"The merger between Stratasys and Objet in 2012 created synergies that combined with the heightened level of mainstream media attention within our industry, have contributed to a period of extraordinary growth for our company and industry over the past two years," said David Reis, chief executive officer of Stratasys. "We believe our industry is transitioning through a period of slower growth, as users digest their investments in 3D printing and expand the utilization of recently acquired capacity. Despite these headwinds, and certain ongoing macroeconomic challenges in Asia, we are encouraged by sequential improvement

in areas of our business, and remain optimistic about our longer-term growth prospects.”

- Announced a multi-year collaboration with the Kangshua Group that includes providing up to 1,000 Solidscape high precision 3D printers to equip multiple new service bureaus and innovation centers in China; as well as the opening of a manufacturing facility, by Kangshua, to locally assemble Solidscape 3D printers for the Chinese market.
- Reorganized the MakerBot channel in Europe and Asia to help leverage the existing Stratasys go-to-market infrastructure within those regions.
- Completed a customer event for Stratasys Direct Manufacturing (SDM) that reached 239 customers and introduced the combined SDM organization as a total solution provider that focuses on applications from prototype to production.

“We are observing positive indicators and are beginning to see tangible results that reaffirm our strategy of developing targeted solutions within key market verticals,” continued Reis. “Short-term, we will continue to make adjustments to our expenses to align with current market conditions. Long-term, we remain committed to our growth initiatives that include enhancing vertical solution capabilities, expanding customer support services, accelerating product development, and growing the sales and marketing infrastructure – all of which are designed to drive future growth.”
