FORM SD SPECIALIZED DISCLOSURE REPORT CONFLICT MINERALS

TTM TECHNOLOGIES, INC.

(Exact name of the registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization) 0-31285 (Commission File Number) 91-1033443 (IRS Employer Identification No.)

200 East Sandpointe, Suite 400 Santa Ana, California (Address of principal executive offices)

92707 (Zip code)

Daniel J. Weber
(314) 746-2087
(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1, 2022 to December 31, 2022.

Section 1. Conflict Minerals Disclosure

(c) Conflict Minerals Report

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and the instructions to Form SD, TTM Technologies, Inc. (the "Company") is filing with this Form SD a Conflict Minerals Report, which is attached hereto as Exhibit 1.01 and incorporated herein by reference.

The Company's Statement on its Conflict Minerals Policy and this Form SD, including the Company's Conflict Minerals Report, are available on the Company's website at https://investors.ttm.com/corporate-governance/highlights. The content of our website as referred to in this Form SD and Conflict Minerals Report is included for general information only and is not incorporated by reference herein.

Item 1.02 Exhibit

The Conflict Minerals Report required by Item 1.01 is filed as Exhibit 1.01 to this Form SD.

Section 3. Exhibits
Item 3.01 Exhibits

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form SD.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

TTM TECHNOLOGIES, INC.

By: /s/ Daniel J. Weber

Name: Daniel J. Weber

Title: Executive Vice President, General Counsel and

Secretary

May 18, 2023

For the Year Ended December 31, 2022

This is the Conflict Minerals Report of TTM Technologies, Inc. (the "Company" or "TTM") for the calendar year 2022 (ended December 31, 2022) in accordance with Rule 13p-1 ("Rule 13p-1") under the Securities Exchange Act of 1934 (the "1934 Act"), and the instructions to Form SD. Please refer to Rule 13p-1, Form SD and the 1934 Act Release No. 34-67716 for definitions to the terms used in this Conflict Minerals Report, unless otherwise defined herein.

Rule 13p-1 and Form SD require the disclosure of certain information if a company manufactures or contracts to manufacture products for which certain "Conflict Minerals" (as defined below) are present in the products and necessary to the functionality of such products. Form SD defines "Conflict Minerals" as: (i)(a) columbite-tantalite (or coltan, the metal ore from which tantalum is extracted), (b) cassiterite (the metal ore from which tin is extracted), (c) gold and (d) wolframite (the metal ore from which tungsten is extracted), or their derivatives, which are currently limited to tantalum, tin and tungsten; or (ii) any other mineral or its derivatives determined by the U.S. Secretary of State to be financing conflict in the Democratic Republic of the Congo ("DRC") or an adjoining country (collectively, the "Covered Countries").

(1) Product Description

TTM is a leading global manufacturer of technology solutions, including engineered systems, radio frequency ("RF") components and RF microwave/microelectronic assemblies, and printed circuit boards ("PCB"). The Company provides time-to-market and volume production of advanced technology products and offers a one-stop design, engineering and manufacturing solution to customers.

TTM's Conflict Minerals information is reported under two categories. "PCB" includes all unpopulated "bare board" printed circuit board products. All other products manufactured by TTM are referred to as "Non-PCB".

As a company whose business is electronics manufacturing and assembly, TTM is several levels removed from the actual mining and refining of Conflict Minerals. TTM does not purchase raw ore or unrefined Conflict Minerals and makes no direct purchases in the Covered Countries.

Our customers, who may also have a responsibility to conduct due diligence as to the source of Conflict Minerals used in their products, frequently determine the exact materials and components we are required to use, and in many cases specify the suppliers from which we are required to source these minerals and components. As a result, we are limited in our ability to exercise discretion in sourcing certain materials and components. Similarly, our ability to influence the supply chain practices of suppliers selected by our customers is limited. Thus, our ability to change the sourcing of our Conflict Minerals depends on our customers' selections of suppliers and designs.

(2) <u>Due Diligence in Accordance with the Organization for Economic Cooperation and Development (the "OECD") 5-Step Framework</u>

TTM has processes in place for the purpose of exercising due diligence over its supply chain as it relates to minerals from conflict-affected and high-risk areas. The design of the due diligence processes conforms substantially to the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and the related supplements for gold, tin, tantalum, and tungsten (the "OECD Guidance") as it relates to "downstream" purchasers of products and components. The due diligence processes have been described below under sub-headings corresponding to the five-step framework of the OECD Guidance.

Step 1 – Establish and Maintain Strong Company Management Systems

1.1 TTM has adopted a Conflict Minerals Policy and Statement (the "Policy"). A copy of the Policy, together with a copy of this Form SD and Conflict Minerals Report, can be found on the Company's website at: https://investors.ttm.com/corporate-governance/governance-documents. The content of our website as referred to in this Form SD and Conflict Minerals Report is included for general information only and is not incorporated by reference herein. In accordance with the Policy, TTM is continuing to review its suppliers' declarations and has sought their cooperation and assistance in ensuring that the Conflict Minerals used in TTM products are sourced reliably and responsibly. However, as noted in the Policy and above, TTM's purchasing decisions are limited by the level of cooperation it receives from suppliers in sourcing responsibly from non-conflict areas.

Exhibit 1.01 - Page 1

- 1.2 TTM has a Conflict Minerals Steering Committee to review and enhance the cross-functional working group (the "Working Group") tasked with developing policies and procedures consistent with the OECD Guidance.
- 1.3 In accordance with the requirements of Rule 13p-1 and the instructions to Form SD, the Working Group annually reviews the Company's products, almost all of which are manufactured to customer specifications, to determine if they contain Conflict Minerals necessary to the products' generally expected functions, use, purpose, or production.
- 1.4 The Working Group concluded that the bare PCBs may contain gold or tin in surface finishes, and the Non-PCB products manufactured in 2022 may contain any of the four Conflict Minerals in components.

Step 2 - Identify and Assess Risks in the Supply Chain

- 2.1 The Working Group has identified the suppliers of the materials and components that contain Conflict Minerals in TTM's products and conducted a supply-chain survey to obtain source smelter identification from its suppliers of Conflict Minerals using the standard conflict minerals reporting template ("CMRT") published by the Responsible Minerals Initiative ("RMI") (formerly the Conflict Free Sourcing Initiative).
- 2.2 The CMRT was distributed to all identified suppliers of components or materials containing Conflict Minerals to determine the country of origin of the Conflict Minerals contained therein, and whether such Conflict Minerals were sourced from recycled or scrap materials. The CMRT requested information on Conflict Minerals in components or materials supplied to TTM for products manufactured during calendar year 2022 and contained representations as to the source and origin of the necessary Conflict Minerals contained in the relevant products.
- 2.3 In addition to identifying suppliers of Conflict Minerals to the Company and collecting supply-chain smelter information, TTM's diligence measures included requesting suppliers to declare if any Conflict Minerals contained in their products originated in the Covered Countries.
- 2.4 The Company believes that complete information was received from all identified suppliers to its PCB products. However, many suppliers to TTM's much smaller Non-PCB businesses reported that their supply chain information was incomplete. TTM continues to seek complete and accurate information from its Conflict Minerals supply chain sources from relevant suppliers.
- 2.5 The Company renewed its membership in the RMI to retain its timely access to global Conflict Minerals smelter information.
- 2.6 Smelters and refiners identified in the supply-chain survey were checked against RMI-provided smelter information to confirm the status of their Conflict Minerals related sourcing activities.

Step 3 – Design and Implement a Strategy to Respond to Identified Risks

- 3.1 Changes to the status of the identified TTM PCB supply chain smelters were monitored regularly. All identified PCB sourcing concerns were addressed through outreach to the relevant members of TTM's supply chain. TTM suppliers who identified "high risk" (based on OECD Due Diligence Guidance) smelters in their supply chains were asked to continue to perform due diligence to confirm this information or work to remove the smelters from their supply chain.
- 3.2 The status of the identified Non-PCB supply chain smelters was updated at the end of 2022.
- 3.3 After reviewing supply chain and other identified publicly available information, the Company believes that some portion of the tantalum, tin, tungsten, and gold in our supply chain may have been mined in Covered Countries. Grouped by metal, the following is our best estimate of the smelter and smelter location, that may have contributed Conflict Minerals from Covered Countries to our supply chain for products manufactured during the 2022 calendar year:

Tungsten Although we do not have complete source-smelter information from a number of our suppliers, we obtained no affirmative information indicating that any of the Conflict Minerals from the smelters listed above financed or benefited armed groups that operate in the Covered Countries.

China

- TTM, along with other companies, served as a signatory on letters delivered to known smelters. Smelters which were currently conformant to the Responsible Minerals Assurance Process ("RMAP") were thanked for their support of responsible sourcing practices. Those which had not been audited were requested to engage with an industry-recognized responsible sourcing program.
- As noted above, the Company's supply chain survey did not yield complete source-smelter information from a number of customer-specified suppliers of Conflict Minerals for TTM's Non-PCB products. The Company is continuing its efforts to work with such suppliers to ensure complete information is provided to the Company, including the country of origin of the relevant Conflict Minerals and the identity of the source smelters used to process the minerals. As additional information is obtained, the Company will undertake to determine whether such smelters have been listed by RMI as compliant with the RMAP or otherwise. In connection with such continuing diligence, the Company intends to continue education of and outreach to its suppliers as needed.

Step 4 - Carry Out Independent Third Party Audit ("IPSA") of Smelter/Refiner's Due Diligence Practices

TTM supports the RMI RMAP as well as the development and implementation of due diligence practices and tools such as the CMRT. TTM analyzed the data received on smelters and refiners and compared such information against the list of facilities that were designated as "Conformant" by the RMI. However, due to the structure of the Company's supply chain as noted in the Policy and above, there are generally multiple tiers of suppliers between TTM and the smelters and refiners in the supply chain, and TTM does not purchase raw ore or unrefined Conflict Minerals or make any direct purchases in the Covered Countries. Therefore, as contemplated by the OECD Guidance for "downstream" companies, TTM has not performed its own audits of smelters or refiners. TTM will obtain an IPSA as and when required by Rule 13p-1 and Form SD.

Step 5 – Report Annually on Supply Chain Due Diligence

5.1 TTM submitted its Form SD with Exhibit 1.01 to the SEC and posted the same to TTM's external website for each prior reporting period. The most recent prior reporting period ended December 31, 2021 and the relevant Form SD was submitted to the SEC and posted on TTM's external web site on May 24, 2022.

(3) Products

The Company has identified the following products that may contain Conflict Minerals necessary to the functionality or production of products manufactured, or contracted to manufacture:

As noted in section (1) above, TTM products are the following:

- 1. Bare PCBs fabricated to customer specifications, including procurement of heat sinks and their attachments, where applicable;
- 2. Non-PCB products including RF/microwave products manufactured in accordance with TTM designs, products manufactured at RF/microwave manufacturing facilities that were fabricated to customer design and material specifications, printed circuit assemblies assembled to customer specified bills of materials using customer-controlled components from customer approved vendor lists, and any other products assembled to customer design and using customer specified suppliers.

Appendix I contains a listing of smelters provided by TTM's PCB supply chain for products manufactured during the 2022 calendar year. Though all suppliers to TTM's PCB supply chain submitted a CMRT, some suppliers did indicate the use of smelters who are not RMAP Conformant. TTM will continue to perform due diligence to confirm this information or work to remove the smelters from our supply chain.

Appendix II is a listing of smelters reported by the Company's Non-PCB supply chain for products manufactured during the 2022 calendar year. The supply chain data quality associated with these parts appears to be significantly less robust. Some smelters names provided may not be actual smelters and some names provided are recognized as not currently participating in any internationally recognized RMAP. TTM will continue to encourage customers to choose known RMAP Conformant sources as opportunities allow.

(4) Summary

TTM's reasonable country of origin inquiry is based on third party audit information and, to the extent that audited information is not available, it draws on additional information that TTM and others have collected. To the extent reasonably possible, TTM has documented the country of origin of identified smelters and refiners based on information from the RMI, surveys of smelters and refiners, and/or third party reviews of publicly available information. However, some country of origin information has not been audited by a third party because, among other reasons, applicable smelters and refiners have gone out of operation before completing a third party audit, smelters and refiners have not gone through a third party audit, or the third party audit does not yet include reporting of country of origin information. Based on the information provided by TTM's suppliers, smelters, and refiners, as well as from the RMI and other sources, TTM believes that the Conflict Minerals contained in its products were processed in the countries listed in the Appendices below and has indicated where the smelters have previously been audited by RMI and found to be sourcing conflict free or are working with RMI to be audited in the future.

TTM's customers, who may also have a responsibility to conduct due diligence as to the source of Conflict Minerals used in their products, frequently determine the exact materials, components, and suppliers we use, which limits our ability to exercise discretion in sourcing certain materials and components, and our ability to influence the supply chain practices of suppliers. Accordingly, the Company's success in making determinations about the potential presence of Conflict Minerals in its products depends upon various factors including, but not limited to, (i) the respective due diligence efforts of its suppliers and their supply chain; (ii) such suppliers' respective willingness, whether public or private entities, to disclose such information to the Company; and (iii) the ability of the involved entities to make their determinations in accordance with nationally or internationally recognized standards, including the Guidance provided by the OECD. The failure to obtain reliable information from any level of TTM's supply chain could have a material impact on the Company's future ability to report on the presence of Conflict Minerals with any degree of certainty. There can be no assurance that the Company's suppliers will continue to cooperate with diligence inquiries and requests for certifications or provide documentation or other evidence that TTM considers reliable or in a time frame sufficient to allow the Company to make its own assessment following appropriate further diligence measures, if any.

Appendix I

Conflict Minerals Sources to PCB Global Operations 2022

Appendix II

Conflict Minerals Sources to Non-PCB Global Operations 2022
