

Creation Cost Methodology & Notes Applicable for 4Q 2022

February 22, 2023

This memo describes how Sunrun's Creation Cost and its components are calculated for 4Q 2022 using information reported in GAAP financial statements and footnotes plus operating and other data reported by the company.

Creation Cost

Creation Cost is equal to the per customer amounts described below for Installation plus Sales and Marketing plus General and Administrative less Platform Services Margin.

Installation (Blended, includes both Sunrun and Partner Built Systems)

Installation cost per customer is calculated based on installation costs, including both capitalized costs and expenses recognized in 'Cost of Customer Agreements and Incentives' in the period and are divided by the number of Subscriber Additions in the period. These costs exclude depreciation expense, costs associated with servicing the existing fleet of customers, and stock-based compensation expense.

Estimated fleet servicing costs over the full life of the customer agreement and estimated renewal period are already deducted from Subscriber Value and thus not included in Creation Costs. Installation cost excludes costs related to solar energy systems sold directly to customers for cash. The capitalized costs that are included and associated depreciation expense can be found in the notes to our consolidated financial statements and the applicable customer volume and estimated fleet servicing costs can be found in the calculation detail attached to this memo.

Sales and Marketing

Sales and marketing cost per customer is calculated based on (i) sales and marketing expenses incurred in the period and (ii) the increase in gross capitalized cost to obtain contracts. Sales and marketing expenses are adjusted to exclude certain non-cash items such as stock-based compensation expense, amortization of intangibles, and amortization of the capitalized cost to obtain customers. It also excludes certain items the company has deemed to be non-recurring. Expensed sales and marketing costs use total Customer Additions in the period to normalize these costs while capitalized costs are normalized by Subscriber Additions in the period.

General and Administrative

General and administrative cost per customer is calculated based on the general and administrative expenses incurred and are normalized by total Customer Additions in the period. It excludes certain non-cash items related to stock-based compensation expense and amortization of intangibles. It also excludes certain items the company has deemed to be non-recurring.

Platform Services Margin

Platform Services Margin per customer is the gross margin contribution from Sunrun's platform businesses including AEE, SnapNrack, and CEE plus gross margin earned on cash solar system sales. It excludes certain non-cash items related to stock-based compensation expense and is normalized by Customer Additions in the period.

Sunrun Creation Cost Supplemental Calculations

(\$000s, except per customer, per watt and Megawatt)

Note: figures may not sum due to rounding

Net Subscriber Value for 4Q22

	per customer	per watt
Subscriber Value, Contracted Period	\$ 41,985	\$ 5.84
Subscriber Value, Renewal Period	\$ 4,341	\$ 0.60
Subscriber Value	\$ 46,326	\$ 6.45
(-) Creation Cost	\$ (29,757)	\$ (4.13)
Net Subscriber Value	\$ 16 569	\$ 2 32

Creation Cost for 4Q22

	per customer	per watt
Installation	\$ 21,395	\$ 2.98
Sales & Marketing	\$ 8,507	\$ 1.17
General & Administrative	\$ 1,067	\$ 0.14
(-) Platform Services Margin	\$ (1,211)	\$ (0.16)
Creation Cost	\$ 29.757	\$ 4.13

The calculation of each component is summarized below:

General and administration

Stock-based compensation expense capitalized to solar energy systems
