As a winner of the Environmental Initiatives Award, Ameresco was

honored for the implementation of the United States Southeast's largest floating solar plant and Ameresco's first-ever floating solar photovoltaic (PV) system installation. Ameresco and Duke Energy worked together to implement a variety of energy efficiency upgrades, such as updated boilers, HVAC, lighting, and water conservation measures. In the first year alone, the project will result in utility cost savings of over \$2 million with a 7% reduction in site energy use and a 20% reduction of water use.

The SEAL Awards are an environmental advocacy organization that acknowledges companies worldwide that make measurable contributions to sustainability efforts and develop ground-breaking initiatives that positively impact the environment. The SEAL Environmental Initiatives Award honors companies specific environmental and sustainability initiatives over the course of 2023. The award is judged based on impact metrics, the unique innovation of the initiative and how best practices from the initiative can be used going forward.

"We are proud of our partnership and collaboration with the U.S. Army and Duke Energy in making Fort Bragg the Southeast's largest floating solar plant and marking Ameresco's first-ever floating PV system installation," said Nicole Bulgarino, Ameresco EVP and General Manager of Federal Solutions. "Ameresco is committed to providing our customers with renewable and energy efficiency solutions that are individualized to suit their most immediate needs. Thank you to The SEAL Awards for recognizing our efforts with Fort Bragg as a

prime example of meeting our customers' tailored sustainable endeavors."

The 2023 SEAL Business Sustainability Awards honors companies, organizations and people in four different categories, including Environmental Initiatives, Sustainable Product, Sustainable Service and Sustainable Innovation.
