of our residents, employees, suppliers and communities. I am incredibly proud of what our team has accomplished on behalf of our stakeholders over the last year. These accomplishments underscore Veris Residential's dedication to responsibly owning and operating its properties, while remaining an industry leader in ESG. Looking ahead, we will continue to evaluate opportunities to enhance our properties to meet residents' sustainability-conscious lifestyle preferences, empower our employees with the tools they require to succeed, and reduce our energy consumption in support of our communities and the planet—all while creating value for our shareholders."
