Vuzix Provides Business Update and Reports Third Quarter 2015 Operating Results

ROCHESTER, N.Y., Nov. 12, 2015 /PRNewswire/ -- Vuzix® Corporation (NASDAQ: VUZI), a leading supplier of Video Eyewear and Smart Glasses products in the consumer, enterprise, and entertainment markets, today provided an update on its business initiatives and reported its third quarter financial results for the period ended September 30, 2015.

Recent Corporate Highlights:

Vuzix CEO and President Paul J. Travers said, "We are seeing momentum in orders of our wearable products, as more and more customers convert successful pilot programs to commercial orders. Total quarterly revenues for the 3 months ended September 30, 2015 were up over 125% from our second quarter ending June 30, 2015, and up 46% over the same period ending September 30, 2014. We are pleased that sales of M100 Smart Glasses advanced 38% in the third quarter compared to the prior year, as customer volume roll-outs accelerate. As our customers' programs mature and with our new products on the horizon we are very excited about the outlook for the Company."

Mr. Travers continued, "The order flow from enterprise has also improved the make-up of our sales mix over the course of 2015 as we continue to successfully transition to all new product and technology offerings. We are also well prepared for what we anticipate will be a significant uptick in orders moving to 2016. The Company's newly opened Rochester facility will have the capacity to produce millions of waveguides annually and will be a highly advanced R&D center for new product and development."

Some of the highlights during our third quarter include:

- Enabled Ubimax xPick and xAssist applications for enterprise on Vuzix M100 Smart Glasses
- Added ONtheGO Platforms' Gesture Tech, Ari™ to M100 Smart Glasses
- Presented iWear video headphones at Tokyo Games Show 2015
- Hired Brad Craig to head new developer relations program
- Incorporated M100 Smart Glasses into a new NTT DATA remote field service system, which NTT DATA officially launched on August 31, 2015
- Partnered with SOTI to provide enhanced Enterprise Mobility Management (EMM) on M100 Smart Glasses subsequent to the quarter
- Partners like XOEye and others started volume production roll-outs to their key accounts.

The forward outlook is promising with the ongoing launches of the iWear Video Headphones and enhancements to the M100 Smart Glasses in Q4. Through the remainder of the year, the Company will be focused on finishing development of its new waveguide products which will be publicly demonstrated in early 2016 at CES.

The following table compares the Company's condensed statement of operations data for the three months and nine months ended September 30, 2015 and 2014.

Operational Financial Commentary for the Three Months ending September 30, 2015:

- Vuzix reported \$970,379 in revenues for the three months ended September 30, 2015 compared to \$664,586 for the same period in 2014. The increase in product sales was primarily the result of increased M100 Smart Glass and waveguide display engine shipments to a related party. Due to the phase out in Spring 2015 of the Company's Wrap 1200 products, sales of Video Eyewear, AR, and VR products decreased by 71% over the comparative period in 2014 and represented just 5% of revenues for the 2015 period. This reduction was offset by higher sales of M100 Smart Glasses, which increased by 38% in third quarter due to customer volume roll-outs. Waveguide display engine shipments were 24% of revenues for the 2015 period versus nil in comparative 2014 period.
- Gross Margins increased to 34% compared to 31% for the 2014 period, primarily reflecting product mix changes with increased gross margins. The improvement occurred despite increased expenses related to the amortization of software development costs of \$71,612 in 2015 versus nil in the comparative period, and a \$43,750 increase in minimum software royalties related to a new software bundle on the M100 Smart Glasses in the 2015 period.
- Overall research and development costs for the 2015 period were \$944,426, an increase of 95% over the 2014 period. The increased expenses in 2015 were primarily the result of new hires, no current period capitalization of software development costs as compared to the 2014 period when \$64,231 salaries were capitalized, and increase in new product development costs of \$88,717 and a \$39,680 increase in travel costs primarily related to the commencement of new third party product manufacturing services in Asia.
- General and Administrative expense increased by \$528,068, primarily driven by higher investor relations costs totaling \$189,471 inclusive of \$173,195 of non-cash expense for shares of common stock awarded to consultants; \$228,234 increase in stock awards and fees paid to our external board members; a \$52,378 increase in salary and benefit costs; \$13,750 increase in stock exchange listing fees; \$25,676 increase in travel costs; and \$19,057 increase in insurance costs.
- Other expenses for the 2015 period were \$127,968 compared to \$2,032,470 in 2014. The decrease was primarily attributable to two items. The Company recorded income of \$58,239 on the derivative liability valuation mark-to-market revaluation for the 2015 third quarter versus a loss of \$1,698,940 in 2014, an improvement of \$1,757,179. The income was driven by a reduction in our stock price during the mark-to-market revaluation period in the third quarter of 2015 versus an increase in stock price in the same prior 2014 along with the fact the Company had significantly more warrants outstanding in 2014 which impacted the derivative liability calculations. Secondly, we incurred \$116,008 in expenses for the amortization term debt discounts in 2015 as compared to \$253,977 in 2014, a period prior to when a larger amount of the June 2014 Notes were issued and outstanding.
- The Company reported a net loss attributable to common stockholders of (\$2,811,348)

after Series A Preferred Accrued Dividends for the three months ended September 30, 2015 versus (\$3,301,321) for the same period in 2014, when no preferred shares were outstanding.

Balance Sheet and Capital Resources Improvements

As of September 30, 2015, we had cash and cash equivalents totaling \$16,072,222. We had a positive working capital position of \$18,856,052 on September 30, 2015 versus a negative working capital position of \$1,427,139 as of December 31, 2014. The Company has paid down its accounts payable and is now investing in inventory and components for the recent launch of its iWear Video Headphones. During the third quarter of 2015 inventories and vendor component purchase deposits increased by \$1,109,572 from June 30, 2015 to a total of \$3,040,182 as of September 30, 2015. A further similar increase is expected in the fourth quarter to meet supply chain requirements as the new products will commence volume production for sale.

The following table summarizes key balance sheet areas as of September 30, 2015 as compared to December 31, 2014.
