Media Advisory: Webcast Announcement

Novelis Fusion™ Technology Enables First Commercial Production of Multi-Alloy Aluminum Rolling Ingots

ATLANTA, June 13, 2006 - Novelis Inc. (NYSE: NVL) (TSX: NVL), the global leader in aluminum rolled products, today unveiled Novelis Fusion™ technology, a breakthrough process that simultaneously casts multiple alloy layers into a single aluminum rolling ingot. This marks the first time that any company has achieved the commercial production of multi-alloy aluminum ingots.

What:

Novelis Inc. is hosting a webcast to introduce the first major technological advance in decades of aluminum manufacturing.

Who:

Brian W. Sturgell, President and CEO, Novelis Inc.

Thomas W. Eagar, Sc.D., Professor of Materials Engineering,
Massachusetts Institute of Technology

When:

11:00 - 11:30 a.m. EDT, Tuesday, June 13
