Prologis Overview

About Prologis

Eemhaven, Rotterdam, Netherlands

- Leading global owner, operator and developer of industrial real estate with
 671 million square feet of space
- \$57.3 billion⁽¹⁾ in assets under management, \$34.3 billion⁽¹⁾ PLD share
- Total revenues of \$2.6 billion on PLD share basis⁽²⁾
- \$2.7 billion global development pipeline and \$1.6 billion land bank on PLD share basis
- Named one of Global 100 Most Sustainable Corporations in the World
- Investment grade credit ratings of Baa1/BBB+⁽³⁾

Note: Data as of September 30, 2015
1. Based on fair market value of investment management co-investment ventures and estimated investment capacity
2. PLD Share Q3 Total Revenues annualized
3. A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time

Prologis Business Lines

OPERATIONS: Collect Rent

- Being global is critical to our strategy with 5,200 customers operating around the world
- \$1.7B of annualized PLD share Net Operating Income⁽¹⁾
- Estimated 20% growth in market rent between 2014-2016

Strategic Capital: Generate Recurring Fees and Mitigate Risk

- Increases Prologis' returns, reduces foreign currency exposure and drives operational scale
- \$23.0B of third-party capital⁽²⁾
- Over \$200M of annual revenue from perpetual life, co-investment ventures plus the opportunity to earn incentive fees ("promotes") for outperformance

Development: Realize Profit

- Development platform keeps us at the forefront of modern logistics
- \$2.1B of PLD share development starts per year with \$300-\$400M of annual value creation⁽³⁾
- Development projects contribute ~\$0.15 per share in annual NOI⁽³⁾

2. Including fair market value of Strategic Capital co-investment ventures and estimated investment capacity

3. Illustrative based off midpoint of long-term annual development volumes of \$2B-\$3B

Development Value Creation Engine

Illustrative Run Rate NAV Accretion

Development Stabilizations	(\$M)
Gross Development Volumes	\$2,500
PLD Share Development Volumes	\$2,100
Margins	19%
Impact on NAV	
NAV Accretion	\$400
NAV per Share Accretion	\$0.75

Development Track Record Since 2001⁽²⁾

\$24.1B	\$4.7B gross value created	19.4% gross margin
Total	19.2%	14.7%
Investment	gross IRR	net IRR

We develop to:

- · Meet customers' needs globally
- Deepen our market presence
- · Refresh portfolio quality
- Generate profits across the cycle

Note: Dollars in millions except per share amounts

1. Calculated as the amount by which the estimated value of development stabilizations exceeds our total expected investment

2. Values based on 15 years of development activity from 2001 through Q2 2015

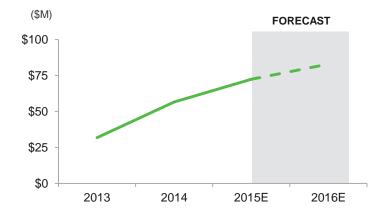

Development Stabilizations Drive NOI Growth

- \$1.8B \$1.9B of stabilizations expected in 2015
 - Increase of \$750M at the midpoint over 2014
- Incremental NOI from stabilizations expected to contribute approximately \$0.14 in 2015
- Stabilizations will continue to be significant driver of NOI growth given projected 2015 starts of ~\$2.5B

Development Stabilizations

PLD Share NOI Impact from Stabilizations

PROLOGIS, 1. Forecast build-to-suit (BTS) starts

Strategic Capital – \$37.3B AUM / \$23.0B 3rd Party Share⁽¹⁾

	Region	Ventures	Туре	Investment Strategy	Promote Opportunities through 2016
Americas	U.S.	NAIF, USLV ⁽³⁾ , USLF	Open end	3 rd party stabilized acquisitions	Q4 2016 (USLV)
AUM: \$17.9B 3 rd Party AUM: \$9.8B	Mexico	FIBRA Prologis	Public	Development contributions & 3 rd party stabilized acquisitions	Q2 2016
Avg Ownership: 45% Avg fees ⁽²⁾ : 65 bps	Brazil	Brazil Fund & JV's	Closed end	Development & long-term hold	n/a

Asia AUM: \$5.8B	Japan	Nippon Prologis REIT	Public	Development contributions & 3 rd party stabilized acquisitions	n/a
3rd Party AUM: \$5.0B Avg Ownership: 15% Avg Fees ⁽²⁾ : 75 bps	China	China Logistics Fund	Closed end	Development & long-term hold	n/a

Reduces foreign currency exposure, increases Prologis' returns and drives operational scale

1. AUM is based on fair market value of strategic capital co-investment ventures and estimated investment capacity as of September 30, 2015

2. Represents asset management and property management fees generated as a percentage of FMV

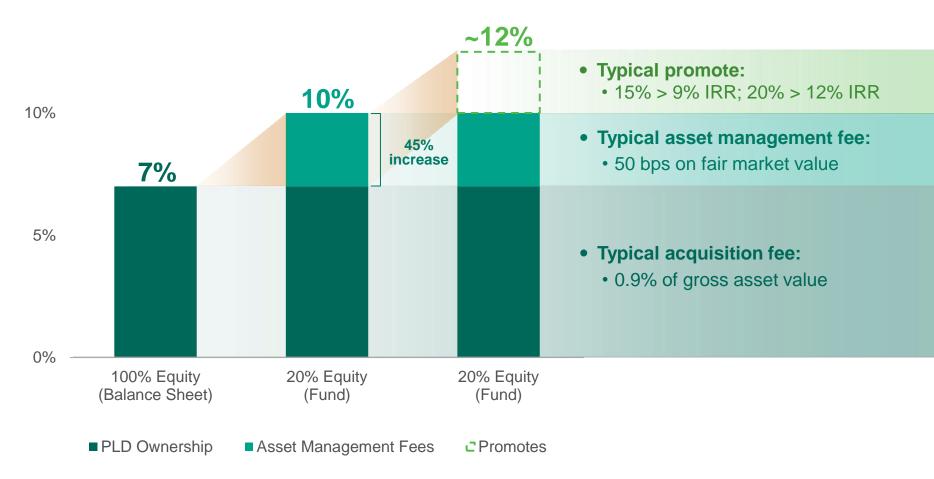

3. USLV owns a small portion of under development assets and land held for future development that was purchased as part of the KTR acquisition

Economics of Strategic Capital Model (Illustrative)

Strategic capital model improves real estate Return on Equity by at least ~300 bps

Return on Equity

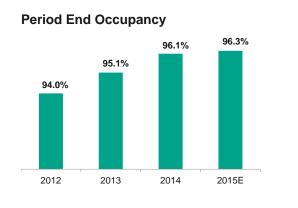

15%

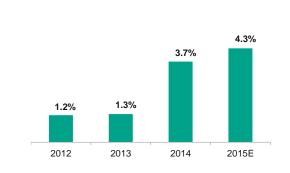

Strategic Priorities Drive Innovation & Growth

Capitalize on the global rent recovery

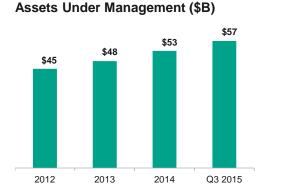

Rent Change on Rollover

Same Store NOI Growth⁽²⁾

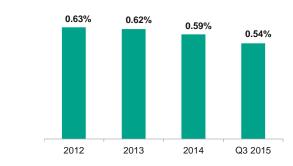

Use existing scale to drive bottom-line growth

General & Administrative Expenses (\$M)

G&A / Assets Under Management

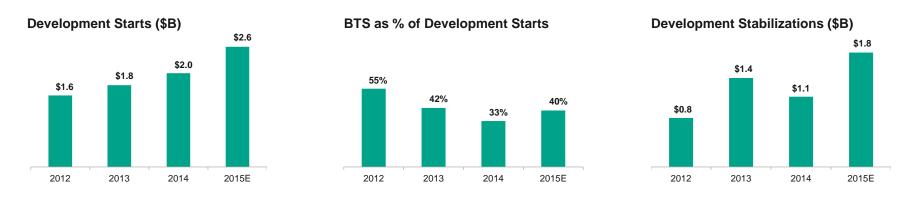

Note: AMB and ProLogis merged on June 3, 2011; 2011 data represents standalone ProLogis through June 3, 2011 and combined company thereafter. All data presented on Owned & Managed basis.

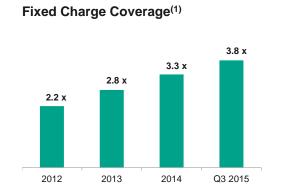

- 1. Average Q1-Q3
- 2. Same Store Net Operating Income is based on a population of properties consistent from period to period, thereby eliminating the effects of changes in the composition of the portfolio

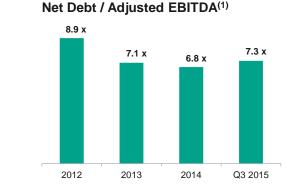

Strategic Priorities Drive Innovation & Growth (con't)

Utilize land bank and development expertise to drive value creation

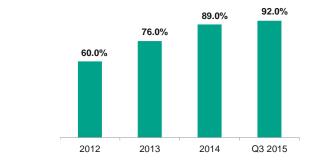

Drive capital structure to build top-three balance sheet amongst REITs

U.S. Dollar Net Equity

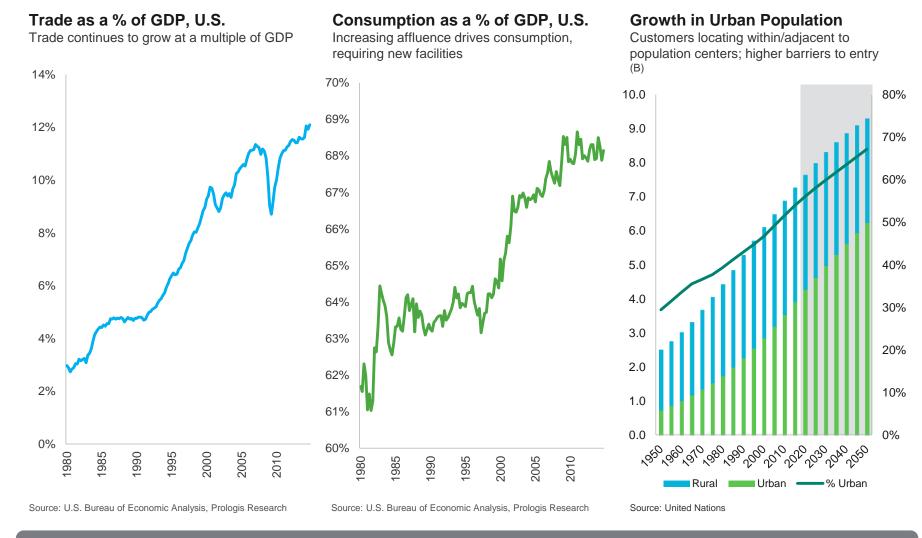

Note: AMB and ProLogis merged on June 3, 2011; 2011 data represents standalone ProLogis through June 3, 2011 and combined company thereafter. All data presented on an Owned & Managed basis. 1. Based on Prologis definitions on debt metrics. See reporting definitions

Industrial Sector Trends

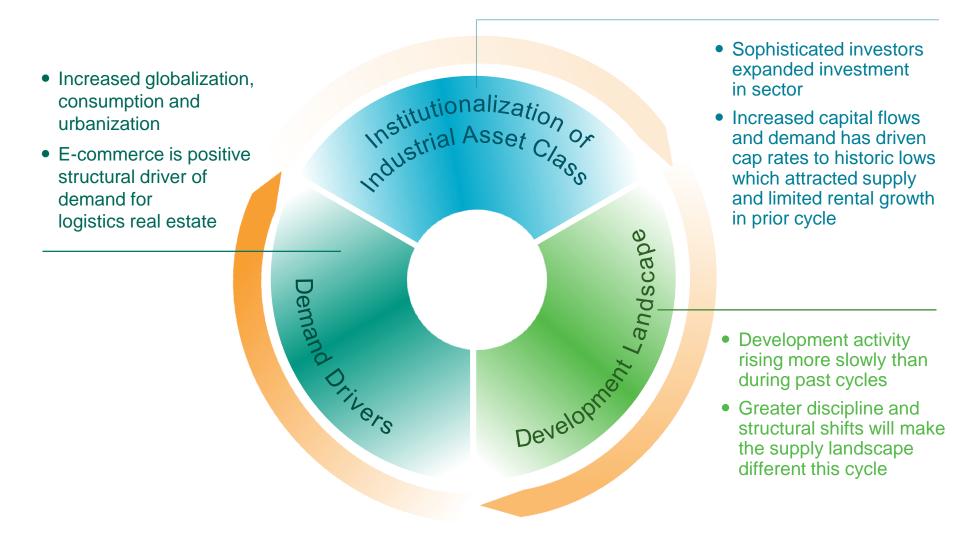

Macro & Mega Trends Driving Demand for Logistics

Increased globalization, consumption and urbanization fueling logistics demand

The Changing Landscape of Industrial Real Estate

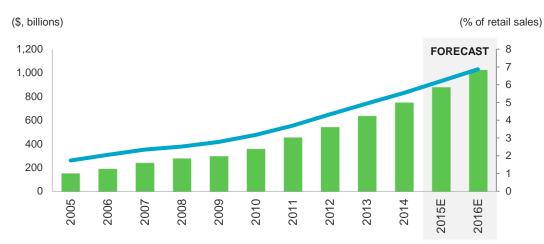

The New Supply Paradigm

Consolidation and	 Real estate development has historically been an entrepreneurial business
Institutionalization	but the Global Financial Crisis caused consolidation in the industry Development shifting towards larger-scale institutions as key players
Increased	 Changing attitudes on risk by institutions – both on equity and debt side –
Risk Aversion	translate into a measured appetite for risk Industry more watchful for signs of excess
New	 Expanded regulations in banking industry has led to more restrictive lending
Lending Constraints	and increased cost of capital for smaller developers Preference for relationship-lending and institutional borrowers
Tighter Talent Pool	 Shortage of real estate professionals with relevant development expertise Many developers moved to different jobs within real estate or left the business altogether in the last cycle
Better Information	 Greater transparency and accessible information about markets and development projects Enables proactive decision-making based on real-time information

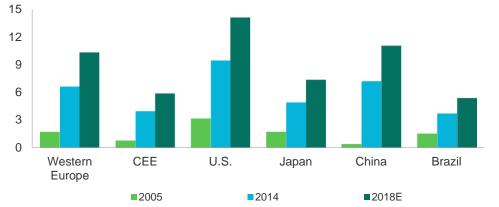

E-Commerce – A New Driver of Demand

Global E-Commerce Sales Volume & Share

E-Commerce Share by Region

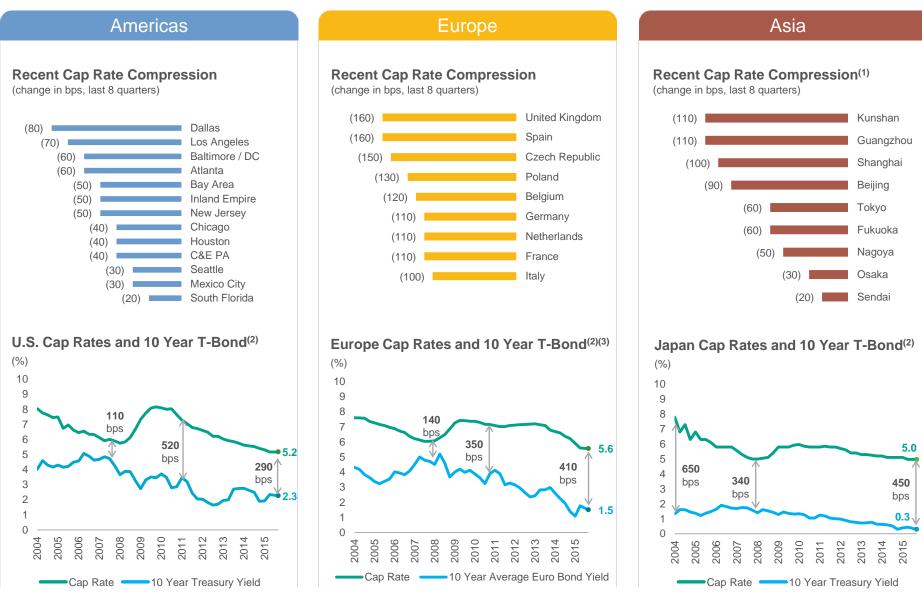

- E-commerce is positive structural driver of logistics real estate demand
- Accounts for approximately 10% of our leased space and nearly 30% of development leasing over the last 12 months
- More intensive user of logistics facilities and requires more space than comparable non-e-commerce users due to:
 - High inventory levels
 - Broader product variety
 - Outbound shipping direct to consumers
 - Reverse logistics (returns)
- E-commerce facilities are 2/3 less efficient, driving incremental demand by a factor of 3x

Rising Real Estate Values from Global Cap Rate Compression

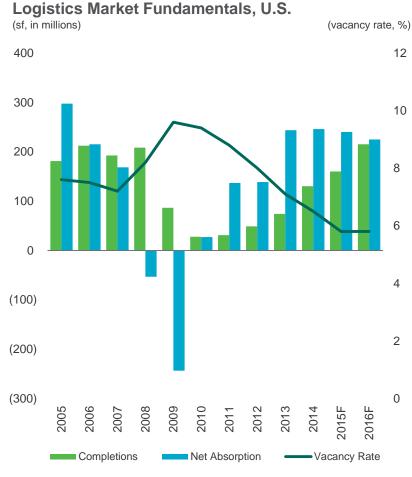

1. Prologis view of cap rate includes a deduction related to the amortization of land lease; data prior to 2014 is an estimate 2. Source: U.S. Federal Reserve, Banxico, Eurostat, Bank of Japan, Prologis Research

2. U.S. industrials include: DCT, DRE, EGP, FR and LPT

A)

3. Blue Chips include: AVB, BXP, FRT, PSA, and SPG

Key Takeaways

- Favorable market conditions persist and are expected to continue
- Positioned for sustainable growth given investment strategy, ability to self-fund future development activity, well-laddered debt maturity schedule and significant liquidity
- Strategic Capital and development businesses provide incremental EBITDA, reduce risk and improve portfolio quality
- 17% Core FFO growth and corresponding cash flow growth expected in 2015

Please refer to our annual and quarterly financial statements filed with the Securities and Exchange Commission on Forms 10-K and 10-Q and other public reports for further information about us and our business. Certain amounts from previous periods presented in the Supplemental Information have been reclassified to conform to the current presentation.

Adjusted EBITDA. We use Adjusted EBITDA to measure both our operating performance and liquidity. We calculate Adjusted EBITDA beginning with consolidated net earnings (loss) attributable to common stockholders and removing the effect of interest, income taxes, depreciation and amortization, impairment charges, third party acquisition expenses related to the acquisition of real estate, gains or losses from the acquisition of departs in real estate (other than from land and development properties), gains from the revaluation of equity investments upon acquisition of a controlling interest, gains or losses on early extinguishment of debt and derivative contracts (including cash charges), similar adjustments we make to our FFO measures (see definition below), and other non-cash charges or gains (such as stock based compensation and unrealized gains or losses on foreign currency and derivative activity). We make adjustments to reflect our economic ownership in each entity, whether consolidated or unconsolidated.

We consider Adjusted EBITDA to provide investors relevant and useful information because it permits investors to view our operating performance on an unleveraged basis before the effects of income tax, non-cash depreciation and amortization expense, gains and losses on the disposition of non-development properties and other items (outlined above), items that affect comparability, and other significant non-cash items. We also include a pro forma adjustment in Adjusted EBITDA to reflect a full period of NOI on the operating properties we acquire and stabilize and to remove NOI on properties we dispose of during the quarter assuming the transaction occurred at the beginning of the quarter. By excluding interest expense, Adjusted EBITDA allows investors to measure our operating performance independent of our capital structure and indebtedness and, therefore, allows for a more meaningful comparison of our operating performance to that of other companies, both in the real estate industry and in other industries. Gains and losses on the early extinguishment of debt generally include the costs of repurchasing debt securities. While not infrequent or unusual in nature, these items result from market fluctuations that can have inconsistent effects on our results of operations. The economics underlying these items reflect market and financing conditions in the short-term but can obscure our performance and the value of our long-term investment decisions and strategies.

We believe that Adjusted EBITDA helps investors to analyze our ability to meet interest payment obligations and to make quarterly preferred share dividends. We believe that investors should consider Adjusted EBITDA in conjunction with net earnings (the primary measure of our performance) and the other required Generally Accepted Accounting Principles ("GAAP") measures of our performance and liquidity, to improve their understanding of our operating results and liquidity, and to make more meaningful comparisons of our performance against other companies. By using Adjusted EBITDA, an investor is assessing the earnings generated by our operations. As a result, Adjusted EBITDA has limitations as an analytical tool and should be used in conjunction with our GAAP presentations. Adjusted EBITDA capital expenditures or thefect our historical cash expenditures or future cash requirements for working capital, capital expenditures, distribution requirements or contractual commitments. Adjusted EBITDA, also does not reflect the cash required to make interest and principal payments on our outstanding debt.

While EBITDA is a relevant and widely used measure of operating performance, it does not represent net income or cash flow from operations as defined by GAAP and it should not be considered as an alternative to those indicators in evaluating operating performance or liquidity. Further, our computation of Adjusted EBITDA may not be comparable to EBITDA reported by other companies. We compensate for the limitations of Adjusted EBITDA by providing investors with financial statements prepared according to GAAP, along with this detailed discussion of Adjusted EBITDA and a reconciliation of Adjusted EBITDA to consolidated net earnings (loss), a GAAP measurement.

Business Line Reporting. Core FFO and development gains are generated by our three lines of business: (i) real estate operations; (ii) strategic capital; and (iii) development. Real estate operations represents total Prologis Core FFO, less the amount allocated to the Strategic Capital line of business. The amount of Core FFO allocated to the Strategic Capital line of business represents the third party share of the asset management related fees we earn from our co-investment ventures (both consolidated and unconsolidated) less costs directly associated to our strategic capital group, plus development management income. Development gains include our share of gains on dispositions of development properties and land, net of taxes. To calculate the per share amount, the amount generated by each line of business is divided by the weighted average diluted common shares outstanding used in our Core FFO calculation of per share amounts. Management believes evaluating our results by line of business is a useful supplemental measure of our operating performance because it helps the investing public compare the operating performance of Prologis' respective businesses to other companies' comparable businesses. Prologis' computation of FFO by line of business may not be comparable to that reported by other real estate investment trusts as they may use different methodologies in computing such measures.

Calculation of Per Share Amounts is as follows (in thousands, except per share amounts):

	_					
	T		nths Endeo nber 30,		Nine Month Septemb

Debt to Adjusted EBITDA ratio		6.34		6.80

PROI OGIS.

Development Margin is calculated on developed properties as the estimated value at Stabilization minus estimated total investment, before closing costs, the impact of any deferred rents, taxes or third party promotes, divided by the estimated total investment.

Development Portfolio includes industrial properties that are under development and properties that are developed but have not met Stabilization.

FFO, as defined by Prologis attributable to common stockholders/unitholders ("FFO, as defined by Prologis"); Core FFO attributable to common stockholders/unitholders ("Core FFO"); AFFO (collectively referred to as "FFO"). FFO is a financial measure that is not determined in accordance with GAAP, but is a measure that is commonly used in the real estate industry. The most directly comparable GAAP measure to FFO is net earnings. Although the National Association of Real Estate Investment Trusts ("NAREIT") has published a definition of FFO, modifications to the NAREIT calculation of FFO are common among REITs, as companies seek to provide financial measures that meaningfully reflect their business.

FFO is not meant to represent a comprehensive system of financial reporting and does not present, nor do we intend it to present, a complete picture of our financial condition and operating performance. We believe net earnings computed under GAAP remains the primary measure of performance and that FFO is only meaningful when it is used in conjunction with net earnings computed under GAAP. Further, we believe our consolidated financial statements, prepared in accordance with GAAP, provide the most meaningful picture of our financial condition and our operating performance.

NAREIT's FFO measure adjusts net earnings computed under GAAP to exclude historical cost depreciation and gains and losses from the sales, along with impairment charges, of previously depreciated properties. We agree that these NAREIT adjustments are useful to investors for the following reasons:

- (i) historical cost accounting for real estate assets in accordance with GAAP assumes, through depreciation charges, that the value of real estate assets diminishes predictably over time. NAREIT stated in its White Paper on FFO "since real estate asset values have historically risen or fallen with market conditions, many industry investors have considered presentations of operating results for real estate companies that use historical cost accounting to be insufficient by themselves." Consequently, NAREIT's definition of FFO reflects the fact that real estate, as an asset class, generally appreciates over time and depreciation charges required by GAAP do not reflect the underlying economic realities. We exclude depreciation from our unconsolidated entities and the third parties' share of our consolidated ventures.
- (ii) REITs were created in order to encourage public ownership of real estate as an asset class through investment in firms that were in the business of long-tern ownership and management of real estate. The exclusion, in NAREIT's definition of FFO, of gains and losses from the sales, along with impairment charges, of previously depreciated operating real estate assets allows investors and analysts to readily identify the operating results of the long-term assets that form the core of a REIT's activity and assists in comparing those operating results between periods. We include the gains and losses (including impairment charges) from dispositions of land and development properties, as well as our proportionate share of the gains and losses (including impairment charges) from dispositions of development properties recognized by our unconsolidated and consolidated entities, in our definition of FFO. We exclude the gain on revaluation of equity investments upon acquisition of a controlling interest from our definition of FFO.

Our FFO Measures

At the same time that NAREIT created and defined its FFO measure for the REIT industry, it also recognized that "management of each of its member companies has the responsibility and authority to publish financial information that it regards as useful to the financial community." We believe stockholders, potential investors and financial analysts who review our operating results are best served by a defined FFO measure that includes other adjustments to net earnings computed under GAAP in addition to those included in the NAREIT defined measure of FFO. Our FFO measures are used by management in analyzing our business and the performance of our properties and we believe that it is important that stockholders, potential investors and financial analysts understand the measures management uses.

We calculate our FFO measures, as defined below, based on our proportionate ownership share of both our unconsolidated and consolidated ventures. We reflect our share of our FFO measures for

30

unconsolidated ventures by applying our average ownership percentage for the period to the applicable reconciling items on an entity by entity basis. We reflect our share for consolidated ventures in which we do not own 100% of the equity by adjusting our FFO measures to remove the third party ownership share of the applicable reconciling items based on average ownership percentage for the applicable periods.

We use these FFO measures, including by segment and region, to: (i) evaluate our performance and the performance of our properties in comparison to expected results and results of previous periods, relative to resource allocation decisions; (ii) evaluate the performance of our management; (iii) budget and forecast future results to assist in the allocation of resources; (iv) assess our performance as compared to similar real estate companies and the industry in general; and (v) evaluate how a specific potential investment will impact our future results. Because we make decisions with regard to our performance with a long-term outlook, we believe it is appropriate to remove the effects of short-term items that we do not expect to affect the underlying long-term performance of the properties. The long-term performance of our properties is principally driven by rental income. While not infrequent or unusual, these additional items we exclude in calculating *FFO*, as *defined by Prologis*, defined below, are subject to significant fluctuations from period to period that cause both positive and negative short-term effects on our results of operations in inconsistent and unpredictable directions that are not relevant to our long-term outlook.

We use our FFO measures as supplemental financial measures of operating performance. We do not use our FFO measures as, nor should they be considered to be, alternatives to net earnings computed under GAAP, as indicators of our operating performance, as alternatives to cash from operating activities computed under GAAP or as indicators of our ability to fund our cash needs.

FFO, as defined by Prologis

To arrive at FFO, as defined by Prologis, we adjust the NAREIT defined FFO measure to exclude:

- (i) deferred income tax benefits and deferred income tax expenses recognized by our subsidiaries;
- current income tax expense related to acquired tax liabilities that were recorded as deferred tax liabilities in an acquisition, to the extent the expense is offset with a deferred income tax benefit in GAAP earnings that is excluded from our defined FFO measure;
- unhedged foreign currency exchange gains and losses resulting from debt transactions between us and our foreign consolidated subsidiaries and our foreign unconsolidated entities;
- (iv) foreign currency exchange gains and losses from the remeasurement (based on current foreign currency exchange rates) of certain third party debt of our foreign consolidated subsidiaries and our foreign unconsolidated entities; and
- (v) mark-to-market adjustments associated with derivative financial instruments.

We believe investors are best served if the information that is made available to them allows them to align their analysis and evaluation of our operating results along the same lines that our management uses in planning and executing our business strategy. *Core FFO*

In addition to FFO, as defined by Prologis, we also use Core FFO. To arrive at Core FFO, we adjust FFO, as defined by Prologis, to exclude the following recurring and non-recurring items that we recognized directly in FFO, as defined by Prologis:

- (i) gains or losses from contribution or sale of land or development properties;
- (ii) income tax expense related to the sale of investments in real estate and third-party acquisition costs related to the acquisition of real estate;
- (iii) impairment charges recognized related to our investments in real estate generally as a result of our change in intent to contribute or sell these properties;
- (iv) gains or losses from the early extinguishment of debt and redemption and repurchase of preferred stock; and
- (v) expenses related to natural disasters.

We believe it is appropriate to further adjust our *FFO*, as defined by *Prologis* for certain recurring items as they were driven by transactional activity and factors relating to the financial and real estate markets, rather than factors specific to the on-going operating performance of our properties or investments. The impairment charges we have recognized were primarily based on valuations of real estate, which had declined due to market conditions, that we no longer expected to hold for long-term investment. Over the last few years, we made it a priority to strengthen our financial position by reducing our debt, our **PROLOGIS**.

investment in certain low yielding assets and our exposure to foreign currency exchange fluctuations. As a result, we changed our intent to sell or contribute certain of our real estate properties and recorded impairment charges when we did not expect to recover the costs of our investment. Also, we purchased portions of our debt securities when we believed it was advantageous to do so, which was based on market conditions, and in an effort to lower our borrowing costs and extend our debt maturities. As a result, we have recognized net gains or losses on the early extinguishment of certain debt due to the financial market conditions at that time.

We analyze our operating performance primarily by the rental income of our real estate and the revenue driven by our strategic capital business, net of operating, administrative and financing expenses. This income stream is not directly impacted by fluctuations in the market value of our investments in real estate or debt securities. Although these items discussed above have had a material impact on our operations and are reflected in our financial statements, the removal of the effects of these items allows us to better understand the core operating performance of our properties over the long term.

We use *Core FFO*, including by segment and region, to: (i) evaluate our performance and the performance of our properties in comparison to expected results and results of previous periods, relative to resource allocation decisions; (ii) evaluate the performance of our management; (iii) budget and forecast future results to assist in the allocation of resources; (iv) provide guidance to the financial markets to understand our expected operating performance; (v) assess our operating performance as compared to similar real estate companies and the industry in general; and (vi) evaluate how a specific potential investment will impact our future results. Because we make decisions with regard to our performance with a long-term outlook, we believe it is appropriate to remove the effects of items that we do not expect to affect the underlying long-term performance of the properties we own. As noted above, we believe the long-term performance of our properties is principally driven by rental income. We believe investors are best served if the information that is made available to them allows them to align their analysis and evaluation of our operating results along the same lines that our management uses in planning and executing our business strategy.

AFFO

To arrive at AFFO, we adjust Core FFO to include realized gains from the disposition of land and development properties and to exclude our share of the impact of; (i) straight-line rents; (ii) amortization of above- and below-market lease intangibles; (iii) recurring capital expenditures; (iv) amortization of management contracts; (v) amortization of debt premiums and discounts and financing costs, net of amounts capitalized, and; (vi) stock compensation expense.

We believe AFFO provides a meaningful indicator of our ability to fund cash needs, including cash distributions to our stockholders.

Limitations on Use of our FFO Measures

While we believe our defined FFO measures are important supplemental measures, neither NAREIT's nor our measures of FFO should be used alone because they exclude significant economic components of net earnings computed under GAAP and are, therefore, limited as an analytical tool. Accordingly, these are only a few of the many measures we use when analyzing our business. Some of these limitations are:

- The current income tax expenses and acquisition costs that are excluded from our defined FFO measures represent the taxes and transaction costs that are payable.
- Depreciation and amortization of real estate assets are economic costs that are excluded from FFO.
 FFO is limited, as it does not reflect the cash requirements that may be necessary for future replacements of the real estate assets. Further, the amortization of capital expenditures and leasing costs necessary to maintain the operating performance of industrial properties are not reflected in FFO.
- Gains or losses from non-development property acquisitions and dispositions or impairment charges
 related to expected dispositions represent changes in value of the properties. By excluding these
 gains and losses, FFO does not capture realized changes in the value of acquired or disposed
 properties arising from changes in market conditions.
- The deferred income tax benefits and expenses that are excluded from our defined FFO measures
 result from the creation of a deferred income tax asset or liability that may have to be settled at
 some future point. Our defined FFO measures do not currently reflect any income or expense that
 may result from such settlement.

- The foreign currency exchange gains and losses that are excluded from our defined FFO measures
 are generally recognized based on movements in foreign currency exchange rates through a
 specific point in time. The ultimate settlement of our foreign currency-denominated net assets is
 indefinite as to timing and amount. Our FFO measures are limited in that they do not reflect the
 current period changes in these net assets that result from periodic foreign currency exchange rate
 movements.
- The gains and losses on extinguishment of debt that we exclude from our Core FFO, may provide a benefit or cost to us as we may be settling our debt at less or more than our future obligation.
- The natural disaster expenses that we exclude from Core FFO are costs that we have incurred.

We compensate for these limitations by using our FFO measures only in conjunction with net earnings computed under GAAP when making our decisions. This information should be read with our complete consolidated financial statements prepared under GAAP. To assist investors in compensating for these limitations, we reconcile our defined FFO measures to our net earnings computed under GAAP.

Fixed Charge Coverage is defined as Adjusted EBITDA divided by total fixed charges. Fixed charges consist of net interest expense adjusted for amortization of finance costs and debt discount (premium), capitalized interest, and preferred stock dividends. We use fixed charge coverage to measure our liquidity. We believe that fixed charge coverage is relevant and useful to investors because it allows fixed income investors to measure our ability to make interest payments on outstanding debt and make distributions/dividends to preferred unitholders/stockholders. Our computation of fixed charge coverage is not calculated in accordance with applicable SEC rules and may not be comparable to fixed charge coverage.

General and Administrative Expenses ("G&A") were as follows (in thousands):

	Three Months Ended September 30,			Ended r 30,	
	2015	2014		2015	2014
Gross overhead	\$ 115,687 \$	109,485	\$	334,692 \$	344,669
Allocated to rental expenses	(9,183)	(7,141)		(25,248)	(22,761)
Allocated to strategic capital expenses	(21,714)	(22,442)		(62,190)	(74,442)
Capitalized amounts	(25,415)	(21,699)		(74,564)	(65,685)
G&A expenses	\$ 59,375 \$	58,203	\$	172,690 \$	181,781

We capitalize certain costs directly related to our development and leasing activities. Capitalized G&A expenses include salaries and related costs as well as other G&A costs. The capitalized costs were as follows (in thousands):

	1	Three Months Ended September 30,		Nine Months Septembe	
		2015	2014	2015	2014
Development activities	\$	18,752 \$	17,058	\$ 55,423 \$	51,322
Leasing activities		5,588	4,296	15,877	13,418
Costs related to internally developed software		1,075	345	3,264	945
Total capitalized G&A	\$	25,415 \$	21,699	\$ 74,564 \$	65,685

G&A as a Percent of Assets Under Management (in thousands):

Net G&A - midpoint of 2015 guidance range (a)	\$ 238,000
Add: estimated 2015 strategic capital expenses	89,000
Less: estimated 2015 strategic capital property management expenses	(42,000)
Adjusted G&A, using 2015 guidance amounts	\$ 285,000
Gross book value at period end (b):	
Operating properties	\$ 46,510,381
Development portfolio - TEI	3,500,628
Land portfolio	1,772,276
Other real estate investments, assets held for sale and note receivable backed by real	
estate	867,199
Total Gross Book Value of Assets Under Management	\$ 52,650,484

(a) This amount represents the 2015 guidance provided in this Supplemental Package.

(b) This amount does not represent enterprise value.

G&A as % of Assets Under Management

Investment Capacity is our estimate of the gross real estate, which could be acquired by our coinvestment ventures through the use of existing equity commitments from us and our partners up to the ventures maximum leverage limits.

Net Asset Value ("NAV"). We consider NAV to be a useful supplemental measure of our operating performance because it enables both management and investors to estimate the fair value of our business. The assessment of the fair value of a particular segment of our business is subjective in that it involves estimates and can be calculated using various methods. Therefore, we have presented the financial results and investments related to our business segments that we believe are important in calculating our NAV but have not presented any specific methodology nor provided any guidance on the assumptions or estimates that should be used in the calculation.

The components of NAV do not consider the potential changes in rental and fee income streams or the franchise value associated with our global operating platform, strategic capital platform, or development platform.

Net Operating Income ("NOI") represents rental income less rental expenses.

Operating Portfolio includes stabilized industrial properties in our owned and managed portfolio. A developed property moves into the Operating Portfolio when it meets Stabilization.

Prologis Share represents our proportionate economic ownership of each entity included in our total owned and managed portfolio.

Rental Income included the following (in thousands):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2015	2014		2015	2014	
Rental income	\$ 395,938 \$	273,503	\$ `	1,062,954 \$	859,812	
Amortization of lease intangibles	(318)	(6,803)		(9,447)	(21,777)	
Rental expense recoveries	114,639	80,136		312,510	254,310	
Straight-lined rents	22,496	8,986		46,984	32,990	
	\$ 532,755 \$	355,822	\$ `	1,413,001 \$	1,125,335	

Same Store. We evaluate the operating performance of the operating properties we own and manage using a "Same Store" analysis because the population of properties in this analysis is consistent from period to period, thereby eliminating the effects of changes in the composition of the portfolio on performance measures. We include the properties included in our owned and managed portfolio that were in operation (including development properties that have been completed and available for lease) at

0.54%

January 1, 2014 and throughout the full periods in both 2014 and 2015. We have removed all properties that were disposed of to a third party from the population for both periods. We believe the factors that impact rental income, rental expenses and NOI in the Same Store portfolio are generally the same as for the total operating portfolio. In order to derive an appropriate measure of period-to-period operating performance, we remove the effects of foreign currency exchange rate movements by using the current exchange rate to translate from local currency into U.S. dollars, for both periods.

Our same store measures are non-GAAP measures that are commonly used in the real estate industry and are calculated beginning with rental income and rental expenses from the financial statements prepared in accordance with GAAP. It is also common in the real estate industry and expected from the analyst and investor community that these numbers be further adjusted to remove certain non-cash items included in the financial statements prepared in accordance with GAAP to reflect a cash same store number. In order to clearly label these metrics, we call one Same Store NOI- GAAP and one Same Store NOI-Adjusted Cash. As these are non-GAAP measures they have certain limitations as an analytical tool and may vary among real estate companies. As a result, we provide a reconciliation from our financial statements prepared in accordance with GAAP to Same Store NOI-GAAP and then to Same Store NOI-Adjusted Cash with explanations of how these metrics are calculated and adjusted.

The following is a reconciliation of our consolidated rental income, rental expenses and NOI, as included in the Consolidated Statements of Operations, to the respective amounts in our Same Store portfolio analysis (*dollars in thousands*):

		Three Months Ended September 30,				
				Change		
		2015	2014	(%)		
Rental Income:	•					
Per the Consolidated Statements of Operations	\$	532,755 \$	355,822			
Properties not included and other adjustments (a)		(147,104)	(46,967)			
Unconsolidated Co-Investment Ventures	-	409,489	451,005	4.000		
Same Store - Rental Income	\$	795,140 \$	759,860	4.6%		
Rental Expense:						
Per the Consolidated Statements of Operations	\$	139,905 \$	102,324			
Properties not included and other adjustments (b)		(27,882)	(10,566)			
Unconsolidated Co-Investment Ventures		91,284	102,664			
Same Store - Rental Expense	\$	203,307 \$	194,422	4.6%		
NOI-GAAP:						
Per the Consolidated Statements of Operations	\$	392,850 \$	253,498			
Properties not included and other adjustments		(119,222)	(36,401)			
Unconsolidated Co-Investment Ventures		318,205	348,341			
Same Store - NOI - GAAP	\$	591,833 \$,	4.7%		
Same Store - NOI - GAAP - Prologis Share (c)	\$	353,092 \$	332,421	6.2%		
NOI-Adjusted Cash:						
Same store- NOI - GAAP	\$	591,833 \$	565,438			
Adjustments (d)	Ψ	(11,809)	(5,806)			
Same Store - NOI- Adjusted Cash	\$	580,024 \$	559,632	3.6%		
Same Store - NOI- Adjusted Cash - Prologis Share (c)	Š	345,367 \$	330,607	4.5%		

(a) To calculate Same Store rental income, we exclude the net termination and renegotiation fees to allow us to evaluate the growth or decline in each property's rental income without regard to items that are not indicative of the property's recurring operating performance.

- (b) To calculate Same Store rental expense, we include an allocation of the property management expenses for our consolidated properties based on the property management fee that is provided for in the individual management agreements under which our wholly owned management companies provide property management services (generally the fee is based on a percentage of revenue). On consolidation, the management fee income and expenses are eliminated and the actual cost of providing property management services is recognized.
- (c) Prologis share of Same Store is calculated using the underlying building information from the Same Store NOI GAAP and Adjusted Cash calculations and applying our ownership percentage as of September 30, 2015 to the NOI of each building for both periods.
- (d) In order to derive Same Store- NOI Adjusted Cash, we adjust Same Store- NOI- GAAP to exclude non-cash items included in our rental income in our GAAP financial statements, including straight line rent adjustments and adjustments related to purchase accounting to reflect leases at fair value at the time of acquisition.

Stabilization is defined when a property that was developed has been completed for one year or is 90% occupied. Upon stabilization, a property is moved into our Operating Portfolio.

Total Expected Investment ("TEI") represents total estimated cost of development or expansion, including land, development and leasing costs. TEI is based on current projections and is subject to change. Non-U.S. dollar investments are translated to U.S. dollars using the exchange rate at period end or the date of development start for purposes of calculating development starts in any period.

Value Creation represents the value that we will create through our development and leasing activities. We calculate value creation by estimating the NOI that the property will generate at Stabilization and applying an estimated stabilized capitalization rate applicable to that property. The value creation is calculated as the amount by which the estimated value exceeds our total expected investment and does not include any fees or promotes we may earn. This can also include realized economic gains from value added conversion properties.

Forward-looking statements

The statements in this presentation that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are based on current expectations, estimates and projections about the industry and markets in which Prologis operates, management's beliefs and assumptions made by management. Such statements involve uncertainties that could significantly impact Prologis' financial results. Words such as "expects," "anticipates," "intends," "plans," "believes," "estimates," variations of such words and similar expressions are intended to identify such forward-looking statements, which generally are not historical in nature. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future — including statements relating to rent and occupancy growth, development activity and changes in sales or contribution volume of properties, disposition activity, general conditions in the geographic areas where we operate, our debt and financial position, our ability to form new co-investment ventures and the availability of capital in existing or new co-investment ventures — are forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Although we believe the expectations reflected in any forward-looking statements are based on reasonable assumptions, we can give no assurance that our expectations will be attained and therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. Some of the factors that may affect outcomes and results include, but are not limited to: (i) national, international, regional and local economic climates, (ii) changes in financial markets, interest rates and foreign currency exchange rates, (iii) increased or unanticipated competition for our properties, (iv) risks associated with acquisitions, dispositions and development of properties, (v) maintenance of real estate investment trust ("REIT") status and tax structuring, (vi) availability of financing and capital, the levels of debt that we maintain and our credit ratings, (vii) risks related to our investments in our co-investment ventures and funds, including our ability to establish new coinvestment ventures and funds, (viii) risks of doing business internationally, including currency risks, (ix) environmental uncertainties, including risks of natural disasters, and (x) those additional factors discussed in reports filed with the Securities and Exchange Commission by Prologis under the heading "Risk Factors." Prologis undertakes no duty to update any forward-looking statements appearing in this presentation.
