Morningstar Investment Services Selects Fiserv Technology for Managed Account Platform

Fiserv technology will enhance the Morningstar Investment Services platform with robust new trade management, reporting and investment management capabilities

BROOKFIELD, Wis.--(BUSINESS WIRE)-- [Fiserv](#), Inc. (NASDAQ: FISV), a leading global provider of financial services technology solutions, announced today that Morningstar Investment Services has selected its managed account technology to support Morningstar Managed PortfoliosSM, a fee-based discretionary investment management program offered exclusively through registered investment advisors.

The managed account technology from Fiserv is designed to enhance trade management, enable more robust portfolio accounting and performance reporting, and broaden the range of custodians through which Morningstar Investment Services can submit trades. Morningstar Investment Services chose Fiserv as the platform to enable them to add unified managed account (UMA) and rep as portfolio manager (RPM) capabilities in the future. The UMA functionality will allow advisors to combine a broad range of investment types into a single client portfolio, streamlining trading, reporting and research. The RPM technology will allow advisors to manage client accounts more nimbly to implement tactical decisions quickly and easily.

"The exceptional scalability and functionality of the managed account technology from Fiserv will make it easier for financial advisors to offer their clients investment solutions tailored to their evolving financial needs," said Jeffrey Ptak, President and Chief Investment Officer, Morningstar Investment Services. "Fiserv's depth and breadth of expertise in the managed accounts space was a critical component of our decision to work with the firm to further enhance our platform."

"For Morningstar, a company that is deeply respected for developing its own innovative technology solutions, to choose our managed account technology is truly an honor," said Cheryl Nash, president of Investment Services at Fiserv. "Working with forward-thinking companies such as Morningstar helps us create more innovative products to benefit the entire financial advice industry."

With close to 4 million accounts on its managed account platform, Fiserv is the leading technology provider, helping clients navigate highly complex operational challenges and improve performance and profitability. The managed account technology from Fiserv allows program sponsors to offer their clients a wide variety of investment options within a single, unified platform and provide the necessary tools for successful overlay management.
