UiPath Announces Partnership with Snowflake to Unite Agentic Automation and Snowflake Cortex AI

NEW YORK--(BUSINESS WIRE)-- **UiPath FUSION, LAS VEGAS --** UiPath (NYSE: PATH), a global leader in agentic automation, today announced a partnership with Snowflake, the AI Data Cloud company, uniting UiPath's Agentic Automation platform with Snowflake Cortex AI. This collaboration empowers businesses to quickly turn data insights into faster and smarter autonomous actions, bridging the gap between vision and impact across enterprise business processes.

The combination of UiPath's Agentic Automation Platform and Snowflake's Cortex AI Agents integrates best-in-class enterprise-grade automation with one of the leading modern data platforms. The integration expands the ability of UiPath Maestro to orchestrate low-code, no-code, and other specialized agents. Customers can now orchestrate a powerful new class of data agents that act directly on insights from structured and unstructured data in Snowflake.

Snowflake Cortex Agents enable organizations to build powerful AI agents that retrieve insights by orchestrating across all enterprise data. Built on the high-accuracy retrieval of Cortex Analyst for structured data and Cortex Search for unstructured data, these agents solve the critical mismatch between AI models and data, allowing business users to ask complex questions and receive trusted answers grounded in the full context of their business. UiPath agents can now take these insights to streamline existing processes and create new processes without overhauling the legacy systems or established workflows.

"At Snowflake, we believe that data should be the foundation of every intelligent enterprise," said Baris Gultekin, Vice President of AI, Snowflake. "By connecting with UiPath's Agentic Automation, customers can now move seamlessly from insight to action. Together, we're empowering organizations to not only understand their data in real time, but also to execute on it with precision—accelerating innovation, improving efficiency, and driving meaningful business outcomes."

"Data is only as valuable as the actions it drives," said Graham Sheldon, Chief Product Officer at UiPath. "By combining Snowflake Cortex AI with the UiPath Platform, customers can turn trusted insights into orchestrated action without reworking their existing systems. And because our platform is vendor-agnostic, they can do it on their terms, scaling agentic automation across a flexible, secure, and open ecosystem."
