## Forward-Looking Statements

This presentation includes “forward-looking statements” within the meaning of the “safe harbor” provisions of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by the use of words such as “estimate,” “plan,” “project,” “forecast,” “intend,” “will,” “expect,” “anticipate,” “believe,” “seek,” “target” or other similar expressions that predict or indicate future events or trends or that are not statements of historical matters. These forward-looking statements include, but are not limited to, those related to the Company’s ability to scale and grow its business, source clean and renewable energy, the advantages and expected growth of the Company, future estimates of revenue, net income, adjusted EBITDA, liquidity and cash flow, and availability of capital, future estimates of computing capacity and operating power, future demand for hosting capacity, future estimate of hashrate (including mix of self-mining and hosting), operating gigawatts and power, future projects in construction or negotiation and future expectations of operation location, orders for miners and critical infrastructure, future estimates of self-mining capacity, the public float of the Company’s shares, future infrastructure additions and their operational capacity, and operating power and site features of the Company’s operations center in Denton, Texas. These statements are provided for illustrative purposes only and are based on various assumptions and on the current expectations of the Company’s management. These forward-looking statements are not intended to serve, and must not be relied on by any investor, as a guarantee, an assurance, a prediction or a definitive statement of fact or probability. Actual events and circumstances are difficult or impossible to predict and will differ from assumptions. Many actual events and circumstances are beyond the control of the Company. These forward-looking statements are subject to a number of risks and uncertainties, including those identified in the Company’s reports filed with the U.S. Securities and Exchange Commission (“SEC”) from time to time, including the Company’s definitive proxy statement filed with the SEC on January 3, 2022, and other subsequent filings the Company files with the SEC from time to time, including its Annual Report on Form 10-K for the year ended December 31, 2021, and Current Report on Form 8-K filed on January 24, 2022, and Quarterly Report on Form 10-Q for the second quarter ended June 30, 2022, to be filed with the SEC by August 15, 2022. If any of these risks materialize or our assumptions prove incorrect, actual results could differ materially from the results implied by these forward-looking statements. Accordingly, undue reliance should not be placed upon the forward-looking statements. Except as required by law, the Company assumes no obligation to update these forward-looking statements publicly, or to update the reasons actual results could differ materially from those anticipated in the forward-looking statements, even if new information becomes available in the future.

Year over year comparisons are based on the combined results of Core Scientific and its acquired entities.

## Non-GAAP Financial Measures

This presentation also contains non-GAAP financial measures as defined by the SEC rules, including Adjusted EBITDA and adjusted earnings (loss) per diluted share. The Company believes that these non-GAAP measures of financial results provide useful information to management and investors regarding certain financial and business trends relating to the Company’s financial condition and results of operations. The Company’s management uses certain of these non-GAAP measures to compare the Company’s performance to that of prior periods for trend analyses and for budgeting and planning purposes. The Company urges investors not to rely on any single financial measure to evaluate its business.
