

Q3 2020 Financial Results

November 4, 2020

NASDAQ: KRMD

FORWARD-LOOKING STATEMENTS / NON-GAAP MEASURES

This presentation contains "forward-looking statements" within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as : "expect," "plan," "goals," "believe," "intend," "see," "could," "should," and similar references to future periods. Examples of forward-looking statements include, among others, statements we make regarding our long-term growth potential and sustainability, our strategic growth initiatives and long-term financial goals, issues expected with U.S. plasma supply, expected increase in IG supply, and the potential impact of COVID-19 in the market. Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based only on our current beliefs, expectations and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and trends, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict and many of which are outside of our control. Our actual results and financial condition may differ materially from those indicated in the forward-looking statements. Therefore, you should not rely on any of these forward-looking statements. Important factors that could cause our actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, the following: impact of COVID-19; introduction of competitive products; availability of insurance reimbursement; changes in U.S. Food and Drug Administration regulations; changes to health care policies; success of our research and development efforts; our ability to raise capital if or when needed; acceptance of and demand for new and existing products; expanded market acceptance of the FREEDOM Syringe Infusion System; our ability to obtain required governmental approvals; success in enforcing and obtaining patents; continued performance by principal suppliers; continued customer preference to work through distributors; continued service of key personnel and attracting and maintaining new personnel; and general economic and business conditions. Any forward-looking statement made by us is based only on information currently available to us and speaks only as of the date on which it is made. We undertake no obligation to publicly update any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.

Non-GAAP Adjusted EBITDA

Adjusted EBITDA excludes from net income / (loss): income tax expense, depreciation and amortization, interest income, net, reorganization charges, discontinued product expense, litigation expenses including stock-based settlement expense, manufacturing initiative expenses, and stock option expense

Non-GAAP Measures

This presentation includes the non-GAAP financial measure of "Adjusted EBITDA" that is not in accordance with, nor an alternate to, generally accepted accounting principles and may be different from non-GAAP measures used by other companies. In addition, this non-GAAP measure is not based on any comprehensive set of accounting rules or principles. Non-GAAP financial measures should not be considered a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP. They are limited in value because they exclude charges that have a material effect on our reported results and, therefore, should not be relied upon as the sole financial measures to evaluate our financial results. The non-GAAP financial measure is meant to supplement, and to be viewed in conjunction with, GAAP financial results. A reconciliation of our non-GAAP measure is included in an attachment to this press release.

Q3 2020 FINANCIAL SUMMARY (\$ in MMs)

Less clinical trial activity

Increased allowances

\$1.0 M (net) early distributor order

Q3 2019 included two unusually large orders

65% gross margin; profitable operations

Strong balance sheet at 9/30/2020

Net Sales

Gross Profit / Margin

Net Income

Adjusted EBITDA *

*Adjusted EBITDA excludes from net income / (loss): income tax expense, depreciation and amortization, interest income, net, discontinued product expense, litigation expenses including stock-based settlement expense, manufacturing initiative expenses, and stock option expense

2020 NINE MONTH NET SALES (\$ in MMs)

- Stacey, CIDP Patient

Core Business

PIDD & CIDP Patients

Chronic patient population
Treatment necessary regardless of macro-disruptions
Large addressable market
High recurring revenue component

Other Growth Drivers

Clinical Trials

Geographic Expansion

Expanded Drug Indications

Potential to significantly expand Total Addressable Market
Inconsistent quarterly contribution
Q3 2020 COVID-19 impact

STRATEGIC GROWTH INITIATIVE:
COMPLETED PHASE III HEMATOLOGY CLINICAL TRIAL USING FREEDOM SYSTEM

Paroxysmal Nocturnal Hemoglobinuria (PNH)
15,000 Patients Worldwide Afflicted with PNH

Source: <https://twitter.com/alexionpharma/status/1082966719524732928?lang=da>

This new PNH drug is advancing towards its planned 2021 U.S. / global launch

KRMD believes that its Freedom System will be used in several additional upcoming clinical trials focused on expanding indications and disease states for this same drug.

PLASMA OUTLOOK

CSL Behring

Plasma collection issues persist, but supply has been steadily improving.

COVID restrictions are expected to restrain ability to collect plasma and add to the overall cost of collection; CSL has multiple initiatives underway to mitigate the impact.

Added 40 U.S. collection centers in FY 20 for a total of 261; 277 centers globally.

CSL: <https://wcsecure.weblink.com.au/pdf/CSL/02293494.pdf>

GRIFOLS

Plasma collection impacted due to stay at home orders, but trends improving.

Expects full plasma volumes to recover in 2021, with an estimated increase in plasma volumes of ~ 30% in 2021.

Recent plasma-related investments and acquisitions reinforce commitment to growth in this area.

XEMBIFY® launch hampered by pandemic; EU approval expected in 2021. ⁽¹⁾

Grifols: <https://intranet.grifols.com/documents/38081080/1024371201/np-20200914-en.pdf/6c1934e4-c8e8-4cd9-9324-8c1b6f718a3c>

(1) Craig-Hallum research October 22, 2020

132 centers in the U.S.

On track to increase plasma supply and manufacturing capacity by 65%+ by 2024

COVID dynamics may shift timing of plasma supply growth, but overall targets remain unchanged
