Stratasys Teams Up with Express Dental to Donate 3D-printed Dentures in Support of the Oklahoma Dental Association's Mission of Mercy

More than 55 patients in need were scanned and received TrueDent™ dentures within 24 hours

EDEN PRAIRIE, Minn. & REHOVOT, Israel--(BUSINESS WIRE)-- [Stratasys Ltd.](https://www.stratasys.com) (Nasdaq: SSYS), a leader in polymer 3D printing solutions, announced today that it had partnered with Express Dental Labs of Norman, Oklahoma at the recent Oklahoma Dental Association Mission of Mercy (OkMOM) event to provide full and partial dentures to more than 55 people in need.

The OkMOM is a two-day event that provides free essential dental care to individuals who may otherwise lack access to such services. The event took place in Lawton Oklahoma and brought together dental professionals, volunteers, and organizations to address the oral health needs of underserved populations.

Each patient that received dentures had an inter-oral scan completed the first day, which Express Dental Labs used to create the dentures with the Stratasys' J5 DentaJet® 3D Printer and TrueDent resin. The dentures were printed overnight and delivered by participating dentists the following day, giving patients a new smile with well fitting, natural looking dentures, within 24 hours.

“It is awesome that we can do this for the community,” said Tra’ Chambers, Owner, Express Dental Labs. “Traditionally, dentures are labor intensive to manufacture, but when using Stratasys technology, we can serve many more patients in a shorter amount of time. The dentures we print are highly accurate, matching the patient’s gum and tooth color, so the dentures look great and fit well. Also, because the entire denture is printed as one piece and does not require any manual intervention, once the digital design is created, if the patient loses their dentures, a replacement can be created overnight with the digital record we have on file.”

This is the second year Express Dental Labs has used the Stratasys TrueDent solution. Last year, nearly 40 Oklahomans in need received new dentures as part of the OkMOM event.

“It is truly gratifying to witness the positive impact that our technology, and the expertise of Express Dental Labs, has on the lives of those in need, restoring their confidence and enhancing quality of life with better looking and fitting dentures,” said Ronen Lebi, Vice President, Dental, Stratasys. “We anticipate continued growth in the adoption of technologies like TrueDent. It increases efficiency and reduces turnaround time for labs, while lowering the number of visits and overall chair time for patients.”

TrueDent dentures are a full-color, single continuous print of both denture base and teeth. Stratasys technology enables multi-colored, personalized appliances to be printed simultaneously on a single high-capacity tray.

About Stratasys

Stratasys is leading the global shift to additive manufacturing with innovative 3D printing solutions for industries such as aerospace, automotive, consumer products and healthcare. Through smart and connected 3D printers, polymer materials, a software ecosystem, and parts on demand, Stratasys solutions deliver competitive advantages at every stage in the product value chain. The world’s leading organizations turn to Stratasys to transform product design, bring agility to manufacturing and supply chains, and improve patient care.
