

## What sets us apart from other modified cyclodextrins?

## A team of experts dedicated to moving your product forward.

- Decades of experience in the pharmaceutical industry developing parenteral, oral, ophthalmic, nasal and inhalation formulations with Captisol and other cyclodextrins
- Recent addition of internal resources and analytical tools will provide greater responsiveness for collaborative feasibility and development programs
- The team can help create your product or assist in your development, safety studies, regulatory or manufacturing
- Our team has successfully completed or assisted with orphan designations and approvals, preclinical, CMC and clinical development for ANDA, 505b2 and traditional NDA programs
- Academic or Industry, the Captisol team is available to discuss your application, evaluate and potentially participate in your research project or developing the concept
