Antero Midstream Fourth Quarter Financial Results

Low pressure gathering volumes for the fourth quarter of 2018 averaged 2,602 MMcf/d, a 52% increase as compared to the fourth quarter of 2017 and a 20% increase sequentially. Compression volumes for the fourth quarter of 2018 averaged 2,215 MMcf/d, a 63% increase as compared to the fourth quarter of 2017 and 26% increase sequentially. Compression capacity was 93% utilized during the fourth quarter of 2018. High pressure gathering volumes for the fourth quarter of 2018 averaged 2,569 MMcf/d, a 39% increase from the fourth quarter of 2017 and 18% increase sequentially. The increase in gathering and compression volume was driven by Antero Midstream connecting 73 wells and 38 wells to the gathering system in the third and fourth quarter of 2018, respectively. Low pressure gathering, compression, and high pressure gathering volumes for the fourth quarter of 2018 all were Antero Midstream records. Fresh water delivery volumes averaged 136 MBbl/d during the quarter, a 9% decrease as compared to the fourth quarter of 2017 due to fewer completions during the quarter as anticipated.

Gross processing volumes from our processing and fractionation joint venture with MarkWest (a wholly-owned subsidiary of MPLX) (the "Joint Venture"), averaged 796 MMcf/d, for the fourth quarter of 2018, an increase of 87% compared to the fourth quarter of 2017 and 31% increase sequentially. For the three months ended December 31, 2018, the Partnership reported revenues of \$282 million, comprised of \$161 million from the Gathering and Processing segment and \$121 million from the Water Handling and Treatment segment. Revenues increased 34% compared to the prior year quarter, driven by growth in throughput volumes. Water Handling and Treatment segment revenues include \$70 million from wastewater handling and high rate water transfer services provided to Antero Resources, which are billed at cost plus 3%.

Direct operating expenses for the Gathering and Processing, and Water Handling and Treatment segments were \$13 million and \$79 million, respectively, for a total of \$92 million compared to \$70 million in direct operating expenses in the prior year quarter. The increase in operating expenses was driven primarily by an increase in throughput volumes. Water Handling and Treatment direct operating expenses include \$67 million from wastewater handling and high rate water transfer services. General and administrative expenses including equity-based compensation were \$17 million, a \$2 million increase compared to the fourth quarter of 2017. General and administrative expenses excluding equity-based compensation were \$12 million during the fourth quarter of 2018, a \$4 million increase as compared to the fourth quarter of 2017. The increase in general and administrative expenses was driven primarily by financial and legal fees incurred during the fourth quarter of 2018 related to the midstream simplification transaction. Total operating expenses were \$27 million, including \$23 million of depreciation, \$106 million decrease from the change in fair value of contingent acquisition consideration related to the second earn-out payment, and \$1 million of accretion of contingent acquisition consideration. Depreciation decreased by \$8 million as compared to the fourth quarter of 2017 driven by a change in the estimated useful lives of the gathering systems and facilities. The change in fair value of contingent acquisition consideration is related to the second freshwater earn-out payment not anticipated to be achieved based on Antero Resource's current development plan.

Net income for the fourth quarter of 2018 was \$249 million. The increase in net income was driven by an increase in natural gas gathering and compression volumes and a \$105 million non-cash change in fair value of the contingent acquisition consideration related to the water drop-down transaction. Net income was \$1.09 per diluted limited partner unit. Adjusted net

income excluding the impact from the non-cash change in fair value of the contingent acquisition consideration was \$143 million, a 63% increase compared to the prior year quarter. Adjusted EBITDA was \$194 million, a 36% increase compared to the prior year quarter. The increase in Adjusted EBITDA was primarily driven by increased natural gas throughput volumes and contribution from the Joint Venture. Adjusted EBITDA for the quarter included \$17 million in distributions from Stonewall Gathering LLC and the processing and fractionation Joint Venture. Cash interest paid was \$9 million. Cash reserved for bond interest during the quarter increased \$9 million and income tax withholding upon vesting of Antero Midstream equity-based compensation awards was \$1 million. Maintenance capital expenditures during the quarter totaled \$8 million and Distributable Cash Flow was \$167 million, resulting in a DCF coverage ratio of 1.3x.

Non-GAAP Financial Measures and Definitions

Antero Midstream views Adjusted EBITDA as an important indicator of the Partnership's performance. Antero Midstream defines Adjusted EBITDA as Net Income before interest expense, gain on sale of assets, depreciation expense, impairment expense, accretion and change in fair value of contingent acquisition consideration, accretion of asset retirement obligations, equity-based compensation expense, excluding equity in earnings of unconsolidated affiliates and including cash distributions from unconsolidated affiliates.

Antero Midstream uses Adjusted EBITDA to assess:

- the financial performance of the Partnership's assets, without regard to financing methods in the case of Adjusted EBITDA, capital structure or historical cost basis;
- its operating performance and return on capital as compared to other publicly traded partnerships in the midstream energy sector, without regard to financing or capital structure; and
- the viability of acquisitions and other capital expenditure projects.

The Partnership defines Distributable Cash Flow as Adjusted EBITDA less interest paid, income tax withholding payments and cash reserved for payments of income tax withholding upon vesting of equity-based compensation awards, cash reserved for bond interest and ongoing maintenance capital expenditures paid. Antero Midstream uses Distributable Cash Flow as a performance metric to compare the cash generating performance of the Partnership from period to period and to compare the cash generating performance for specific periods to the cash distributions (if any) that are expected to be paid to unitholders. Distributable Cash Flow does not reflect changes in working capital balances.

Adjusted EBITDA and Distributable Cash Flow are non-GAAP financial measures. The GAAP measure most directly comparable to Adjusted EBITDA and Distributable Cash Flow is Net Income. The non-GAAP financial measures of Adjusted EBITDA and Distributable Cash Flow should not be considered as alternatives to the GAAP measure of Net Income. Adjusted EBITDA and Distributable Cash Flow are not presentations made in accordance with GAAP and have important limitations as an analytical tool because they include some, but not all, items that affect Net Income and Adjusted EBITDA. You should not consider Adjusted EBITDA and Distributable Cash Flow in isolation or as a substitute for analyses of results as reported under GAAP. Antero Midstream's definition of Adjusted EBITDA and Distributable Cash Flow may not be comparable to similarly titled measures of other

partnerships.

The Partnership defines adjusted net income as net income plus impairment expense and change in fair value of contingent acquisition consideration. The Partnership believes that adjusted net income is useful to investors in evaluating operational trends of the Partnership and its performance relative to other partnerships. Adjusted net income is not a measure of financial performance under GAAP and should not be considered in isolation or as a substitute for net income as an indicator of financial performance.

The Partnership defines net debt as total debt less cash and cash equivalents. Antero Midstream views net debt as an important indicator in evaluating the Partnership's financial leverage.

The following table reconciles consolidated total debt to net debt as used in this release (in thousands):

	December 31,
	2018
Bank credit facility	\$ 990,000
