Another High Line Jewelry Store Chooses C-Bond Technology with \$28,000 Order to Protect its Inventory Against Break Ins and Looting

C-Bond Secure and C-Bond BRS are technologies of choice for strengthening glass to delay forced entry, provide ballistic-resistant protection, and enhance safety

HOUSTON, March 23, 2021 (GLOBE NEWSWIRE) -- [C-Bond Systems](#) (the "Company" or "C-Bond") (OTC: CBNT), a nanotechnology solutions company, announced today that another high line jewelry store has chosen C-Bond technologies – C-Bond Secure and C-Bond BRS – to protect its inventory against break-ins and looting. The installation totaled more than \$28,000.

[C-Bond Secure](#) is a multi-purpose glass strengthening primer and window film mounting solution that provides a cost-effective option for enhancing safety. It was developed in partnership with one of the industry's largest film suppliers to increase glass strength and glass flexibility. C-Bond Secure is applied to the glass prior to the application of window film to approve film adhesion and reinforce the underlying glass. It is compatible with any film manufacturers' products in all film market segments including solar, safety, decorative, automotive, and marine. C-Bond Secure has thwarted several break-in attempts and is proven to deter forced entry.

[C-Bond BRS](#) is a ballistic-resistant film system that consists of the patented C-Bond glass strengthening technology and security film. The C-Bond technology chemically bonds to the defects randomly distributed on the glass surface to increase impact resistance and prevent breakage. C-Bond BRS is validated by an independent third-party laboratory to provide National Institute of Justice (NIJ) Level I, Level IIA, Level II, and Underwriters Laboratories (UL) 752 ballistic-resistant protection.

"More and more high-end jewelers and other retailers are choosing C-Bond Secure and C-Bond BRS to provide an additional layer of security for their stores," said Scott R. Silverman, Chairman and CEO of C-Bond. "C-Bond is the technology of choice for strengthening glass to prevent it from shattering, thereby making it more difficult for intruders to break in. This extra time means intruders are more likely to give up on their illegal attempt at forced entry. C-Bond Secure and C-Bond BRS provide a cost-effective way to protect storefronts, schools, government buildings, and other facilities."

C-Bond's glass strengthening protection solutions including C-Bond Secure and its ballistic-

resistant system, C-Bond BRS, have been installed in more than 80 schools, government buildings, media sites, and other high-security facilities around the country. C-Bond's technology is protected by 22 patents and patent pending applications.

About C-Bond

C-Bond Systems, Inc. (OTC: CBNT) is a Houston-based advanced nanotechnology company and marketer of the patented and patent-pending C-Bond technology, developed in conjunction with Rice University and independently proven to significantly strengthen glass in key automotive and structural applications. The Company's Transportation Solutions Group sells C-Bond nanoShield, a liquid solution applied directly to automotive windshields, sold through distributors. The Company's Safety Solutions Group sells ballistic-resistant glass solutions directly to private enterprises, schools, hospitals, and government agencies. The Company also sells disinfection products, including MB-10 Tablets. Forward-Looking Statements

Statements in this press release about our future expectations constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and as that term is defined in the Private Litigation Reform Act of 1995. Such forward-looking statements involve risks and uncertainties and are subject to change at any time, and our actual results could differ materially from expected results. These risks and uncertainties include, without limitation, C-Bond's ability to raise capital; the Company's ability to successfully commercialize its products; the effect of the COVID-19 global pandemic on the Company's and its customers' ability to operate; the Company's ability to source materials; the Company's ability to retain key employees and consultants; as well as other risks. Additional information about these and other factors may be described in the Company's filings with the Securities and Exchange Commission ("SEC") including its Form 10-K filed on March 25, 2020, its Forms 10-Q filed on November 16, 2020, August 14, 2020, and May 15, 2020, and in future filings with the SEC. The Company undertakes no obligation to update or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this statement or to reflect the occurrence of unanticipated events, except as required by law.
