Deluxe and MRI Software Partner to Enhance Payment Capabilities for Property Management Companies

Newly expanded payment capabilities provide flexible rent payment options, faster settlement, and simplified financial workflows

MINNEAPOLIS--(BUSINESS WIRE)-- Deluxe (NYSE: DLX), a trusted Payments and Data company, today announced a strategic partnership with MRI Software, a global leader in real estate solutions serving more than 45,000 clients across 170 countries.

MRI has named Deluxe as the official processing partner for its rent payment solution, chosen for its ability to simplify complex payment operations at scale and enhance existing capabilities for residential and commercial property management clients through frictionless rent collection, accelerated funding, and convenient payment options.

Deluxe's payment gateway integration with MRI RentPayment enables property managers to process both ACH and card transactions through a single API endpoint. Additionally, the solution supports complex funding scenarios, including the ability to route transactions across multiple bank accounts.

"By integrating the Deluxe Payments Platform with MRI's RentPayment software, we're helping property managers streamline rent collection while delivering more choice and convenience for tenants and residents," said Brian Mahony, President of Merchant Services at Deluxe.

A solution purpose-built for property management

Property management organizations will benefit from the integrated solution in several ways:

- **Same-day or next-day payment processing**, cutting settlement time by more than half.
- **Payment batching**, meaning fewer deposits and clearer visibility into the transactions behind each one.
- **Clearer reporting and statement details** that make reconciliation and tracking funds simpler and enable ACH reporting in hours instead of days.
- **Easier self-service** through consistent batching and settlement logic, along with better ACH traceability, to help simplify accounting workflows

The system's product-agnostic design supports both ACH and card transactions through a single integration point, allowing enterprise property management firms to manage payment flows across diverse portfolios more efficiently.

"MRI already works with Deluxe through lockbox services that support real estate clients, and we're excited to expand that relationship," said Carla Hinson, VP of North America

Solution and Innovation at MRI Software. “In selecting Deluxe as the processing partner for our RentPayment solution, not only are we laying the foundation for future growth, but we’re also focused on delivering convenient, easy payment experiences for residents and tenants by accelerating processing times, simplifying settlement workflows, and improving reporting and visibility.”
