AMD Foundation Awards Game Design Education Grants to Two Austin Recipients

Boys & Girls Clubs of the Austin Area and Girlstart Receive More Than $100,000 Total for Educational Programming

AUSTIN, TX -- (MARKET WIRE) -- 04/12/11 -- At Game On! Texas, AMD (NYSE: AMD) today announced the AMD Foundation has awarded a $75,000 grant to Girlstart and a $32,500 grant to the Boys & Girls Clubs of the Austin Area to support game design education programs for the two nonprofits. AMD also contributed funds for the creation of technology labs at both groups' Austin facilities.

The grants were awarded in support of AMD's education initiative, AMD Changing the Game, which is designed to inspire students' interest in STEM skill learning by creating video games.

"Students today are digital learners, and video games are their 21st-century chalkboard," said Allyson Peerman, President of the AMD Foundation. "As Boys & Girls Clubs of America and Girlstart have discovered, game design teaches kids valuable math, science, problem-solving and collaboration skills. More importantly, games have been shown to engage students in learning. We are proud to support these two organizations as they bring game design education to more and more of America's youth."

The Girlstart grant will be used to fund the expansion of Girlstart's renowned Summer Camp program in five communities across the nation. Girlstart Summer Camps are week-long educational programs for 4th through 10th graders, developed to increase interest in science, technology, engineering, and math (STEM) subjects and careers. Game development is the cornerstone of the camps. Each girl in Summer Camp develops, programs, and builds her own game -- based around each week's STEM content theme -- and explores STEM content through Girlstart's rich toolbox of game development tools. The camps will serve an estimated 150 girls around the nation and will be held in proximity to AMD sites in Silicon Valley, CA; Bellevue, WA; Ft. Collins, CO; Orlando, FL; and Boston, MA.

"Gaming and game design are integral parts of our curriculum for inspiring girls to pursue STEM careers, and through this grant from AMD, we'll reach a greater group of girls across the nation," said Tamara Hudgins, Executive Director of Girlstart. "STEM education is vitally important, and we're excited for the opportunity this grant affords us to create a fantastic program for advancing STEM education for girls."

The Boys & Girls Clubs of the Austin Area will receive a technology center valued at $25,000 and $7,500 to fund the implementation of the Game Tech curriculum to Club members.

Boys & Girls Clubs of America's Game Tech curriculum offers Club members ages 9-13 the opportunity to explore video game design and teaches systems thinking, introductory

programming and problem-solving skills. The program is also designed to expose members to gaming career fields.

This grant marks the continuation of an ongoing relationship between AMD and [Boys & Girls Clubs of America](), to establish 10 additional Game Tech programs nationwide by the end of 2011.

"The Game Tech program has already proven to be a winning combination of learning and fun for kids at other Clubs where it has been implemented," said Adine Zornow, director of corporate development for Boys & Girls Clubs of America. "We are proud to continue our relationship with AMD, offering the young people we serve across Austin greater access to technology and most importantly the opportunity to leverage skills that will lead them all to a more successful future."

AMD Changing the Game
AMD Changing the Game is designed to take gaming beyond entertainment and inspire youth to learn critical education and life skills by equipping them to create digital games with social content. The program's purpose is to promote the use of youth game development as a tool to inspire learning and improve science, technology, education and math (STEM) skills. The initiative is rooted in AMD's long history of supporting education, along with the company's passion and expertise in the graphics processor and gaming industries.

Since its launch in June 2008, AMD Changing the Game has:

- Funded 33 programs by 21 organizations in the United States, China and Malaysia that enable youth game development
- Co-sponsored the U.S. [National STEM Video Game Challenge]() and joined [Change the Equation]() in support of the US [Educate to Innovate]() campaign
- Co-sponsored, along with the Entertainment Software Association, The Atlantic Intelligence Series [Technologies in Education]() Forum
- Funded the creation and implementation of the [Game Tech]() program at 10 local Boys & Girls Clubs across the country
- Funded the creation of [Level Up!](), a comprehensive online teaching resource providing curricula and tools for middle and high school educators to teach students video game design and improve their STEM and language arts skills
- Funded the creation of [a social impact game community]() within the [Gamestar Mechanic]() game development platform
- Funded the creation of the [AMD Game Zone]() within the [Whyville.net]() virtual learning world
- Funded the development of the [World Wide Workshop]() Foundation's [Globaloria]() game-design program for the [Southwest Key's]() East Austin College Prep Academy in 2009 and 2010
- Funded the [Alliance for Young Artists & Writers]() new video game design category for the 2010 and 2011 Scholastic Art & Writing Awards
- Funded [Schmahl Science Workshop's]() program to develop a sustainable fishing video game to communicate the danger of over fishing to long-term human survival
- Co-sponsored the 2008, 2009, 2010 and 2011 [Games for Change Festival]()

About the AMD Foundation
The AMD Foundation connects and empowers individuals with knowledge, thereby opening doors to opportunity. The Foundation's signature program, AMD Changing the Game, supports initiatives designed to help youth harness the power of digital games with social

content, while learning critical Science, Technology, Engineering and Math (STEM) skills and life skills. The Foundation also funds the AMD Employee Giving Program which supports AMD employees' community interests by matching their personal donations of time and money to local organizations and schools.
