Cummins Releases New Models in the Gas Spark-Ignited Generator Set Range

FRIDLEY, Minn.--(BUSINESS WIRE)-- Cummins, Inc. (NYSE: CMI) announced the new C125N6 and C150N6 models in the QSL8.9G Series. The Cummins commercial generator set is a fully integrated power generation system providing optimum performance, reliability, and versatility for stationary standby power applications.

The rugged, gas powered 4-cycle Cummins QSJ8.9G spark-ignited engine delivers reliable power. The electronic air/fuel ratio control provides optimum engine performance and fast response to load changes. There are several other items that should be noted from this product. The Alternator has a starting capability, low reactance 2/3 pitch winding, low waveform distortion with non-linear loads, and fault clearing short-circuit capability. The control system is PowerCommand™ 2.3 as standard equipment and provides total generator set system integration. The cooling system provides reliable operation at up to 50 degrees Celsius ambient temperature. The enclosures are aesthetically appealing and incorporate a special design that delivers a very quiet generator.
