

# Insoluble

## For your solubility solutions, Captisol® erases any doubt

Captisol is a powerful modified beta cyclodextrin used in 16 FDA-approved products like VEKLURY® (remdesivir) and KYPROLIS® (carfilzomib) for solubilizing and stabilizing difficult formulations. Produced by CyDex Pharmaceuticals, a Ligand Company, it is the leading pharmaceutical-grade sulfobutylether beta-cyclodextrin (SBECD) with an outstanding safety record.

Used across multiple therapeutic routes—parenteral, oral, subcutaneous, ophthalmic, nasal, inhalation, and dermal—Captisol is made through a safe all-aqueous process.
