## Vuzix Smart Glasses Selected to Support NSION's Seamless Situational Awareness Solution for DOD and First Responders

ROCHESTER, N.Y., Oct. 6, 2022 /PRNewswire/ -- [Vuzix® Corporation](#) (NASDAQ: VUZI), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, is pleased to announce that NSION, an innovator in the situational awareness, secure media, and data management market, has made Vuzix an approved technology partner for its NSC3™ seamless situational awareness solution primarily designed for the DoD, security customers and first responders, but also usable by new markets for NSION including enterprise and healthcare.

NSION's NSC3™ System improves the efficiency of mission-critical operations by streaming and storing live video from drones, phones, cars and other sources to command-and-control rooms as well as mobile devices in the field. Even in complex, life-critical situations, NSC3™ enables intelligent data algorithms to search threats and abnormalities from video or data feeds. The NSION NSC3™ platform pulls in real-time media streams, including data and HD video, from any number of sources to be shared between team members and displayed on Vuzix smart glasses for heads-up and hands-free situational awareness. Vuzix and NSION are currently conducting joint demonstrations of this solution.

"NSION is excited about the relationship with Vuzix as their smart glasses technology combined with the NSION video broadcasting and management platform can address many

applications, serving multiple vertical markets and in certain applications possibly help save lives," said Brett Johnson, North America Channels Director of NSION.

"Our smart glasses continue to be integrated into high performance next-generation systems such as this robust solution from NSION," said Paul Travers, President and CEO of Vuzix.

"We are excited to work with them to help support a broad adoption of their NSC3™ platform by an expansive list of customers and agencies."

## **About NSION**

NSION (<https://www.nsiointec.com/>) provides situational awareness and secure communications channels with live data transmission through encrypted management platforms while using their own equipment. NSION is an innovator in the situational awareness, secure media, and data management market. Our technology NSC3™ System improves the efficiency of mission-critical operations by streaming and storing live video from drones, phones, cars and other sources to command-and-control room to mobile devices on the field. NSC3™ technology supports any camera, any platform and is functional in any network. All of them improve radically the situational awareness needs by optimizing data security and speed in video data transfer. Even in complex, life-critical situations. NSC3™ enables intelligent data algorithms to search threats and abnormalities from video or data feeds. Founded in 2017, NSION has a strong heritage underpinned by over 20 years of work in close collaboration with a network of leading researchers, developers, manufacturers, and vendors. NSION incorporated in the United States in 2019 and its US headquarters is in Syracuse, New York.
