Veritone and LeoSight to Provide Next-Generation of Real-Time, AI-Powered Public Safety

Partnership establishes a powerful, cost-efficient alternative to incumbent solutions, combining Veritone's leading AI capabilities with LeoSight's data visualization to advance real-time public safety operations.

IRVINE, Calif.--(BUSINESS WIRE)-- [Veritone, Inc.](#) (NASDAQ: VERI), a leader in building enterprise AI and data solutions, and [LeoSight](#), a pioneer in advanced data visualization for real-time public safety operations, today announced a strategic partnership to provide law enforcement agencies and public safety organizations with a next-generation, integrated product offering that is a cost-effective and open alternative to incumbent solutions. The joint solution combines software and hardware capabilities for advanced real-time and post-event data analysis.

This partnership is a seamless, bi-directional integration that will enable public safety agencies to support critical investigations and response operations by identifying time-sensitive insights that are often missed or difficult to uncover. Veritone's AI capabilities, including object detection, redaction, and others, will be woven into the LeoSight platform, while LeoSight's advanced data visualization and operational tools will be integrated into Veritone's platform. This two-way street is designed to enable customers to leverage the full power of this open ecosystem, reduce dependency on single-vendor ecosystems, and provide a best-of-breed solution that fits their exact needs.

“Our goal is to foster an open, interoperable system where innovation can thrive, and our partnership with LeoSight is a cornerstone of that strategy,” said Jon Gacek, GM of Veritone Public Sector. “For too long, customers have been locked into inflexible systems. By combining our AI with LeoSight’s exceptional visualization platform, we are providing a flexible, cost-competitive solution that enables fast, accurate decision-making for critical operations and gives agencies more choice.”

“LeoSight is built for multi-agency operations, where clarity and coordination matter as much as speed,” said Mark Wood, CEO of LeoSight. “With Veritone, we are creating a true open ecosystem that not only visualizes data but also allows agencies to operationalize it with cutting-edge AI. We believe this offers a far more flexible, powerful, and cost-effective solution than the alternatives currently available.”

Safe Harbor Statement

This news release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, statements regarding the anticipated capabilities and benefits of the Veritone-LeoSight partnership and integrated product offering; the expected integration of Veritone's AI capabilities into the LeoSight platform and LeoSight's visualization tools into Veritone's platform; the anticipated cost-effectiveness, openness, and competitive positioning of the joint solution relative to incumbent platforms; the expected benefits to law enforcement and public safety agencies; and Veritone's business strategy, partnerships, and growth opportunities in the public sector market.

Words such as "anticipates," "believes," "could," "estimates," "expects," "intends," "continue," "can," "may," "plans," "potential," "projects," "seeks," "should," "will," "would" or similar expressions and the negatives of those expressions may identify forward-looking statements. These statements are based on current expectations, estimates, assumptions, and projections and involve known and unknown risks and uncertainties that may cause actual results, performance, or achievements to differ materially from those expressed or implied in such statements. These risks and uncertainties include, but are not limited to, risks related to the successful integration of the companies' respective technologies; the ability to achieve the anticipated benefits of the partnership; market acceptance of the joint solution; competition from established providers in the public safety technology market; dependence on third-party relationships; regulatory developments affecting AI and data analytics in law enforcement; and those risks described in Veritone's filings with the Securities and Exchange Commission, including its most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. Although Veritone believes that the assumptions underlying the forward-looking statements are reasonable, any of the assumptions could prove inaccurate. In light of the significant uncertainties inherent in the forward-looking information included herein, the inclusion of such information should not be regarded as a representation by Veritone or any other person that their objectives or plans will be achieved. Veritone undertakes no obligation to update or revise the forward-looking

statements contained herein to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.
