

XOMA Highlights Recent Achievements and Reports Financial Results for First Quarter 2013

BERKELEY, Calif., May 8, 2013 (GLOBE NEWSWIRE) -- XOMA Corporation (Nasdaq:XOMA), a leader in the discovery and development of therapeutic antibodies, today reported its operational highlights and financial results for the quarter ended March 31, 2013.

- Announced encouraging interim results from gevokizumab Phase 2 study for moderate
 to severe acne vulgaris, the first indication in a program of three proof-of-concept
 ("POC") studies for gevokizumab. The data generated supports further development in
 this indication.
- Focused on advancing the gevokizumab Phase 3 EYEGUARD™ pivotal studies in non-infectious uveitis ("NIU").
- Advanced the second gevokizumab Phase 2 POC study in patients with erosive osteoarthritis of the hand ("EOA").
- Appointed Tom Klein as Vice President, Chief Commercial Officer, a newly created position.

XOMA reported total revenues of \$9.5 million in the first quarter of 2013, compared with \$9.9 million in the corresponding period of 2012. The small decrease in 2013 revenues was due primarily to a reduction in contract and other revenue associated with NIAID contracts. For the quarter ended March 31, 2013, XOMA had a net loss of \$24.9 million (or \$0.30 per share), compared with a net loss of \$30.4 million, or \$0.69 per share, for the quarter ended March 31, 2012. The net loss for the first quarters of 2013 and 2012 included a non-cash charge of \$12.8 million (or \$0.16 per share) and \$14.4 million (or \$0.33 per share), respectively, both of which were related to the revaluation of contingent warrant liabilities, which resulted primarily from the appreciation of XOMA's stock price. Excluding these non-cash charges, net loss in the first quarters of 2013 and 2012 was \$12.0 million (or \$0.15 per share) and \$16.0 million (or \$0.36 per share), respectively.

"We focused our first quarter activities on advancing the gevokizumab Phase 3 pivotal studies in patients with NIU and on executing our second gevokizumab proof-of-concept study in patients with erosive osteoarthritis of the hand. Based upon the enrollment in the EOA study, we anticipate receiving the top-line data around Labor Day," stated John Varian, Chief Executive Officer of XOMA. "In addition, we are very pleased with the initial results from our first gevokizumab Phase 2 POC study in patients with moderate to severe inflammatory acne which we announced early in the quarter. We believe the data establishes that IL-1 beta plays a role in moderate to severe inflammatory acne, and the feedback from key opinion leaders in dermatology supports further development. We look

forward to the results from our EOA study to inform our decision as to our next Phase 3 indication."

"The second highlight of our first quarter was attracting Tom Klein to join XOMA as our first Chief Commercial Officer," Mr. Varian continued. "We are in the position to begin planning for gevokizumab's future as a commercial product, and Tom's expertise in marketing pharmaceutical products to the specialist provider will be invaluable as we select our next Phase 3 indication and near the completion of our EYEGUARD program."

Research and development expenses for the first quarter of 2013 were \$16.6 million, compared with \$15.8 million in the corresponding period of 2012. General and administrative expenses were \$4.1 million in the first quarter of 2013, a 12 percent reduction from the \$4.7 million incurred in the first quarter of 2012. As a result of the company's streamlining activities announced in January 2012, XOMA recorded a charge of \$3.8 million during the first quarter of 2012.

On March 31, 2013, XOMA had cash, cash equivalents, and short-term investments of \$70.4 million. The Company ended December 31, 2012, with cash, cash equivalents, and short-term investments of \$85.3 million.

2013 Guidance

The company reconfirmed its anticipated cash used in ongoing operating activities during 2013 will be approximately \$50 million, primarily reflecting the costs associated with conducting the EYEGUARD-A, EYEGUARD-B and EYEGUARD-C Phase 3 clinical trials. This guidance initially was provided on March 12, 2013.

Investor Conference Call and Webcast

XOMA will host a conference call and webcast today, May 8, 2013, at 4:30 p.m. ET. The webcast can be accessed via the Investors section of XOMA's website at http://investors.xoma.com/events.cfm and will be available for replay until close of business on August 8, 2013.

Telephone numbers for the live audiocast are 877-369-6589 (U.S./Canada) and 408-337-0122 (international). A telephonic replay will be available beginning approximately two hours after the conclusion of the call until close of business on May 15, 2013. Telephone numbers for the replay are 855-859-2056 (U.S./Canada) and 404-537-3406 (international), passcode 42348170.

About Gevokizumab

Gevokizumab is a potent monoclonal antibody with unique allosteric modulating properties and the potential to treat patients with a wide variety of inflammatory and other diseases. Gevokizumab binds strongly to interleukin-1 beta (IL-1 beta), a pro-inflammatory cytokine that has been shown to be involved in non-infectious uveitis, including Behçet's uveitis, cardiovascular disease, and other auto-inflammatory diseases. By binding to IL-1 beta, gevokizumab inhibits the activation of the IL-1 receptor, thereby modulating the cellular signaling events that produce inflammation. Gevokizumab has been studied in over 500 patients, with approximately 300 patients on treatment for six months, and has been shown

to be well-tolerated. Information about gevokizumab clinical studies can be found at www.clinicaltrials.gov.

About XOMA

XOMA combines a portfolio of innovative therapeutic antibodies, both in late-stage clinical development and in preclinical research, with its recently launched commercial operations. XOMA focuses its antibody research and development on allosteric modulation, which offers opportunities for new classes of therapeutic antibodies to treat a wide range of human diseases. XOMA is developing its lead product gevokizumab (IL-1 beta modulating antibody) with Servier through a global Phase 3 program in non-infectious uveitis and ongoing proof-of-concept studies in other IL-1-mediated diseases. XOMA's scientific research also produced the XMet program, which consists of three classes of preclinical antibodies, including Selective Insulin Receptor Modulators (SIRMs) that could have a major effect on the treatment of diabetes.

More detailed information can be found at www.xoma.com.

Forward-Looking Statements

Certain statements contained in this press release including, but not limited to, statements related to anticipated timing of initiation and completion of clinical trials and proof-of-concept trials, anticipated size of clinical trials, continued sales of approved products, sufficiency of our cash resources and anticipated levels of cash utilization, or that otherwise relate to future periods are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements are based on assumptions that may not prove accurate, and actual results could differ materially from those anticipated due to certain risks inherent in the biotechnology industry and for companies engaged in the development of new products in a regulated market. Potential risks to XOMA meeting these expectations are described in more detail in XOMA's most recent filing on Form 10-K and in other SEC filings. Consider such risks carefully when considering XOMA's prospects. Any forward-looking statement in this press release represents XOMA's views only as of the date of this press release and should not be relied upon as representing its views as of any subsequent date. XOMA disclaims any obligation to update any forward-looking statement, except as required by applicable law.
