### ***Note about Non-GAAP Financial Measures***

In addition to the unaudited results presented in accordance with generally accepted accounting principles, or GAAP, in this press release, Energous presents adjusted EBITDA, which is a non-GAAP financial measure. Adjusted EBITDA is determined by taking net loss and eliminating the impacts of interest, taxes, depreciation, amortization, and stock-based compensation. The company's definition of adjusted EBITDA may not be comparable to the definitions of similarly-titled measures used by other companies. Energous believes that this non-GAAP financial measure, viewed in addition to and not in lieu of its reported GAAP results, provides useful information to investors by providing a more focused measure of operating results. This metric is used as part of the company's internal reporting to evaluate its operations and the performance of senior management. A table reconciling this measure to the comparable GAAP measure is available in the accompanying financial tables below.
