Najeeb Ghauri, NetSol Technologies chairman and chief executive officer, stated, "We are pleased to report our fiscal year 2010 expectations for a significant double-digit improvement

in annual revenue growth and most importantly a return to GAAP profitability as demand for our core NetSol Financial Suite(TM) (NFS) financial enterprise software business continues to improve. Renewed strength in our licensing sales reflects the ramping of new purchasing decisions among existing as well as new customers, with particular strength coming from the Asia Pacific region, especially China. Rising sales, combined with our streamlined operating structure, are creating excellent leverage which is reflected in our new projections for GAAP net income. With a return to profitability in sight, we believe NetSol is extremely well positioned to gain market share and unlock the value we see in our premier global software and IT business platform."

In line with the company's regular reporting practices, the fiscal second quarter 2010 reporting date as well as investor conference call and web cast details will be announced in advance via a public press release.
