Overview

Prologis, Inc. Announces Second Quarter 2014 Earnings Results

- GAAP Same-Store Net Operating Income Increased 3.8 percent -

- Stabilized \$371.3 Million of Development, Estimated Margin of 22.5 Percent -
- Recognized \$25 Million Net Promote for Prologis Targeted U.S. Logistics Fund -
 - Raising Earnings and Capital Deployment Guidance -

SAN FRANCISCO (July 22, 2014) - - Prologis, Inc. (NYSE: PLD), the global leader in industrial real estate, today reported results for the second guarter 2014.

Core funds from operations (Core FFO) per fully diluted share was \$0.48 for the second guarter compared to \$0.41 for the same period in 2013.

"We're pleased to report a very strong quarter of financial and operating performance," said Hamid R. Moghadam, chairman and CEO, Prologis. "Our results reflect high occupancy levels with strong growth in rental rates, above average development margins, and increased earnings from our Strategic Capital business."

STRONG OPERATING PERFORMANCE

Prologis ended the quarter with 94.6 percent occupancy in the operating portfolio, up 90 basis points over the same period in 2013. The company leased 29.0 million square feet (2.7 million square meters) in its combined operating and development portfolios in the second quarter.

Tenant retention in the quarter was 84.8 percent. GAAP rental rates on leases signed in the quarter increased 6.6 percent from prior rents compared to an increase of 4.0 percent in the same period in 2013.

During the second quarter, GAAP same-store net operating income (NOI) increased 3.8 percent, and 5.3 percent on an adjusted cash basis, compared to 0.7 percent and (0.4) percent, respectively, in the same period in 2013. The increase was principally driven by higher average occupancy and increasing rental rates.

CAPITAL DEPLOYMENT ACTIVITY ACCELERATES

New investments during the second quarter totaled \$850.4 million (\$765.2 million Prologis' share).

Development Starts & Pipeline

During the quarter, Prologis started \$438.7 million (\$409.8 million Prologis' share) of new development projects, with an estimated weighted average yield upon

stabilization of 7.1 percent and an estimated development margin of 18.8 percent.

The company stabilized \$371.3 million (\$320.9 million Prologis' share) in development projects, with an estimated development margin of 22.5 percent and \$83.4 million (\$82.2 million Prologis' share) of estimated value creation.

At quarter end, Prologis' global development pipeline had a total expected investment of \$2.4 billion (\$2.1 billion Prologis' share). The pipeline had an estimated weighted average yield at stabilization of 7.2 percent, a development margin of 21.2 percent, and an estimated \$452.8 million of Prologis' share of value creation upon stabilization.

Acauisitions

The company acquired \$137.0 million (\$80.7 million Prologis' share) of buildings, principally in Europe and the United States. The weighted average stabilized capitalization rate on building acquisitions was 6.3 percent.

Prologis invested \$274.7 million in its North American Industrial Fund, increasing its ownership in the venture to 42 percent from 23 percent.

Dispositions & Contributions

Prologis completed \$603.7 million (\$499.6 million Prologis' share) of contributions, third-party building, land and other non-strategic real estate dispositions. The contributions and building dispositions had a weighted average stabilized capitalization rate of 6.6 percent.

STREAMLINED STRATEGIC CAPITAL BUSINESS SUPPORTS GROWTH

As previously announced the company successfully completed its initial public offering of FIBRA Prologis and listing on the Mexican Stock Exchange. FIBRA Prologis' \$1.6 billion portfolio is comprised of properties previously owned by former Prologis MX Fund LP, the majority of Prologis México Fondo Logístico, and Prologis.

During the second quarter, Prologis raised \$777.6 million of third-party equity for its ventures, including: \$618.9 million for FIBRA Prologis; \$133.5 million for Prologis Targeted U.S. Logistics Fund; and \$25.2 million for Prologis Targeted Europe Logistics Fund. Subsequent to quarter end, the company secured a \$500 million increase in committed third-party equity to its Prologis China Logistics Venture. The company recognized a net promote of \$25.1 million for Prologis Targeted U.S. Logistics Fund.

At quarter end, Prologis had \$28.7 billion (\$9.4 billion Prologis' share) in combined assets under management in 11 major co-investment ventures.

CAPITAL MARKETS ACTIVITY IMPROVES LIQUIDITY

During the second quarter, Prologis completed \$3.6 billion of capital markets activity. Notable new financing for Prologis and the co-investment ventures included:

- \$1.1 billion in Eurobond issuances with a blended interest rate of 3.0 percent and weighted average term of 10 years;
- \$1.1 billion across two term facilities denominated in euro and yen; and a
- \$500 million increase in the company's global credit lines, expanding the total capacity to \$3.0 billion.

"Favorable credit conditions in this low interest rate environment are providing numerous opportunities for us to lock in lower, long-term rates," said Thomas S. Olinger, chief financial officer, Prologis. "We significantly improved liquidity and further increased our U.S. net equity exposure to 85 percent."

NET EARNINGS

Net earnings per fully diluted share was \$0.13 for the second quarter compared to a net loss per share of less than \$0.01 for the same period in 2013.

EARNINGS GUIDANCE INCREASED FOR 2014

Prologis increased the midpoint and narrowed its full-year 2014 Core FFO guidance range to \$1.82 to \$1.86 per diluted share from \$1.76 to \$1.82 per diluted share. The company also expects to recognize net earnings, for GAAP purposes, of \$0.20 to \$0.24 per share.

"Given faster than expected rental growth and deployment, as well as lower interest costs from our refinancing activity, we are raising our full-year Core FFO range," said Olinger.

The Core FFO and earnings guidance reflected above excludes any potential future gains (losses) recognized from real estate transactions or early extinguishment of debt. In reconciling from net earnings to Core FFO, Prologis makes certain adjustments, including but not limited to real estate depreciation and amortization

expense, gains (losses) recognized from real estate transactions and early extinguishment of debt or redemption of preferred stock, impairment charges, deferred taxes, and unrealized gains or losses on foreign currency or derivative activity.

The difference between the company's Core FFO and net earnings guidance for 2014 predominantly relates to real estate depreciation and recognized gains or losses on real estate transactions and early extinguishment of debt.

WEBCAST & CONFERENCE CALL INFORMATION

The company will host a webcast/conference call to discuss quarterly results, current market conditions and future outlook today, July 22, at 12:00 p.m. U.S. Eastern Time. Interested parties are encouraged to access the live webcast by clicking the microphone icon located near the top of the opening page of the Prologis Investor Relations website (http://ir.prologis.com). Interested parties also can participate via conference call by dialing +1 877-256-7020 (from the U.S. and Canada toll free) or +1 973-409-9692 (from all other countries) and entering conference code 48765449.

A telephonic replay will be available from July 23 through August 23 at +1 855-859-2056 (from the U.S. and Canada) or +1 404-537-3406 (from all other countries), and entering conference code 48765449. The webcast replay will be posted when available in the "Events & Presentations" section of Investor Relations on the Prologis website.

ABOUT PROLOGIS

Prologis, Inc., is the leading owner, operator and developer of industrial real estate, focused on global and regional markets across the Americas, Europe and Asia. As of June 30, 2014, Prologis owned or had investments in, on a wholly owned basis or through co-investment ventures, properties and development projects expected to total approximately 571 million square feet (53 million square meters) in 21 countries. The company leases modern distribution facilities to more than 4,700 customers, including manufacturers, retailers, transportation companies, third-party logistics providers and other enterprises.

The statements in this document that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are based on current expectations, estimates and projections about the industry and markets in which Prologis operates, management's beliefs and assumptions made by management. Such statements involve

uncertainties that could significantly impact Prologis' financial results. Words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates," variations of such words and similar expressions are intended to identify such forward-looking statements, which generally are not historical in nature. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future — including statements relating to rent and occupancy growth, development activity and changes in sales or contribution volume of properties, disposition activity, general conditions in the geographic areas where we operate, our debt and financial position, our ability to form new coinvestment ventures and the availability of capital in existing or new co-investment ventures — are forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Although we believe the expectations reflected in any forwardlooking statements are based on reasonable assumptions, we can give no assurance that our expectations will be attained and therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. Some of the factors that may affect outcomes and results include, but are not limited to: (i) national, international, regional and local economic climates, (ii) changes in financial markets, interest rates and foreign currency exchange rates, (iii) increased or unanticipated competition for our properties, (iv) risks associated with acquisitions, dispositions and development of properties, (v) maintenance of real estate investment trust ("REIT") status and tax structuring, (vi) availability of financing and capital, the levels of debt that we maintain and our credit ratings, (vii) risks related to our investments in our co-investment ventures and funds, including our ability to establish new co-investment ventures and funds, (viii) risks of doing business internationally, including currency risks, (ix) environmental uncertainties, including risks of natural disasters, and (x) those additional factors discussed in reports filed with the Securities and Exchange Commission by Prologis under the heading "Risk Factors." Prologis undertakes no duty to update any forward-looking statements appearing in this document.

- The information presented excludes the co-investment ventures Prologis DFS Fund I and Prologis Mexico Fondo Logistico, due to the investment size of these ventures.
- (B) Promote opportunity is every three years.
- (C) Promote opportunity is every year.

- Values represent Prologis' adjusted basis and may not be comparable to values reflected in the entities' stand alone financial statements calculated on a different basis.
- Throughout this document, we use the most recent public information for this co-investment venture. If the co-investment venture acquires properties during the period that is reported, we estimate the entire quarter of NOI based on the results of the properties while owned by Prologis.

We have a 50% ownership interest in and consolidate an entity that in turn has an ownership interest in various entities that are accounted for on the equity method ("Brazil Fund"). We also have other Brazil joint ventures that we account for using the equity method. Prologis share in these Brazil entities is reflected at our effective economic ownership.

6.6%

Weighted average stabilized cap rate on building dispositions and contributions

6.4%

⁽A) For contributions, this amount reflects net cash proceeds to Prologis (net of units received for partial consideration).

⁽B) This is a consolidated co-investment venture.

C) In June 2014, we completed the initial public offering for FIBRA Prologis, a Mexican real estate investment trust, on the Mexican Stock Exchange. We received equity units of FIBRA Prologis in exchange for our investment in 177 properties aggregating 29.7 million square feet. The portfolio of properties were purchased by FIBRA Prologis from us and two of our co-investment ventures (Mexico Fondo Logistico, a consolidated venture, and Prologis Mexico Industrial Fund, an unconsolidated venture). Our ownership in FIBRA Prologis is approximately 45%.

			Total liquidity	\$3,633

The maturity date for the global senior credit facility and multi-currency term loan is reflected at the extended maturity date.

Interest rate is based on the effective rate (which includes the amortization of related premiums and discounts) assuming the net premiums (discounts) associated with the respective debt were included in the

We hedge the net assets of certain international subsidiaries using foreign currency forward contracts (net investment hedges) to offset economic exposure by locking in a forward exchange rates. As of June 30, 2014 we had contracts with a notional amount of €847.6 million (\$1,137.0 million) and ¥24.1 billion (\$250 million), scheduled to mature in 2014, 2017, and 2018.

Interest rate is based on the effective rate and weighted based on borrowings outstanding.

Second Quarter 2014

Please refer to our annual and quarterly financial statements filed with the Securities and Exchange Commission on Forms 10-K and 10-Q and other public reports for further information about us and our business. Certain amounts from previous periods presented in the Supplemental Information have been reclassified to conform to the current presentation.

Acquisition cost, as presented for building acquisitions, represents the economic cost and not necessarily what is capitalized. It includes the initial purchase price; the effects of marking assumed debt to market; if applicable, all due diligence and lease intangibles; and estimated acquisition capital expenditures including leasing costs to achieve stabilization.

Adjusted EBITDA. We use Adjusted EBITDA to measure both our operating performance and liquidity. We calculate Adjusted EBITDA beginning with consolidated net earnings (loss) and removing the effect of interest, income taxes, depreciation and amortization, impairment charges, third party acquisition expenses related to the acquisition of real estate, gains or losses from the acquisition or disposition of investments in real estate, gains or losses on early extinguishment of debt and derivative contracts (including cash charges), similar adjustments we make to our FFO measures (see definition below), and other non-cash charges or gains (such as stock based compensation amortization and unrealized gains or losses on foreign currency and derivative activity and related amortization). We make adjustments to reflect our economic ownership in each entity, whether consolidated or unconsolidated.

We consider Adjusted EBITDA to provide investors relevant and useful information because it permits investors to view income from operations on an unleveraged basis before the effects of income tax, non-cash depreciation and amortization expense and other items (including stockbased compensation amortization and certain unrealized gains and losses), gains or losses from the acquisition or disposition of investments in real estate, items that affect comparability, and other significant non-cash items. We also include a pro forma adjustment in Adjusted EBITDA to reflect a full period of NOI on the operating properties we acquire, stabilize or dispose of during the quarter assuming the transaction occurred at the beginning of the quarter. By excluding interest expense, Adjusted EBITDA allows investors to measure our operating performance independent of our capital structure and indebtedness and, therefore, allows for a more meaningful comparison of our operating performance to that of other companies, both in the real estate industry and in other industries. Gains and losses on the early extinguishment of debt generally include the costs of repurchasing debt securities. While not infrequent or unusual in nature, these items result from market fluctuations that can have inconsistent effects on our results of operations. The economics underlying these items reflect market and financing conditions in the short-term but can obscure our performance and the value of our long-term investment decisions and strategies.

We believe that Adjusted EBITDA helps investors to analyze our ability to meet interest payment obligations and to make quarterly preferred share dividends. We believe that investors should consider Adjusted EBITDA in conjunction with net earnings (the primary measure of our performance) and the other required Generally Accepted Accounting Principles ("GAAP") measures of our performance and liquidity, to improve their understanding of our operating results and liquidity, and to make more meaningful comparisons of our performance against other companies. By using Adjusted EBITDA, an investor is assessing the earnings generated by our operations but not taking into account the eliminated expenses or gains incurred in connection with such operations. As a result, Adjusted EBITDA has limitations as an analytical tool and should be used in conjunction with our required GAAP presentations. Adjusted EBITDA does not reflect our historical cash expenditures or future cash requirements for working capital, capital expenditures, distribution requirements or contractual commitments. Adjusted EBITDA, also does not reflect the cash required to make interest and principal payments on our outstanding debt.

While EBITDA is a relevant and widely used measure of operating performance, it does not represent net income or cash flow from operations as defined by GAAP and it should not be considered as an alternative to those indicators in evaluating operating performance or liquidity. Further, our computation of Adjusted EBITDA may not be comparable to EBITDA reported by other companies. We compensate for the limitations of Adjusted EBITDA by providing investors with

financial statements prepared according to GAAP, along with this detailed discussion of Adjusted EBITDA and a reconciliation of Adjusted EBITDA to consolidated net earnings (loss), a GAAP measurement.

Adjusted Cash NOI (Actual). A reconciliation of our rental income and rental expenses included in our Statement of Operations to adjusted cash NOI for the consolidated operating portfolio for purposes of the Net Asset Value calculation is as follows *(in thousands)*:

Rental income	\$ 381,273
Rental expenses	(109,576)
NOI	271,697
Net termination fees and adjustments (a)	(1,118)
Less: actual NOI for development portfolio and other	(11,260)
Less: properties contributed or sold (b)	(14,383)
Less: third party share of NOI	(13,382)
Adjusted NOI for consolidated operating portfolio owned at June 30, 2014	231,554
Straight-lined rents (c)	(10,580)
Free rent (c)	11,821
Amortization of lease intangibles (c)	6.776
Less: third party share	(304)
Second Quarter Adjusted Cash NOI (Actual)	\$ 239,267

- (a) Net termination fees generally represent the gross fee negotiated at the time a customer is allowed to terminate its lease agreement offset by that customer's rent leveling asset or liability, if any, that has been previously recognized. Removing the net termination fees from rental income allows for the calculation of Adjusted Cash NOI (Pro forma) to include only rental income that is indicative of the property's recurring operating performance.
- (b) The actual NOI for properties that were contributed or sold during the three-month period is removed
- (c) Straight-lined rents, free rent amount, and amortization of lease intangibles (above and below market leases) are removed from rental income for the Operating Portfolio to allow for the calculation of a cash yield.

Adjusted Cash NOI (Pro forma) consists of Adjusted Cash NOI (Actual) for the properties generating net operating income in our Operating Portfolio adjusted to reflect NOI for a full quarter for operating properties that were acquired or stabilized during the quarter. Adjusted Cash NOI (Pro forma) for the properties in our Development Portfolio is based on current Total Expected Investment and an estimated stabilized yield.

Assets Under Management ("AUM") represents the estimated value of the real estate we own or manage through both our consolidated and unconsolidated entities. We calculate AUM by adding the third party investors' share of the estimated fair value of the assets in the co-investment ventures to our share of total market capitalization (calculated using the market price of our equity plus our share of total debt).

Second Quarter 2014

(a) Actual promote revenue and related expenses for the quarter, if any, are removed from the EBITDA amount for the quarter before annualizing, then the actual promote revenue and related expenses for the previous twelve months are added to the annualized number. For the three months ended June 30, 2014 and March 31, 2014, actual promote revenue, net of related expenses, for the previous twelve months was \$31.5 million and \$15.1 million, respectively.

Second Quarter 2014

Development Margin is calculated on developed properties as the estimated value at Stabilization minus estimated total investment, before closing costs, the impact of any deferred rents, taxes or third party promotes net of deferred amounts on contributions, divided by the estimated total investment.

Development Portfolio includes industrial properties that are under development and properties that are developed but have not met Stabilization.

Discontinued Operations. In April 2014, the FASB issued a standard updating the accounting and disclosure regarding discontinued operations. Early adoption on a prospective basis is allowed, therefore, we have adopted this standard as of January 1, 2014. As a result, none of our property dispositions in 2014 met the criteria to be classified as discontinued operations. The operations of the properties that were disposed of to third parties during 2013 that met the criteria for discontinued operations, including the aggregate net gains or losses recognized upon their disposition, are presented as discontinued operations in our *Consolidated Statements of Operations*. The income attributable to these properties was as follows (in thousands):

	Three Months Ended June 30, 2013	Six Months Ended June 30, 2013
Rental income	\$ 9,424	\$ 20,692
Rental expenses	(3,222)	(6,961)
Depreciation and amortization	(3,755)	(9,066)
Interest expense	(307)	(732)
Income attributable to disposed properties and assets held		
for sale	\$ 2,140	\$ 3,933

Estimated Build Out (TEI and sq ft)- represents the estimated TEI and finished square feet available for rent upon completion of an industrial building on existing parcels of land.

FFO, as defined by Prologis; Core FFO; Core AFFO (collectively referred to as "FFO"). FFO is a non-GAAP measure that is commonly used in the real estate industry. The most directly comparable GAAP measure to FFO is net earnings. Although the National Association of Real Estate Investment Trusts ("NAREIT") has published a definition of FFO, modifications to the NAREIT calculation of FFO are common among REITs, as companies seek to provide financial measures that meaningfully reflect their business.

FFO is not meant to represent a comprehensive system of financial reporting and does not present, nor do we intend it to present, a complete picture of our financial condition and operating performance. We believe net earnings computed under GAAP remains the primary measure of performance and that FFO is only meaningful when it is used in conjunction with net earnings computed under GAAP. Further, we believe our consolidated financial statements, prepared in accordance with GAAP, provide the most meaningful picture of our financial condition and our operating performance.

NAREIT's FFO measure adjusts net earnings computed under GAAP to exclude historical cost depreciation and gains and losses from the sales, along with impairment charges, of previously depreciated properties. We agree that these NAREIT adjustments are useful to investors for the following reasons:

(i) historical cost accounting for real estate assets in accordance with GAAP assumes, through depreciation charges, that the value of real estate assets diminishes predictably over time. NAREIT stated in its White Paper on FFO "since real estate asset values have historically risen or fallen with market conditions, many industry investors have considered presentations of operating results for real estate companies that use historical cost accounting to be insufficient by themselves." Consequently, NAREIT's definition of FFO reflects the fact that

- real estate, as an asset class, generally appreciates over time and depreciation charges required by GAAP do not reflect the underlying economic realities.
- (iii) REITs were created as a legal form of organization in order to encourage public ownership of real estate as an asset class through investment in firms that were in the business of long-term ownership and management of real estate. The exclusion, in NAREIT's definition of FFO, of gains and losses from the sales, along with impairment charges, of previously depreciated operating real estate assets allows investors and analysts to readily identify the operating results of the long-term assets that form the core of a REIT's activity and assists in comparing those operating results between periods. We include the gains and losses (including impairment charges) from dispositions of land and development properties, as well as our proportionate share of the gains and losses (including impairment charges) from dispositions of development properties recognized by our unconsolidated entities, in our definition of FFO.

Our FFO Measures

At the same time that NAREIT created and defined its FFO measure for the REIT industry, it also recognized that "management of each of its member companies has the responsibility and authority to publish financial information that it regards as useful to the financial community." We believe stockholders, potential investors and financial analysts who review our operating results are best served by a defined FFO measure that includes other adjustments to net earnings computed under GAAP in addition to those included in the NAREIT defined measure of FFO. Our FFO measures are used by management in analyzing our business and the performance of our properties and we believe that it is important that stockholders, potential investors and financial analysts understand the measures management uses.

We use these FFO measures, including by segment and region, to: (i) evaluate our performance and the performance of our properties in comparison to expected results and results of previous periods, relative to resource allocation decisions; (ii) evaluate the performance of our management; (iii) budget and forecast future results to assist in the allocation of resources; (iv) assess our performance as compared to similar real estate companies and the industry in general; and (v) evaluate how a specific potential investment will impact our future results. Because we make decisions with regard to our performance with a long-term outlook, we believe it is appropriate to remove the effects of short-term items that we do not expect to affect the underlying long-term performance of the properties. The long-term performance of our properties is principally driven by rental income. While not infrequent or unusual, these additional items we exclude in calculating FFO, as defined by Prologis, are subject to significant fluctuations from period to period that cause both positive and negative short-term effects on our results of operations in inconsistent and unpredictable directions that are not relevant to our long-term outlook.

We use our FFO measures as supplemental financial measures of operating performance. We do not use our FFO measures as, nor should they be considered to be, alternatives to net earnings computed under GAAP, as indicators of our operating performance, as alternatives to cash from operating activities computed under GAAP or as indicators of our ability to fund our cash needs.

FFO, as defined by Prologis

To arrive at FFO, as defined by Prologis, we adjust the NAREIT defined FFO measure to exclude:

- deferred income tax benefits and deferred income tax expenses recognized by our subsidiaries;
- (ii) current income tax expense related to acquired tax liabilities that were recorded as deferred tax liabilities in an acquisition, to the extent the expense is offset with a deferred income tax benefit in GAAP earnings that is excluded from our defined FFO measure;
- (iii) foreign currency exchange gains and losses resulting from debt transactions between us and our foreign consolidated subsidiaries and our foreign unconsolidated entities;
- (iv) foreign currency exchange gains and losses from the remeasurement (based on current foreign currency exchange rates) of certain third party debt of our foreign consolidated subsidiaries and our foreign unconsolidated entities; and

Notes and Definitions

(continued)

Second Quarter 2014

 mark-to-market adjustments and related amortization of debt discounts associated with derivative financial instruments.

We calculate *FFO*, as defined by *Prologis* for our unconsolidated entities on the same basis as we calculate our *FFO*. as defined by *Prologis*.

We believe investors are best served if the information that is made available to them allows them to align their analysis and evaluation of our operating results along the same lines that our management uses in planning and executing our business strategy.

Core FFO

In addition to FFO, as defined by Prologis, we also use Core FFO. To arrive at Core FFO, we adjust FFO, as defined by Prologis, to exclude the following recurring and non-recurring items that we recognized directly or our share of these items recognized by our unconsolidated entities to the extent they are included in FFO, as defined by Prologis:

- (i) gains or losses from acquisition, contribution or sale of land or development properties;
- (ii) income tax expense related to the sale of investments in real estate and third-party acquisition costs related to the acquisition of real estate;
- (iii) impairment charges recognized related to our investments in real estate generally as a result of our change in intent to contribute or sell these properties;
- (iv) gains or losses from the early extinguishment of debt;
- (v) merger, acquisition and other integration expenses; and
- (vi) expenses related to natural disasters.

We believe it is appropriate to further adjust our FFO, as defined by Prologis for certain recurring items as they were driven by transactional activity and factors relating to the financial and real estate markets, rather than factors specific to the on-going operating performance of our properties or investments. The impairment charges we have recognized were primarily based on valuations of real estate, which had declined due to market conditions, that we no longer expected to hold for long-term investment. Over the last few years, we made it a priority to strengthen our financial position by reducing our debt, our investment in certain low yielding assets and our exposure to foreign currency exchange fluctuations. As a result, we changed our intent to sell or contribute certain of our real estate properties and recorded impairment charges when we did not expect to recover the costs of our investment. Also, we have purchased portions of our debt securities when we believed it was advantageous to do so, which was based on market conditions, and in an effort to lower our borrowing costs and extend our debt maturities. As a result, we have recognized net gains or losses on the early extinguishment of certain debt due to the financial market conditions at that time. In addition, we and our co-investment ventures make acquisitions of real estate and we believe the costs associated with these transactions are transaction based and not part of our core operations.

We analyze our operating performance primarily by the rental income of our real estate and the revenue driven by our strategic capital business, net of operating, administrative and financing expenses. This income stream is not directly impacted by fluctuations in the market value of our investments in real estate or debt securities. As a result, although these items have had a material impact on our operations and are reflected in our financial statements, the removal of the effects of these items allows us to better understand the core operating performance of our properties over the long-term.

We use *Core FFO*, including by segment and region, to: (i) evaluate our performance and the performance of our properties in comparison to expected results and results of previous periods, relative to resource allocation decisions; (ii) evaluate the performance of our management; (iii) budget and forecast future results to assist in the allocation of resources; (iv) provide guidance to the financial markets to understand our expected operating performance; (v) assess our operating performance as compared to similar real estate companies and the industry in general; and (vi)

evaluate how a specific potential investment will impact our future results. Because we make decisions with regard to our performance with a long-term outlook, we believe it is appropriate to remove the effects of items that we do not expect to affect the underlying long-term performance of the properties we own. As noted above, we believe the long-term performance of our properties is principally driven by rental income. We believe investors are best served if the information that is made available to them allows them to align their analysis and evaluation of our operating results along the same lines that our management uses in planning and executing our business strategy.

Core AFFO

To arrive at Core AFFO, we adjust Core FFO to further exclude our share of; (i) straight-line rents; (ii) amortization of above- and below-market lease intangibles; (iii) recurring capital expenditures; (iv) amortization of management contracts; (v) amortization of debt premiums and discounts, net of amounts capitalized, and; (vi) stock compensation expense.

We believe Core AFFO provides a meaningful indicator of our ability to fund cash needs, including cash distributions to our stockholders.

Limitations on Use of our FFO Measures

While we believe our defined FFO measures are important supplemental measures, neither NAREIT's nor our measures of FFO should be used alone because they exclude significant economic components of net earnings computed under GAAP and are, therefore, limited as an analytical tool. Accordingly, these are only a few of the many measures we use when analyzing our business. Some of these limitations are:

- The current income tax expenses and acquisition costs that are excluded from our defined FFO measures represent the taxes and transaction costs that are payable.
- Depreciation and amortization of real estate assets are economic costs that are excluded from FFO. FFO is limited, as it does not reflect the cash requirements that may be necessary for future replacements of the real estate assets. Further, the amortization of capital expenditures and leasing costs necessary to maintain the operating performance of industrial properties are not reflected in FFO.
- Gains or losses from property acquisitions and dispositions or impairment charges related to
 expected dispositions represent changes in value of the properties. By excluding these gains
 and losses, FFO does not capture realized changes in the value of acquired or disposed
 properties arising from changes in market conditions.
- The deferred income tax benefits and expenses that are excluded from our defined FFO
 measures result from the creation of a deferred income tax asset or liability that may have to
 be settled at some future point. Our defined FFO measures do not currently reflect any
 income or expense that may result from such settlement.
- The foreign currency exchange gains and losses that are excluded from our defined FFO
 measures are generally recognized based on movements in foreign currency exchange rates
 through a specific point in time. The ultimate settlement of our foreign currency-denominated
 net assets is indefinite as to timing and amount. Our FFO measures are limited in that they do
 not reflect the current period changes in these net assets that result from periodic foreign
 currency exchange rate movements.
- The gains and losses on extinguishment of debt that we exclude from our Core FFO, may
 provide a benefit or cost to us as we may be settling our debt at less or more than our future
 obligation.
- The merger, acquisition and other integration expenses and the natural disaster expenses that we exclude from Core FFO are costs that we have incurred.

We compensate for these limitations by using our FFO measures only in conjunction with net earnings computed under GAAP when making our decisions. This information should be read with our complete consolidated financial statements prepared under GAAP. To assist investors in

0.42%

Second Quarter 2014

compensating for these limitations, we reconcile our defined FFO measures to our net earnings computed under GAAP.

Fixed Charge Coverage is defined as Adjusted EBITDA divided by total fixed charges. Fixed charges consist of net interest expense adjusted for amortization of finance costs and debt discount (premium), capitalized interest, and preferred stock dividends. We use fixed charge coverage to measure our liquidity. We believe that fixed charge coverage is relevant and useful to investors because it allows fixed income investors to measure our ability to make interest payments on outstanding debt and make distributions/dividends to preferred unitholders/stockholders. Our computation of fixed charge coverage is not calculated in accordance with applicable SEC rules and may not be comparable to fixed charge coverage reported by other companies.

General and Administrative Expenses ("G&A") were as follows (in thousands):

	Three Months Ended June 30,			Six Months Ended June 30,		
		2014	2013		2014	2013
Gross overhead	\$	117,935 \$	109,631	\$	235,184 \$	216,467
Less: rental expenses		(7,497)	(7,140)		(15,620)	(16,697)
Less: strategic capital expenses		(27,837)	(25,006)		(52,000)	(44,915)
Capitalized amounts		(22,226)	(22,576)		(43,986)	(43,749)

Net interest expense	\$	80,184	\$	92,214	\$	165,707	\$	206,854

Investment Capacity is our estimate of the gross real estate, which could be acquired by our coinvestment ventures through the use of existing equity commitments from us and our partners plus up to the ventures maximum leverage limits.

Market Classification

- Global Markets feature large population centers with high per-capita consumption and are located near major seaports, airports, and ground transportation systems.
- Regional Markets benefit from large population centers but typically are not as tied to
 the global supply chain, but rather serve local consumption and are often less supply
 constrained. Markets included as regional markets include: Austin, Charlotte, Cincinnati,
 Columbus, Denver, Hungary, Indianapolis, Juarez, Las Vegas, Louisville, Memphis,
 Nashville, Orlando, Phoenix, Portland, Reynosa, San Antonio, Slovakia, Sweden and
 Tijuana.
- Other Markets represent a small portion of our portfolio that is located outside global and regional markets. These markets include: Austria, Boston, El Paso, Jacksonville, Kansas City, Norfolk, Reno, Romania, Salt Lake City, Savannah and St Louis.

Net Asset Value ("NAV"). We consider NAV to be a useful supplemental measure of our operating performance because it enables both management and investors to estimate the fair value of our business. The assessment of the fair value of a particular segment of our business is subjective in that it involves estimates and can be calculated using various methods. Therefore, we have presented the financial results and investments related to our business segments that we

Second Quarter 2014

believe are important in calculating our NAV but have not presented any specific methodology nor provided any guidance on the assumptions or estimates that should be used in the calculation.

The components of NAV do not consider the potential changes in rental and fee income streams or the franchise value associated with our global operating platform, strategic capital platform, or development platform.

Net Effective Rent Change (GAAP) represents the change on operating portfolio properties in net effective rental rates (average rate over the lease term) on new and renewed leases signed during the period as compared with the previous effective rental rates in that same space.

Net Operating Income ("NOI") represents rental income less rental expenses.

Noncontrolling Interest. The following table includes information for each entity we consolidate and in which we own less than 100% (*dollars in thousands*):

	Ownership Percentage	Noncontrolling Interest	Real Estate	Debt
Brazil Fund	50.0%	77,838	-	
Prologis U.S. Logistics Venture	55.0%	435,875	1,001,754	-
Other consolidated entities	various	143,698	1,020,570	26,804
Limited partners in the Operating Partnership		47,695		-
Noncontrolling interests		\$ 705,106	\$ 2,022,324	\$ 26,804

Operating Portfolio includes stabilized industrial properties in our owned and managed portfolio. A developed property moves into the Operating Portfolio when it meets Stabilization.

Pro-Rata Balance Sheet and Operating Information. The consolidated amounts shown are derived from and prepared on a consistent basis with our consolidated financial statements and are adjusted to remove the amounts attributable to non-controlling interests. The Prologis share of unconsolidated co-investment ventures column was derived on an entity-by-entity basis by applying our ownership percentage to each line item to calculate our share of that line item. For purposes of balance sheet data, we used our ownership percentage at the end of the period and for operating information, we used our average ownership percentage for the period, consistent with how we calculate our share of net earnings (loss) during the period. We used a similar calculation to derive the noncontrolling interests' share of each line item. In order to present the total owned and managed portfolio, we added our investors' share of each line item in the unconsolidated co-investment ventures and the noncontrolling interests share of each line item to the Prologis Total Share.

Prologis Share represents our proportionate economic ownership of each entity included in our total owned and managed portfolio.

Rental Income included the following (in thousands):

	Three Mon June	Ended	Six Mon Jur	ths I ne 30	
	2014	2013	2014		2013
Rental income\$	290,803	\$ 285,759	\$ 586,309	\$	626,114
Amortization of lease intangibles	(7,280)	(8,164)	(14,974)		(17,949)
Rental expense recoveries	86,812	76,485	174,174		173,373
Straight-lined rents	10,938	9,876	24,004		26,562
\$	381,273	\$ 363,956	\$ 769,513	\$	808,100

Same Store. We evaluate the operating performance of the operating properties we own and manage using a "Same Store" analysis because the population of properties in this analysis is consistent from period to period, thereby eliminating the effects of changes in the composition of the portfolio on performance measures. We include the properties included in our owned and managed portfolio that were in operation at January 1, 2013 and throughout the full periods in both 2013 and 2014. We have removed all properties that were disposed of to a third party from the population for both periods. We believe the factors that impact rental income, rental expenses and NOI in the Same Store portfolio are generally the same as for the total operating portfolio. In order to derive an appropriate measure of period-to-period operating performance, we remove the effects of foreign currency exchange rate movements by using the current exchange rate to translate from local currency into U.S. dollars, for both periods.

Our same store measures are non-GAAP measures that are commonly used in the real estate industry and are calculated beginning with rental income and rental expenses from the financial statements prepared in accordance with GAAP. It is also common in the real estate industry and expected from the analyst and investor community that these numbers be further adjusted to remove certain non-cash items included in the financial statements prepared in accordance with GAAP to reflect a cash same store number. In order to clearly label these metrics, we call one Same Store NOI- GAAP and one Same Store NOI-Adjusted Cash. As these are non-GAAP measures they have certain limitations as an analytical tool and may vary among real estate companies. As a result, we provide a reconciliation from our financial statements prepared in accordance with GAAP to Same Store NOI-GAAP and then to Same Store NOI-Adjusted Cash with explanations of how these metrics are calculated and adjusted.

The following is a reconciliation of our consolidated rental income, rental expenses and NOI, as included in the Consolidated Statements of Operations, to the respective amounts in our Same Store portfolio analysis (dollars in thousands):

	Three Months Ended June 30,				
	2014	2013	Change (%)		
Rental Income:					
Per the Consolidated Statements of Operations	\$ 381,273	\$ 363,956			
Properties not included and other adjustments (a)	(43,630)	(25,636)			
Unconsolidated Co-Investment Ventures	459,293	434,360			
Same Store - Rental Income	\$ 796,936	\$ 772,680	3.1%		
Rental Expense:					
Per the Consolidated Statements of Operations	\$ 109,576	\$ 109,837			
Properties not included and other adjustments (b)	(8,114)	(7,499)			
Unconsolidated Co-Investment Ventures	111,052	107,443			
Same Store - Rental Expense	\$ 212,514	\$ 209,781	1.3%		
NOI-GAAP:					
Per the Consolidated Statements of Operations	\$ 271,697	\$ 254,119			
Properties not included and other adjustments	(35,516)	(18,137)			
Unconsolidated Co-Investment Ventures	348,241	326,917			
Same Store - NOI - GAAP	\$ 584,422	\$ 562,899	3.8%		
NOI-Adjusted Cash:	-				
Same store- NOI - GAAP	\$ 584,422	\$ 562,899			
Adjustments (c)	(1,830)	(9,539)			
Same Store - NOI- Adjusted Cash	\$ 582,592	\$ 553,360	5.3%		

Second Quarter 2014

- (a) To calculate Same Store rental income, we exclude the net termination and renegotiation fees to allow us to evaluate the growth or decline in each property's rental income without regard to items that are not indicative of the property's recurring operating performance.
- (b) To calculate Same Store rental expense, we include an allocation of the property management expenses for our consolidated properties based on the property management fee that is provided for in the individual management agreements under which our wholly owned management companies provide property management services (generally the fee is based on a percentage of revenue). On consolidation, the management fee income and expenses are eliminated and the actual cost of providing property management services is recognized.
- (c) In order to derive Same Store- NOI Adjusted Cash, we adjust Same Store- NOI- GAAP to exclude non-cash items included in our rental income in our GAAP financial statements, including straight line rent adjustments and adjustments related to purchase accounts to reflect leases at fair value at the time of acquisition.

Same Store Average Occupancy represents the average occupied percentage of the Same Store portfolio for the period.

Stabilization is defined when a property that was developed has been completed for one year or is 90% occupied. Upon stabilization, a property is moved into our Operating Portfolio.

Strategic Capital NOI represents strategic capital income less strategic capital expenses.

Tenant Retention is the square footage of all leases rented by existing tenants divided by the square footage of all expiring and rented leases during the reporting period, excluding the square footage of tenants that default or buy-out prior to expiration of their lease, short-term tenants and the square footage of month-to-month leases.

Total Expected Investment ("TEI") represents total estimated cost of development or expansion, including land, development and leasing costs. TEI is based on current projections and is subject to change. Non-U.S. dollar investments are translated to U.S. dollars using the exchange rate at period end or the date of development start for purposes of calculating development starts in any period.

Turnover Costs represent the costs incurred in connection with the signing of a lease, including leasing commissions and tenant improvements. Tenant improvements include costs to prepare a space for a new tenant and for a lease renewal with the same tenant. It excludes costs to prepare a space that is being leased for the first time (i.e. in a new development property).

Value-Added Acquisitions are properties we acquire for which we believe the discount in pricing attributed to the operating challenges could provide greater returns post-stabilization than the returns of stabilized properties that are not Value-Added Acquisitions. Value Added Acquisitions must have one or more of the following characteristics: (i) existing vacancy in excess of 20%; (ii) short term lease roll-over, typically during the first two years of ownership; (iii) significant capital improvement requirements in excess of 10% of the purchase price and must be invested within the first two years of ownership.

Value-Added Conversions represent the repurposing of industrial properties to a higher and better use, including office, residential, retail, research and development, data center, self storage or manufacturing with the intent to ultimately sell the property once repositioned. Activities required to prepare the property for conversion to a higher and better use may include such activities as rezoning, re-designing, re-constructing, and re-tenanting. The economic gain on sales of value added conversions represents the amount by which the sales proceeds exceed our original cost in dollars and percentages.

Value Creation represents the value that we will create through our development and leasing activities. We calculate value creation by estimating the NOI that the property will generate at

Stabilization and applying an estimated stabilized capitalization rate applicable to that property. The value creation is calculated as the amount by which the estimated value exceeds our total expected investment and does not include any fees or promotes we may earn.

Weighted Average Estimated Stabilized Yield is calculated as NOI assuming stabilized occupancy divided by Acquisition Cost or TEI, as applicable.
