

# CAPTISOL<sup>®</sup>

A Ligand<sup>®</sup> TECHNOLOGY

## Do you have formulation solubility or stability challenges?

Captisol is here to save the day! Captisol is the original sulfobutyl ether beta cyclodextrin and is capable of enhancing the solubility of products up to 150,000-fold or extending product stability from lyophilized or frozen to refrigerated and room temperature.

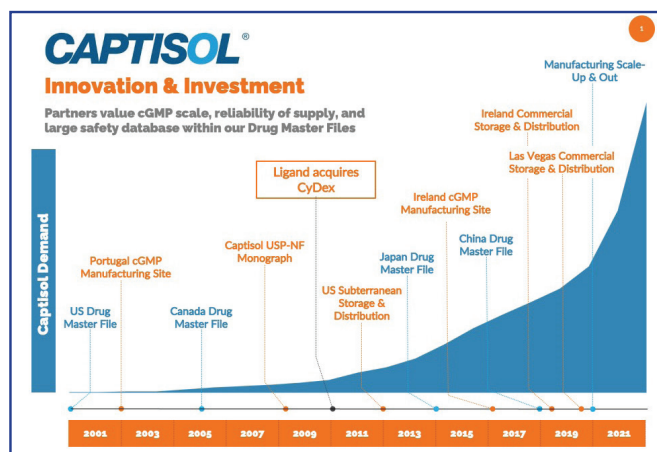

## Don't have the formulation capabilities?

The Captisol team can help! Each member of our formulation team has decades of experience in the pharmaceutical industry developing parenteral, oral, ophthalmic, nasal and inhalation formulations with Captisol and other cyclodextrins. Plus-the recent addition of internal resources and analytical

tools will provide greater responsiveness for collaborative feasibility and development programs.

## In need of a regulatory accepted, patented, large scale GMP supply?

Captisol is in more than a dozen FDA approved products with drug master files in the US, Canada, China, and Japan. Our patented, all-aqueous process produces batches up to 7,500 kg with an annual capacity of more than 500,000 kg. We've got you covered!

## In search of a team to help create your product or assist in your development, safety studies, regulatory or manufacturing?

The Captisol team has successfully completed or assisted with orphan designations and approvals, preclinical, CMC and clinical development for ANDA, 505b2 and traditional NDA programs. The team has seamlessly assisted numerous partners with their Captisol products.

## Collaboration and Partnering?

Academic or Industry, the Captisol team is available to discuss your application, evaluate and potentially participate in the research project or developing the concept.
