## Stratasys

## Forward-looking statements

The statements in this presentation regarding Stratasys' strategy, and the statements regarding its projected future financial performance, including the financial guidance (or withdrawal of guidance) concerning its expected results for 2020, are forward-looking statements reflecting management's current expectations and beliefs. These forward-looking statements are based on current information that is, by its nature, subject to rapid and even abrupt change. Due to risks and uncertainties associated with Stratasys' business, actual results could differ materially from those projected or implied by these forward-looking statements. These risks and uncertainties include, but are not limited to: the degree of our success at introducing new or improved products and solutions that gain market share; the degree of growth of the 3D printing market generally; the duration of the global COVID-19 pandemic, which, if extensive, may continue to impact, in a material adverse manner, our operations, financial position and cash flows, and those of our customers and suppliers; the impact of potential shifts in the prices or margins of the products that we sell or services that we provide, including due to a shift towards lower-margin products or services; the impact of competition and new technologies; potential further charges against earnings that we could be required to take due to impairment of additional goodwill or other intangible assets; the extent of our success at successfully consummating acquisitions or investments in new businesses, technologies, products or services; potential changes in our management and board of directors; global market, political and economic conditions, and in the countries in which we operate in particular (including risks related to the impact of coronavirus on our supply chain and business); costs and potential liability relating to litigation and regulatory proceedings; risks related to infringement of our intellectual property rights by others or infringement of others' intellectual property rights by us; the extent of our success at maintaining our liquidity and financing our operations and capital needs; the impact of tax regulations on our results of operations and financial condition; and those additional factors referred to in Item 3.D "Key Information - Risk Factors", Item 4, "Information on the Company", Item 5, "Operating and Financial Review and Prospects," and all other parts of our Annual Report on Form 20-F for the year ended December 31, 2019 (the "2019 Annual Report"), which we filed with the Securities and Exchange Commission (the "SEC") on February 26, 2020. Readers are urged to carefully review and consider the various disclosures made throughout our 2019 Annual Report and the Report of Foreign Private Issuer on Form 6-K that attaches Stratasys' unaudited, condensed consolidated financial statements and its review of its results of operations and financial condition, for the guarterly period ended June 30, 2020, which we are furnishing to the SEC on or about the date hereof, and our other reports filed with or furnished to the SEC, which are designed to advise interested parties of the risks and factors that may affect our business, financial condition, results of operations and prospects. Any quidance provided, and other forward-looking statements made in this presentation are made as of the date hereof, and Stratasys undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by

## Use of non-GAAP financial information

The non-GAAP data that appears below, which excludes certain items as described below, constitutes non-GAAP financial measures. Our management believes that these non-GAAP financial measures are useful information for investors and shareholders of our company in gauging our results of operations on an ongoing basis after (i) excluding mergers, acquisitions and divestments related expense or gains and reorganization-related charges or gains, and (ii) excluding non-cash items such as stock-based compensation expenses, acquired intangible assets amortization, including intangible assets amortization related to equity method investments, impairment of long-lived assets, and the corresponding tax effect of those items. These non-GAAP adjustments either do not reflect actual cash outlays that impact our liquidity and our financial condition or have a non-recurring impact on the statement of operations, as assessed by management. These non-GAAP financial measures are presented to permit investors to more fully understand how management assesses our performance for internal planning and forecasting purposes. The limitations of using these non-GAAP financial measures as performance measures are that they provide a view of our results of operations without including all items indicated above during a period, which may not provide a comparable view of our performance to other companies in our industry. Investors and other readers should consider non-GAAP measures only as supplements to, not as substitutes for or as superior measures to, the measures of financial performance prepared in accordance with GAAP. Reconciliation between results on a GAAP and non-GAAP basis is provided on slide 26.

#### **Opening Remarks:**

Corporate strategy review yields strong plan for industry leadership and long-term growth

Make it Better.

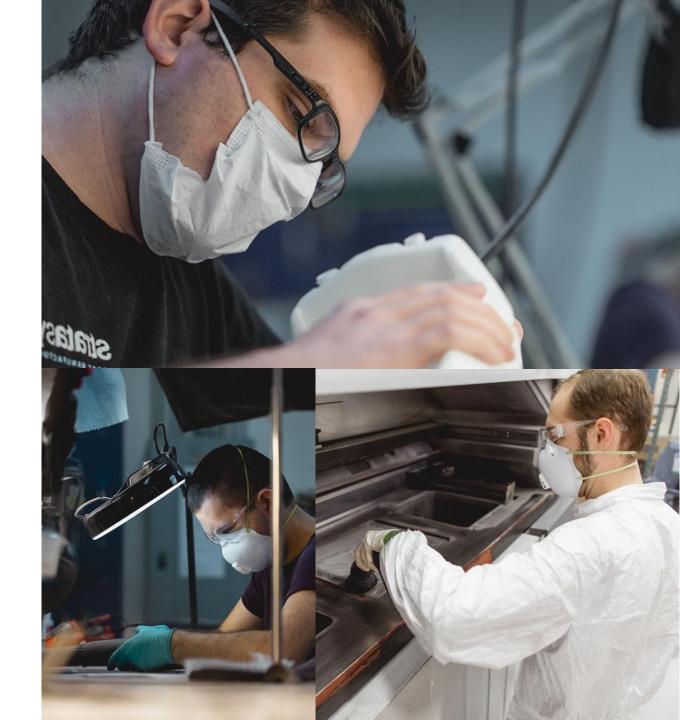

Make it with Stratasys.

Yoav Zeif

# COVID-19 weak macro and cost mitigation continues

- Global 4-day work week
- Additional 5% salary reduction for top executives
- Accelerated 10% workforce reduction as part of new operating model
- Work from home where possible and subject to regulatory restrictions

Helping our world through the pandemic and beyond

Responding to critical needs

 Demonstrating the possibilities and benefits of 3D printing

Make it Better.

Make it with Stratasys.

# 3D Printing penetrating deeper into manufacturing

Manufacturers reassessing supply chains post-COVID-19

3D printing "top choice" for investment in SME survey

Successful J55 launch and initial shipments to customers

# Strong cash position

# Healthy balance sheet

# Resilient business model

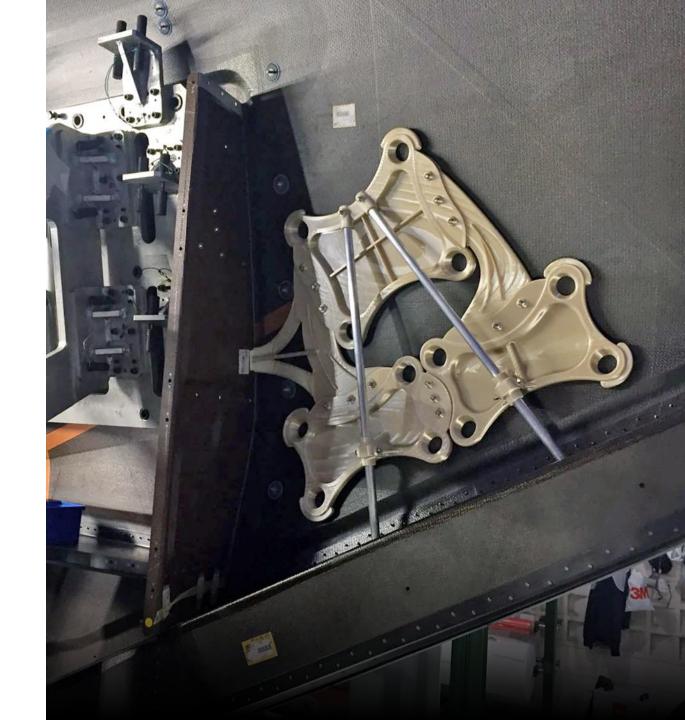

# Growth focus: Polymers for manufacturing

Polymers is the largest value pool in our industry and is growing steadily

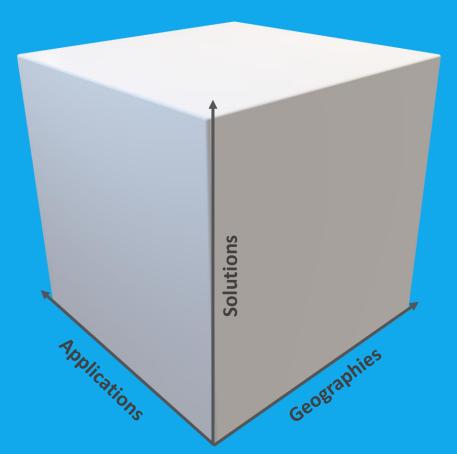

Manufacturing is the fastestgrowing area within Polymers

Long runway of opportunity with new technologies

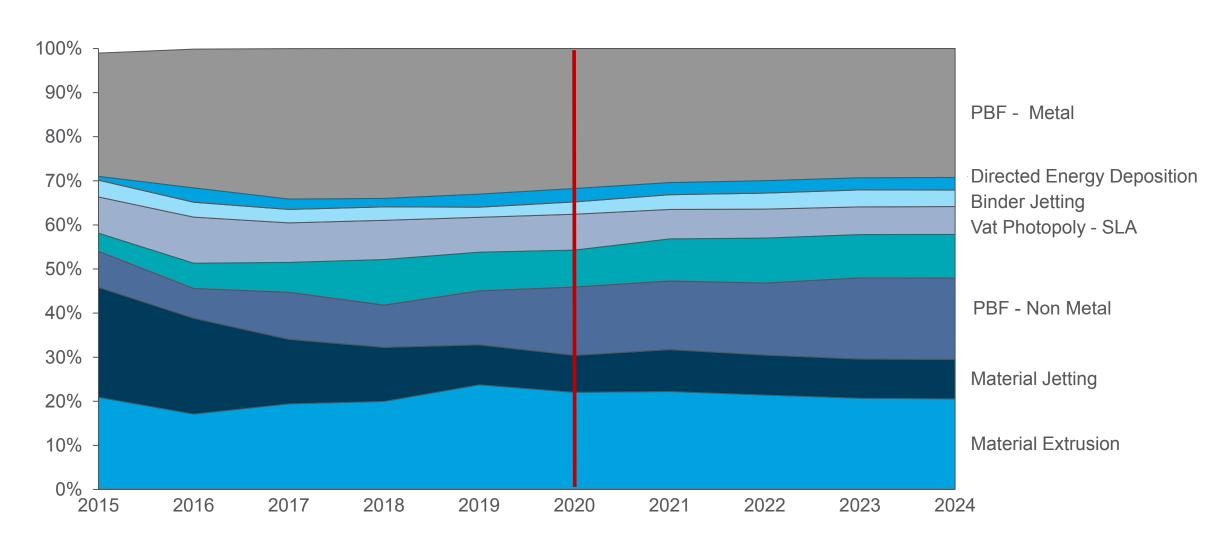

# Polymer leadership via the most comprehensive solutions across applications and geographies

**\$5 billion** global market in 2019 (not including parts sales)

# Expand our technologies to serve the growing applications for Polymer 3D Printing

#### **Total Addressable Market – 2019**

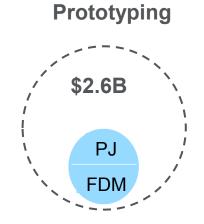

Hardware / Materials / Software / Services

# Stratasys serves approximately one third of 3D Printing hardware addressable market

Production applications growing faster than prototyping

FDM in aerospace shows what's possible with the right technologies

#### **Total Addressable Market – 2025**

Hardware / Materials / Software / Services

# To win, invest in the growth engines driving the future additive manufacturing market

#### **Leverage Global Core Competencies**

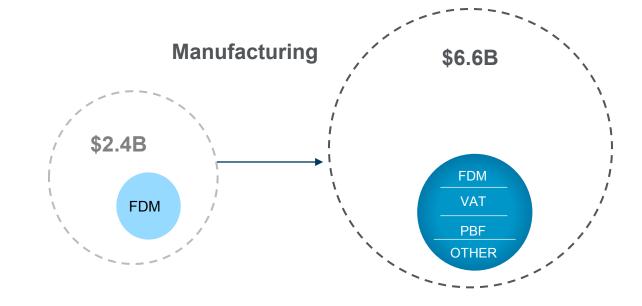

Comprehensive solutions

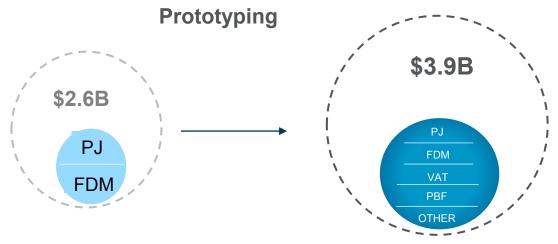

Go-to-market and service infrastructure

Polymer industry knowledge

#### More than double current total addressable market

#### Financial Update

Staying operationally efficient during COVID-19
Strong balance sheet / No debt

Make it Better.

Make it with Stratasys.

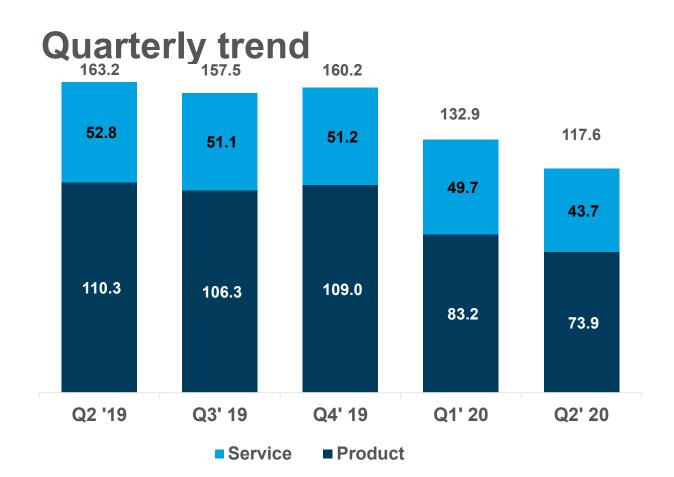

Lilach Payorski

#### **Financial Results**

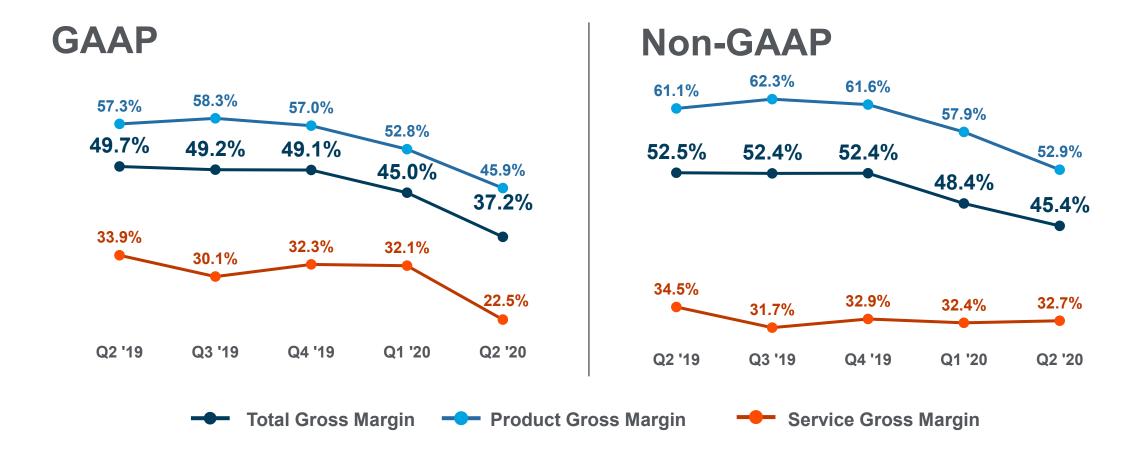

|   | GAAP  |        | Non-GAAP   |       |        |            |
|---|-------|--------|------------|-------|--------|------------|
