

# Citi Global Property CEO Conference

March 12-13, 2012

# Forward-Looking Statements

The statements in this presentation that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are based on current expectations, estimates and projections about the industry and markets in which Prologis operates, management's beliefs and assumptions made by management. Such statements involve uncertainties that could significantly impact Prologis' financial results. Words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates," variations of such words and similar expressions are intended to identify such forward-looking statements, which generally are not historical in nature. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future — including statements relating to rent and occupancy growth, development activity and changes in sales or contribution volume of developed properties, disposition activity, general conditions in the geographic areas where we operate, synergies to be realized from our recent merger transaction, our debt and financial position, our ability to form new property funds and the availability of capital in existing or new property funds — are forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Although we believe the expectations reflected in any forward-looking statements are based on reasonable assumptions, we can give no assurance that our expectations will be attained and therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. Some of the factors that may affect outcomes and results include, but are not limited to: (i) national, international, regional and local economic climates, (ii) changes in financial markets, interest rates and foreign currency exchange rates, (iii) increased or unanticipated competition for our properties, (iv) risks associated with acquisitions, dispositions and development of properties, (v) maintenance of real estate investment trust ("REIT") status and tax structuring, (vi) availability of financing and capital, the levels of debt that we maintain and our credit ratings, (vii) risks related to our investments in our co-investment ventures and funds, including our ability to establish new co-investment ventures and funds, (viii) risks of doing business internationally, including currency risks, (ix) environmental uncertainties, including risks of natural disasters, and (x) those additional factors discussed in reports filed with the Securities and Exchange Commission by Prologis under the heading "Risk Factors." Prologis undertakes no duty to update any forward-looking statements appearing in this presentation.

# CONTENTS

# Prologis Overview

## World Class Platform

- Deep global presence with AUM of ~\$43 billion across ~600 msf (55.7 msm) in 22 countries on four continents
- Broad, diverse, multi-national customer base that results in repeat business
- Breadth and depth of team is unparalleled in the real estate industry

## Differentiated Strategy

- Global operating company with a distinct advantage over capital allocators and local developers
- Invest in distribution and logistics facilities vital to global and regional supply chains
- Local market knowledge, development expertise and commitment to sustainable design

## Vibrant Private Capital Franchise

- Focused exclusively on high-quality global and regional industrial logistics markets
- AUM of ~\$25 billion in 20 co-investment ventures and funds<sup>(1)</sup>
- ~\$2 billion of deployment capacity across three continents

## Financial Strength

- Committed to building one of the top three balance sheets in the REIT industry
- Debt maturities well-laddered, geographically diverse and in manageable tranches
- Continued access to debt capital markets through established lender relationships

Note: Data as of December 31, 2011.

1) Includes Prologis North American Industrial Fund II (NA2). Subsequent to quarter end, Prologis purchased its partner's share and consolidated NA2.

# Prologis' Investment Focus

## GLOBAL MARKETS – 83% of NOI<sup>(1)</sup>

- Typically in markets that are served by a major seaport and/or international airport
- Targeted development opportunities, increased capital deployment
- Operating Portfolio – 424 msf / 39 msm  
(285 msf / 27 msm)<sup>(1)</sup>

## REGIONAL MARKETS – 12% of NOI<sup>(1)</sup>

- Local and regional distribution, not storage optimization
- Selectively disposing, acquiring and developing
- Operating Portfolio – 87 msf / 8 msm  
(57 msf / 5 msm)<sup>(1)</sup>

## OTHER MARKETS – 5% of NOI<sup>(1)</sup>

- Exit over time
- Operating Portfolio – 47 msf / 4 msm  
(25 msf / 2 msm)<sup>(1)</sup>

Note: Data as of December 31, 2011.

1) Data represents Prologis' share from Real Estate Operations.

# Prologis Business Lines<sup>(1)</sup>

## OPERATIONS

### Collect Rent

- Stable income stream
- Global presence/local market expertise
- Diversified global customer base

- \$2.6B of annualized NOI (\$1.7B Prologis' share)
- 597 msf (388 msf Prologis' share) / 22 countries / 4 continents
- 4,500 customers

## PRIVATE CAPITAL

### Generate Fees

- Recurring annuity stream diversified by geography and capital source
- Expands global operating platform: less Prologis capital; lower currency exposure
- New ventures will be seeded with Prologis assets

- \$161M annualized private capital revenue<sup>(2)</sup>
- \$24.7B of AUM (\$8.7B Prologis' share)

## DEVELOPMENT

### Create Value

- Various demand drivers exist across all business cycles
- Established customer relationships drive BTS opportunities
- Existing land bank represents an asset as markets recover

- \$1.4B under development (\$1.2B Prologis' share)
- Expected value creation \$278M (\$238M Prologis' share)<sup>(2)</sup>

## Future Growth Drivers

- Rent recoveries, to align with replacement costs, and occupancy gains
- Long-term growth from annual contractual rent increases

- Increased revenues from incremental AUM
- Significant promote opportunities from recovery

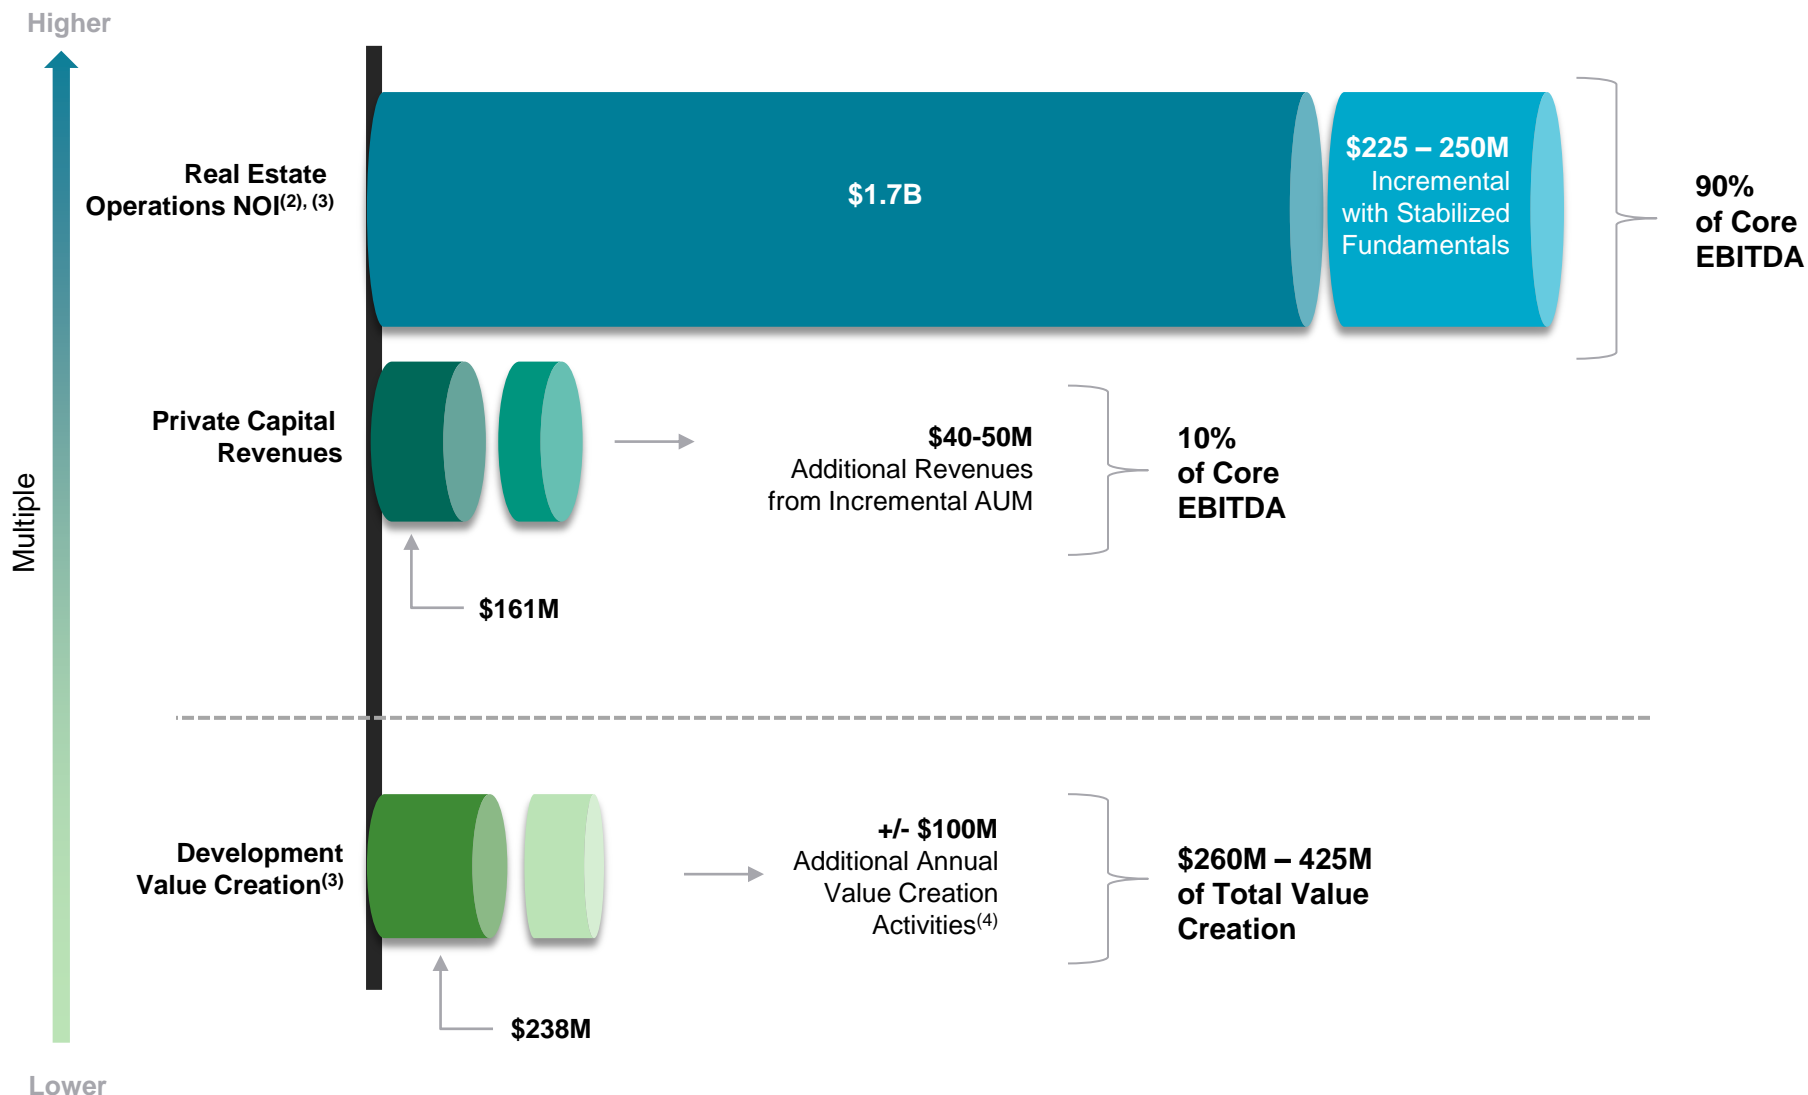

- BTS activity in U.S. and Europe
- Speculative development in Asia and emerging markets

1) Data as of December 31, 2011.

2) Excludes promotes and development fees.

# Prologis' Annualized Income<sup>(1)</sup>

1) Represents a static portfolio, as of December 31, 2011, which excludes any effects from future acquisitions, dispositions, contributions and debt retirement.

2) Net Operating Income ("NOI") represents rental income less rental expenses.

3) Represents Prologis' share.

4) Includes development, land bank monetization and value creation activities.

# Operating Fundamentals

## Operating Portfolio – Period Ending Occupancy

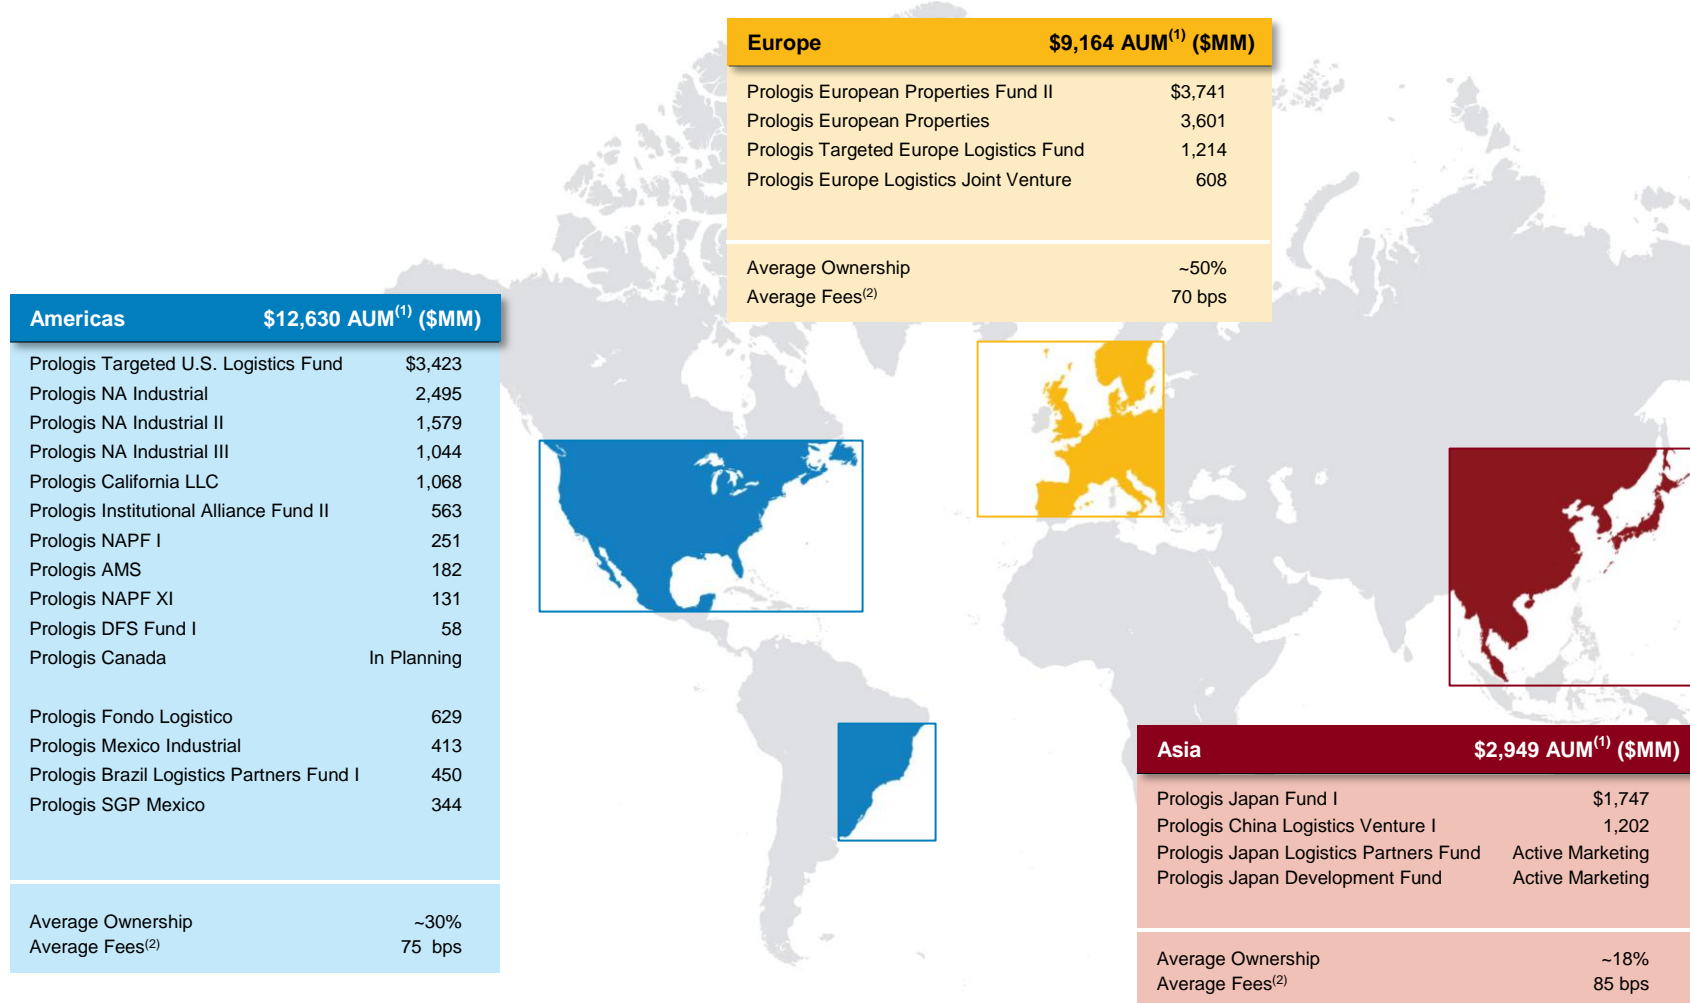

## Leasing Activity

Note: Data as of December 31, 2011.

# Global Private Capital Platform — \$24.7 billion AUM

**Infinite life ventures represent 64% of AUM and generate \$95 million in on-going, annual revenue <sup>(3)</sup>**

Notes: Prologis NA Industrial II rationalized in Q1 2012. Prologis California LLC, Prologis NAPF I and Prologis NAPF XI are all expected to be rationalized in 2012.

1) AUM is based on fair market value of private capital co-investment ventures and estimated investment capacity as of December 31, 2011.

2) Represents total fees generated as a percentage of AUM.

3) AUM represents all co-investment ventures regardless of consolidation. On-going fee revenue relates only to unconsolidated ventures.

# Development Overview

## Value Creation

|                       | Future Range <sup>(1)</sup> |        |
|-----------------------|-----------------------------|--------|
| Development Volume    | \$2.0B                      | \$2.5B |
| Overhead Absorption   | 4%                          | 4%     |
| Expected Margin       | 15%                         | 20%    |
| Average PLD Ownership | 60%                         | 65%    |
| Annual Value Creation | \$260M                      | \$425M |

## Development Starts

- PLD Share of Development
- 3rd Party Share of Development

- Removing risk by utilizing private capital to fund development
- Scale of global development business positions us well for future growth

## Land Portfolio

- Land
- 3rd Party Share of Land

- Expect to significantly monetize land bank through development and third party sales

1) Excludes promotes and development fees.

2) Original land basis of \$3.0B.

1) Annual company guidance provided on February 8, 2012.

2) Same Store NOI is on GAAP basis.

# Key Takeaways

- Leasing activity remains solid across all of our major regions
- Balance sheet management and delevering are above plan through robust dispositions and contributions
- Committed to building one of the top three balance sheets in the REIT industry
- Compelling investment opportunity as stock trades below net asset value
- Additional earnings potential from value creation activities, new private capital ventures and stabilized fundamentals

## Appendix

# Industrial Real Estate Demand Drivers

- Brazil, China and Mexico are supported by rising per capita income and growth in domestic consumption
- Changes in supply chain networks from local to regional are spurred by Pan-European network
- Japan driven by obsolescence (service-based economy), growth of third-party logistics industry, supply chain reconfiguration and flight to quality
- U.S. fueled by the rebuilding of inventories which are now below where the economy and consumption warrant

Note: Size of country/region depicts GDP relative to purchase power parity.

# U.S. Leading Indicators

Peak-Trough-Current<sup>(1)</sup>

## Leading Indicators Forecast

### 2012 Forecast<sup>(2)</sup>

|                        |      |
|------------------------|------|
| Industrial Production  | 2.4% |
| GDP                    | 1.9% |
| Consumption            | 1.8% |
| Inventories            | 3.0% |
| Net Absorption / Stock | 1.3% |
| Trade                  | 5.0% |

1) Prologis Research, Bureau of Economic Analysis; National Income and Product Accounts, Federal Reserve Board U.S. only from Consensus Economics Inc., except trade which is a global forecast from World Bank.

# Global Trade Relative to Global GDP

**Global trade has outpaced global GDP by 3.5X over the past 49 years<sup>(2)</sup>**

- 1) Reflects annual compounded growth from 1960-2010.
- 2) World Bank and International Monetary Fund – 2011.

# Long-Term Relationship Between Global Trade & GDP

# Real Inventory-to-Sales

**Inventories at unprecedented lows, economic recovery will drive a substantial restocking of the supply chain**

Source: U.S. Bureau of Economic Analysis.

# Reporting Definitions

Please refer to our annual and quarterly financial statements filed with the Securities and Exchange Commission on Forms 10-K and 10-Q and other public reports for further information about us and our business.

**FFO; FFO, as defined by Prologis; Core FFO (collectively referred to as "FFO").** FFO is a non-GAAP measure that is commonly used in the real estate industry. The most directly comparable GAAP measure to FFO is net earnings. Although the National Association of Real Estate Investment Trusts ("NAREIT") has published a definition of FFO, modifications to the NAREIT calculation of FFO are common among REITs, as companies seek to provide financial measures that meaningfully reflect their business.

FFO is not meant to represent a comprehensive system of financial reporting and does not present, nor do we intend it to present, a complete picture of our financial condition and operating performance. We believe net earnings computed under GAAP remains the primary measure of performance and that FFO is only meaningful when it is used in conjunction with net earnings computed under GAAP. Further, we believe our consolidated financial statements, prepared in accordance with GAAP, provide the most meaningful picture of our financial condition and our operating performance.

NAREIT's FFO measure adjusts net earnings computed under GAAP to exclude historical cost depreciation and gains and losses from the sales of previously depreciated properties. We agree that these two NAREIT adjustments are useful to investors for the following reasons:

- I. historical cost accounting for real estate assets in accordance with GAAP assumes, through depreciation charges, that the value of real estate assets diminishes predictably over time. NAREIT stated in its White Paper on FFO "since real estate asset values have historically risen or fallen with market conditions, many industry investors have considered presentations of operating results for real estate companies that use historical cost accounting to be insufficient by themselves." Consequently, NAREIT's definition of FFO reflects the fact that real estate, as an asset class, generally appreciates over time and depreciation charges required by GAAP do not reflect the underlying economic realities.
- II. REITs were created as a legal form of organization in order to encourage public ownership of real estate as an asset class through investment in firms that were in the business of long-term ownership and management of real estate. The exclusion, in NAREIT's definition of FFO, of gains and losses from the sales of previously depreciated operating real estate assets allows investors and analysts to readily identify the operating results of the long-term assets that form the core of a REIT's activity and assists in comparing those operating results between periods. We include the gains and losses from dispositions of land and development properties, as well as our proportionate share of the gains and losses from dispositions recognized by our unconsolidated investees, in our definition of FFO.

## Our FFO Measures

At the same time that NAREIT created and defined its FFO measure for the REIT industry, it also recognized that "management of each of its member companies has the responsibility and authority to publish financial information that it regards as useful to the financial community." We believe stockholders, potential investors and financial analysts who review our operating results are best served by a defined FFO measure that includes other adjustments to net earnings computed under GAAP in addition to those included in the NAREIT defined measure of FFO. Our FFO measures are used by management in analyzing our business and the performance of our properties and we believe that it is important that stockholders, potential investors and financial analysts understand the measures management uses.

We use these FFO measures, including by segment and region, to: (i) evaluate our performance and the performance of our properties in comparison to expected results and results of previous periods, relative to resource allocation decisions; (ii) evaluate the performance of our management; (iii) budget and forecast future results to assist in the allocation of resources; (iv) assess our performance as compared to similar real estate companies and the industry in general; and (v) evaluate how a specific potential investment will impact our future results. Because we make decisions with regard to our performance with a long-term outlook, we believe it is appropriate to remove the effects of short-term items that we do not expect to affect the underlying long-term performance of the properties. The long-term performance of our properties is principally driven by rental income. While not infrequent or unusual, these additional items we exclude in calculating FFO, as defined by Prologis, are subject to significant fluctuations from period to period that cause both positive and negative short-term effects on our results of operations, in inconsistent and unpredictable directions that are not relevant to our long-term outlook.

We use our FFO measures as supplemental financial measures of operating performance. We do not use our FFO measures as, nor should they be considered to be, alternatives to net earnings computed under GAAP, as indicators of our operating performance, as alternatives to cash from operating activities computed under GAAP or as indicators of our ability to fund our cash needs.

## FFO, as defined by Prologis

To arrive at FFO, as defined by Prologis, we adjust the NAREIT defined FFO measure to exclude:

- I. deferred income tax benefits and deferred income tax expenses recognized by our subsidiaries;
- II. current income tax expense related to acquired tax liabilities that were recorded as deferred tax liabilities in an acquisition, to the

- extent the expense is offset with a deferred income tax benefit in GAAP earnings that is excluded from our defined FFO measure;
- III. foreign currency exchange gains and losses resulting from debt transactions between us and our foreign consolidated subsidiaries and our foreign unconsolidated investees;
- IV. foreign currency exchange gains and losses from the remeasurement (based on current foreign currency exchange rates) of certain third party debt of our foreign consolidated subsidiaries and our foreign unconsolidated investees; and
- V. mark-to-market adjustments associated with derivative financial instruments.

We calculate FFO, as defined by Prologis for our unconsolidated investees on the same basis as we calculate our FFO, as defined by Prologis.

We believe investors are best served if the information that is made available to them allows them to align their analysis and evaluation of our operating results along the same lines that our management uses in planning and executing our business strategy.

## Core FFO

Core FFO includes FFO, as defined by Prologis, adjusted to remove gains (losses) on acquisitions or dispositions of investments in real estate that are included in FFO, as defined by Prologis. If we recognize impairment charges due to the expected disposition of investments in real estate, we exclude those impairment charges. We may also adjust for certain other significant items that affect comparability as noted in the reconciliation. In 2011, we have adjusted to exclude Merger, Acquisitions and Other Integration Expenses; early extinguishment of debt; and losses for the disaster expenses that occurred in March 2011 in Japan.

## Limitations on Use of our FFO Measures

While we believe our defined FFO measures are important supplemental measures, neither NAREIT's nor our measures of FFO should be used alone because they exclude significant economic components of net earnings computed under GAAP and are, therefore, limited as an analytical tool. Accordingly, they are two of many measures we use when analyzing our business. Some of these limitations are:

- The current income tax expenses that are excluded from our defined FFO measures represent the taxes that are payable.
- Depreciation and amortization of real estate assets are economic costs that are excluded from FFO. FFO is limited, as it does not reflect the cash requirements that may be necessary for future replacements of the real estate assets. Further, the amortization of capital expenditures and leasing costs necessary to maintain the operating performance of industrial properties are not reflected in FFO.
- Gains or losses from property acquisitions and dispositions or impairment charges related to expected dispositions represent changes in the value of the properties. By excluding these gains and losses, FFO does not capture realized changes in the value of acquired or disposed properties arising from changes in market conditions.
- The deferred income tax benefits and expenses that are excluded from our defined FFO measures result from the creation of a deferred income tax asset or liability that may have to be settled at some future point. Our defined FFO measures do not currently reflect any income or expense that may result from such settlement.
- The foreign currency exchange gains and losses that are excluded from our defined FFO measures are generally recognized based on movements in foreign currency exchange rates through a specific point in time. The ultimate settlement of our foreign currency-denominated net assets is indefinite as to timing and amount. Our FFO measures are limited in that they do not reflect the current period changes in these net assets that result from periodic foreign currency exchange rate movements.

We compensate for these limitations by using our FFO measures only in conjunction with net earnings computed under GAAP when making our decisions. To assist investors in compensating for these limitations, we reconcile our defined FFO measures to our net earnings computed under GAAP. This information should be read with our complete financial statements prepared under GAAP.

# Reporting Definitions

**Assets Under Managements ("AUM")** represents the estimated value of the real estate we own or manage through our consolidated entities and unconsolidated investees. We calculate AUM by adding the noncontrolling interests' share of the estimated fair value of the real estate investment to our share of total market capitalization.

**Core EBITDA.** We use Core EBITDA to measure both our operating performance and liquidity. We calculate Core EBITDA beginning with consolidated net earnings/loss and removing the affect of interest, income taxes, depreciation and amortization, impairment charges, gains or losses from the acquisition or disposition of investments in real estate, gains or losses on early extinguishment of debt and derivative contracts (including cash charges), similar adjustments we make to our Core FFO (see definition below), and other non-cash charges or gains (such as stock based compensation amortization and unrealized gains or losses on foreign currency and derivative activity), including our share of these items from unconsolidated investees.

We consider Core EBITDA to provide investors relevant and useful information because it permits investors to view income from operations on an unleveraged basis before the effects of income tax, non-cash depreciation and amortization expense and other items (including stock-based compensation amortization and certain unrealized gains and losses), gains or losses from the acquisition or disposition of investments in real estate, items that affect comparability, and other significant non-cash items. In 2011, we adjusted Core EBITDA to include a pro forma adjustment to reflect a full period of NOI on the operating properties we acquired through the Merger and PEPR acquisition and to exclude Merger, Acquisition and Other Integration Expenses and costs associated with the hurricane and tsunami that occurred in first quarter 2011 in Japan. By excluding interest expense EBITDA allows investors to measure our operating performance independent of our capital structure and indebtedness and, therefore, allows for a more meaningful comparison of our operating performance to that of other companies, both in the real estate industry and in other industries. Gains and losses on the early extinguishment of debt generally included the costs of repurchasing debt securities. Although difficult to predict, these items may be recurring given the uncertainty of the current economic climate and its adverse effects on the real estate and financial markets. While not infrequent or unusual in nature, these items result from market fluctuations that can have inconsistent effects on our results of operations. The economics underlying these items reflect market and financing conditions in the short-term but can obscure our performance and the value of our long-term investment decisions and strategies.

As a liquidity measure, we believe that Core EBITDA helps investors to analyze our ability to meet interest payment obligations and to make quarterly preferred share dividends. We believe that investors should consider Core EBITDA in conjunction with net income (the primary measure of our performance) and the other required Generally Accepted Accounting Principles ("GAAP") measures of our performance and liquidity, to improve their understanding of our operating results and liquidity, and to make more meaningful comparisons of our performance against other companies. By using Core EBITDA an investor is assessing the earnings generated by our operations, but not taking into account the eliminated expenses or gains incurred in connection with such operations. As a result, Core EBITDA has limitations as an analytical tool and should be used in conjunction with our required GAAP presentations. Core EBITDA does not reflect our historical cash expenditures or future cash requirements for working capital, capital expenditures distribution requirements or contractual commitments. Core EBITDA, also does not reflect the cash required to make interest and principal payments on our outstanding debt.

While EBITDA is a relevant and widely used measure of operating performance and liquidity, it does not represent net income or cash flow from operations as defined by GAAP and it should not be considered as an alternative to those indicators in evaluating operating performance or liquidity. Further, our computation of Core EBITDA may not be comparable to EBITDA reported by other companies. We compensate for the limitations of Core EBITDA by providing investors with financial statements prepared according to GAAP, along with this detailed discussion of Core EBITDA and a reconciliation of Core EBITDA to consolidated net earnings (loss), a GAAP measurement.

**Net Asset Value ("NAV").** We consider NAV to be a useful supplemental measure of our operating performance because it enables both management and investors to estimate the fair value of our business. The assessment of the fair value of a particular segment of our business is subjective in that it involves estimates and can be calculated using various methods. Therefore, in this supplemental report, we have presented the financial results and investments related to our business segments that we believe are important in calculating our NAV but have not presented any specific methodology nor provided any guidance on the assumptions or estimates that should be used in the calculation.

The components of NAV do not consider the potential changes in rental and fee income streams or the franchise value associated with our global operating platform, private capital platform, or development platform.
