ATI Radeon(TM) HD 5870 Eyefinity 6 Edition Graphics Card Wins Prestigious Popular Science 2010 Best of What's New Award

AMD Eyefinity Technology Revolutionized the PC Visual Experience

SUNNYVALE, CA -- (MARKET WIRE) -- 11/17/10 -- [AMD](#) (NYSE: AMD) today announced that the ATI RadeonTM HD 5870 Eyefinity 6 Edition graphics card, driving up to six monitors by way of the revolutionary AMD Eyefinity multi-display Technology, was selected as a 2010 winner of the Popular Science Best of What's New Award.

"The ATI RadeonTM HD 5870 Eyefinity 6 Edition graphics card opened the door to a new era in personal computing," said Matt Skynner, corporate vice president and general manager of AMD Graphics Division. "The ATI RadeonTM HD 5870 Eyefinity 6 Edition allowed PC users to experience the ultimate panoramic computing experience. By bridging the innovation in ATI Eyefinity technology with broad ecosystem support, AMD enabled higher levels of productivity and created a more immersive gaming experience for PC users.

While most PC's require a second graphics card to drive more than two displays, [AMD Eyefinity Technology](#) marked a first for the graphics industry by enabling users to drive up to six monitors with a single graphics card. Additionally the six monitors can be configured as one single large surface or as multiple surfaces by creating groups of two or more monitors.

"For 23 years, Popular Science has honored the innovations that surprise and amaze us -- those that make a positive impact on our world today and challenge our views of what's possible in the future," said Mark Jannot, Editor-in-Chief of Popular Science. "The Best of What's New Award is the magazine's top honor, and the winners -- chosen from among thousands of entrants -- represent the highest level of achievement in their fields."

This is another in a series of awards for AMD Eyefinity technology over the past year, including a [Best of Innovations Award](#) in the computer hardware category at CES 2010.

Since the launch of AMD Eyefinity Technology, the gaming and game development communities have embraced the immersive experience offered through multi-monitor gaming. AMD has continued to develop its End User Experience Program through [AMD Eyefinity technology "Ready" and "Validated" guidelines](#). The AMD Eyefinity Validation and Ready testing process for hardware & software focuses on how end users utilize both hardware and software, and incorporates everything from signal integrity to engineering tests. With over [50 AMD Technology "ready" & "validated" game titles](#), and affordable [AMD Eyefinity Active DP to SL-DVI adapters](#), multi-monitor gaming is fast becoming the preference among gamers and developers alike.

The ATI Radeon[™] HD 5870 Eyefinity 6 graphics card six monitor support started a trend that has quickly waterfallen into even more affordable options in the AMD graphics family.(1) The inclusion of two mini-DisplayPort 1.2 connectors in the newly launched AMD Radeon HD 6850 and HD 6870 graphics cards will allow up to three DisplayPort 1.2 monitors to run off each connector, meaning that these cards will have configurations of 3, 4, 5 and 6 display supports when monitors supporting DisplayPort 1.2 come to market next year.

About AMD

Advanced Micro Devices (NYSE: AMD) is an innovative technology company dedicated to collaborating with customers and technology partners to ignite the next generation of computing and graphics solutions at work, home and play. For more information, visit <http://www.amd.com>.

1. AMD Eyefinity Technology works with games that support non-standard aspect ratios, which is required for panning across multiple displays. To enable more than two displays, additional panels with native DisplayPort[™] connectors, and/or DisplayPort[™] compliant active adapters to convert your monitor's native input to your cards DisplayPort[™] or Mini-DisplayPort[™] connector(s), are required. AMD Eyefinity Technology can support up to 6 displays using a single enabled AMD Radeon[™] graphics card with Windows Vista® or Windows® 7 operating systems -- the number of displays may vary by board design and you should confirm exact specifications with the applicable manufacturer before purchase.
