Redwood Trust Reports Second Quarter 2017 Results

MILL VALLEY, Calif., Aug. 3, 2017 /PRNewswire/ -- Redwood Trust, Inc. (NYSE:RWT) today reported net income for the second quarter of 2017 of \$36 million, or \$0.43 per fully diluted share. This compares with net income of \$37 million, or \$0.43 per fully diluted share, for the first quarter of 2017 and net income of \$41 million, or \$0.48 per fully diluted share, for the second quarter of 2016. Redwood also reported non-GAAP core earnings for the second quarter of 2017 of \$29 million, or \$0.35 per fully diluted share. This compares with non-GAAP core earnings of \$30 million, or \$0.36 per fully diluted share, for the first quarter of 2017.

A reconciliation of GAAP net income to non-GAAP core earnings, along with additional information about Redwood's core earnings measure, is included in the tables that follow. A further discussion of Redwood's business, financial results, core earnings (including discussion of management's change to the definition of core earnings) and taxable income, as well as a discussion of management's 2017 outlook, is included in the second quarter Redwood Review, which is available on the company's website at www.redwoodtrust.com.

Redwood also reported estimated REIT taxable income of \$19 million, or \$0.25 per share, for the second quarter of 2017. This compares to estimated REIT taxable income of \$17 million, or \$0.22 per share, for the first quarter of 2017 and estimated REIT taxable income of \$28 million, or \$0.36 per share, for the second quarter of 2016.

At June 30, 2017, Redwood reported GAAP book value per share of \$15.29, as compared with \$15.13 at March 31, 2017, and \$14.20 at June 30, 2016.

Non-GAAP core earnings per diluted common share ⁽⁶⁾	\$ 0.35	\$ 0.36

- (1) Certain totals may not foot due to rounding.
- (2) Core earnings is a non-GAAP measure of Redwood's earnings and results of operations. Specifically, management defines core earnings as: GAAP net income adjusted to (i) eliminate the impact of quarterly mark-to-market changes on the fair value of our long-term investments (and associated derivatives) related to changes in benchmark interest rates and credit spreads and (ii) include the hypothetical income taxes associated with core earnings adjustments. In addition, beginning with the second quarter of 2017, management has also included within core earnings the cumulative net gains or losses on long-term investments accounted for as trading securities under GAAP that were sold during the period presented, net of any gains or losses from derivatives associated with the investments sold.
- Management utilizes this core earnings measure internally as one way of analyzing Redwood's performance over multiple periods, as it believes it provides useful comparative results absent the impact of certain quarterly mark-to-market changes and other items that management believes are not reflective of core results. Core earnings should not be utilized in isolation, nor should it be considered as an alternative to GAAP net income or other measurements of results of operations computed in accordance with GAAP. A further discussion of core earnings, including additional discussion of the change to management's definition of core earnings, is included in the second quarter Redwood Review.
- (3) Adjustments eliminate the mark-to-market changes on the fair value of loans held-for-investment, trading securities, other investments, and associated derivatives that are primarily related to changes in benchmark interest rates and credit spreads. Details on the components of investment fair value changes, net, are included in the *Financial Insights* section of the second quarter Redwood Review.
- (4) Adjustment includes the cumulative net gains or losses on long-term investments accounted for as trading securities under GAAP that were sold during the period presented, net of any gains or losses from derivatives associated with the investments sold. Cumulative gains and losses are calculated by multiplying the difference between the sales price and original purchase price by the face value of the securities sold.
- (5) We apply estimated effective tax rates to core earnings adjustments occurring within Redwood's taxable REIT subsidiaries to estimate the hypothetical income tax expense or benefit associated with those adjustments.
- (6) Consistent with the calculation of net income per diluted common share for GAAP purposes, non-GAAP core earnings per diluted common share is calculated following the "two-class" method. Additional information on the calculation of core earnings using the "two-class" method can be found in Table 2 in the *Financial Tables* section of the *Appendix* to the second quarter Redwood Review.
