Dynatrace Named a Leader in AIOps with the Highest Scores in Both the Current Offering and Strategy Categories in Report by a Leading Independent Research Firm

New report describes the company's superior vision leveraging its Software Intelligence Platform's unified data model, AI, and automation to deliver full-stack business insight

WALTHAM, Mass.--(BUSINESS WIRE)-- Software intelligence company [Dynatrace](#) (NYSE: DT) announced today that Forrester has named it a Leader in *The Forrester Wave™: Artificial Intelligence for IT Operations (AIOps), Q4 2022 report*. Forrester evaluated 11 providers and gave Dynatrace the top scores in both the Current Offering and Strategy categories, which define each provider's placement within the Wave. A complimentary copy of the report is available [here](#).

The report states, "The complexity of IT systems and the ongoing exponential growth of telemetry data are driving the need to improve business insights with AI/ML... Flexibility to deploy in dynamic environments, as well as to monitor diverse technology stacks in real time, is essential for AIOps implementations to deliver value."

According to Forrester's evaluation of Dynatrace, "It provides an enterprise-scale unified platform with a context-rich data model to address the demands of its global client base. Its superior vision focuses on purpose-built use cases that leverage its unified model, AI, and automation... Dynatrace is a good fit for clients that have advanced business insight needs and complex hybrid environments and want to consolidate their technology efforts around a full-stack AIOps offering that can grow with them."

Steve Tack, SVP of Product Management at Dynatrace, said, "It is rewarding to receive recognition from leading analyst firms like Forrester. Organizations are building digital services in highly dynamic multicloud environments, producing an explosion of data and complexity. To drive digital transformation at scale, teams need precise answers and intelligent automation across their technology stacks. They also need transparent and trustworthy AI that powers automated operations. These capabilities are exactly what Dynatrace AIOps delivers."
