Vuzix Introduces one of the World's Tiniest and Most Advanced MicroLED Display-Based Projection Engine at SID 2021, Inclusive of a New Technology Video Overview

ROCHESTER, N.Y., May 18, 2021 /PRNewswire/ -- [Vuzix® Corporation](#) (NASDAQ: [VUZI](#)), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, today announced at the SID/DSCC Business Conference its tiniest, lowest power, most advanced microLED display-based projection engine to be made commercially available throughout the world, along with a new video showcasing it, which can be viewed [here](#). These micro display engines, for which Vuzix partner Jade Bird Display will be supplying the microLEDs panels inside the projection engine, are built to be useful for a number of use cases including view finders, HUDs, athletic eyewear, helmets, language translation pens, pico-projectors, and of course utilized in the most advanced fashionable and ergonomic AR smart glasses currently in development by Vuzix.

These microLED display-based projection engines, which consist of a microLED panel, projection optics and engine assembly, are designed for pairing with a see-through waveguide and the overall engine measures as small as the cubic size of a pencil eraser. "Vuzix waveguides and the miniature size of these new display engines should allow our next generation AR Smart Glasses to have the fashion forward look and feel of normal eyeglasses," said Paul Travers, President and CEO of Vuzix. "And, as good as they will be for our next generation smart glasses, their size, brightness and low power consumption make them an incredibly attractive solution for so many other product form factors currently

being contemplated by various product manufacturers."

To learn more, register for the SID/DSCC Business Conference, where Vuzix CEO and President Paul Travers will share his insights on the Company's current smart glasses offerings and next generation technologies for AR/Smart Glasses with registered conference attendees during a panel session titled "Augmented and Virtual Reality (AR/VR)."
