# AMD Acquires Software Company HiAlgo, Laying Groundwork for Future Gaming Innovation in Radeon Software

## HiAlgo Acquisition Brings New Capabilities to Radeon Software to Maximize Gaming Experience per Dollar for PC Users

SUNNYVALE, CA -- (Marketwired) -- 06/29/16 -- [AMD](#) (NASDAQ: AMD) today announced the acquisition of software company HiAlgo Inc., a developer of unique PC gaming technologies designed to help Radeon™ RX Series GPUs transform gaming experience, increase GPU efficiency and improve the overall consistency of gaming experiences. The acquisition lays the groundwork for future gaming innovation in Radeon Software that will benefit owners of Radeon™ RX Series GPUs.

"Software is an integral part of advancing the science of graphics, enabling us to best harness the silicon of the GPU to maximize performance and deliver outstanding experiences in games and applications," said Raja Koduri, senior vice president and chief architect, Radeon Technologies Group, AMD. "HiAlgo embodies our spirit of passion, persistence and play by delivering a number of creative approaches to software that improve gamers' experiences, and helps future-proof<sup>1</sup> the GPU."

Radeon Software enables the ultimate in performance, features and stability of Radeon™ graphics to ensure an exceptional user experience. Today, launching alongside the Radeon™ RX 480 graphics card are nine new features of Radeon Software Crimson Edition designed to give users more control over their computing experience, including multi-GPU, display, and power efficiency settings, and a redefined overclocking tool in Radeon WattMan<sup>2</sup>.

### **About AMD**

For more than 45 years AMD has driven innovation in high-performance computing, graphics, and visualization technologies -- the building blocks for gaming, immersive platforms, and the datacenter. Hundreds of millions of consumers, leading Fortune 500 businesses, and cutting-edge scientific research facilities around the world rely on AMD technology daily to improve how they live, work, and play. AMD employees around the world are focused on building great products that push the boundaries of what is possible. For

### **Cautionary Statement**

This press release contains forward-looking statements concerning Advanced Micro Devices, Inc. ("AMD") which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are commonly identified by words such as "would," "may," "expects," "believes," "plans," "intends," "projects" and other terms with similar meaning. Investors are cautioned that the forward-looking statements in this press release are based on current beliefs, assumptions and expectations, speak only as of the date of this document and involve risks and uncertainties that could cause actual results to differ materially from current expectations. Material factors that could cause actual results to differ materially from current expectations include, without limitation, the following: the possibility that Intel Corporation's dominance of the microprocessor market and its aggressive business practices may limit AMD's ability to compete effectively; AMD relies on GLOBALFOUNDRIES Inc. (GF) to manufacture all of its microprocessor and APU products and a certain portion of its GPU products, with limited exceptions. If GF is not able to satisfy AMD's manufacturing requirements, its business could be adversely impacted; AMD relies on third parties to manufacture its products, and if they are unable to do so on a timely basis in sufficient quantities and using competitive technologies, AMD's business could be materially adversely affected; failure to achieve expected manufacturing yields for AMD's products could negatively impact its financial results; the success of AMD's business is dependent upon its ability to introduce products on a timely basis with features and performance levels that provide value to its customers while supporting and coinciding with significant industry transitions; if AMD cannot generate sufficient revenue and operating cash flow or obtain external financing, it may face a cash shortfall and be unable to make all of its planned investments in research and development or other strategic investments; the loss of a significant customer may have a material adverse effect on AMD; global economic uncertainty may adversely impact AMD's business and operating results; AMD may not be able to generate sufficient cash to service its debt obligations or meet its working capital requirements; AMD has a substantial amount of indebtedness which could adversely affect its financial position and prevent it from implementing its strategy or fulfilling its contractual obligations; the agreements governing AMD's notes and the secured revolving line of credit (Secured Revolving Line of Credit) impose restrictions on AMD that may adversely affect its ability to operate its business; the completion and impact of its restructuring plan announced in October 2015, its transformation initiatives and any future restructuring actions could adversely affect it; the markets in which AMD's products are sold are highly competitive; uncertainties involving the ordering and shipment of AMD's products could materially adversely affect it; AMD's receipt of revenue from its semi-custom SoC products is dependent upon its technology being designed into third-party products and the success of those products; the demand for AMD's products depends in part on the market conditions in the industries into which they are sold. Fluctuations in demand for AMD's products or a market decline in any of these industries could have a material adverse effect on its results of operations; AMD's ability to design and introduce new products in a timely manner is dependent upon third-party intellectual property; AMD depends on third-party companies for the design, manufacture and supply of motherboards, software and other computer platform components to support its business; if AMD loses Microsoft Corporation's support for its products or other software vendors do not design and develop software to run on AMD's products, its ability to sell its products could be materially adversely affected; and AMD's reliance on third-party distributors and AIB partners subjects it to certain risks. Investors are urged to review in detail the risks and uncertainties

in AMD's Securities and Exchange Commission filings, including but not limited to AMD's Quarterly Report on Form 10-Q for the quarter ended March 26, 2016.

<sup>1</sup> Statement of "future-proof" refers to support of current and upcoming technology standards including 14nm FinFET process technology, DirectX®12 and Vulkan™ API support, new display technology, and experiences such as VR. "Future-proof" statement is not meant to serve as a warranty or indicate that users will never have to upgrade their graphics technology again. Support of current and upcoming technology standards described above has the potential to reduce frequency of graphics upgrades for some users. RX-5

<sup>2</sup> ***Formerly AMD OverDrive. AMD graphics processors are intended to be operated only within their associated specifications and factory settings. Operating your AMD graphics processor outside of specification or in excess of factory settings, including but not limited to overclocking, may damage your graphics processor and/or lead to other problems, including but not limited to, damage to your system components (including your motherboard and components thereon (e.g. memory)), system instabilities (e.g. data loss and corrupted images), shortened graphics processor, system component and/or system life and in extreme cases, total system failure. AMD does not provide support or service for issues or damages related to use of an AMD graphics processor outside of graphics processor specifications or in excess of factory settings. You may also not receive support or service from your system manufacturer. DAMAGES CAUSED BY USE OF YOUR AMD OR AMD GRAPHICS PROCESSOR OUTSIDE OF SPECIFICATION OR IN EXCESS OF FACTORY SETTINGS ARE NOT COVERED UNDER YOUR AMD PRODUCT WARRANTY AND MAY NOT BE COVERED BY YOUR SYSTEM MANUFACTURER'S WARRANTY.***
