Echoscope® Real-time 3D sonar purchased for salvage operations by T & T Marine

Coda Octopus Group, Inc. (OTC: CDOC.PK), recently completed the sale of an Echoscope® and F180series® system to international maritime salvage and marine emergency response company, T&T Marine Salvage Inc. of Galveston, Texas. The Echoscope®, augments T&T Marine's technology with real-time 3D sonar survey and imaging capability. This purchase follows a series of successful on-project system trials in Texas and Kentucky, where T&T Marine was appointed as the salvage contractor following the collision of the vessel 'Delta Mariner' with the Eggner Ferry Bridge.

Training was completed in May and the system is now being extensively used. Mr. Don Draper, Remote Operations Manager for T&T Marine commented: "The unique capability of the Echoscope® to visualize complex structures in real time 3D is the perfect technology for T&T Marine. The system has already established itself as one of our primary tools for rapid appraisal and assessment of the complex underwater environments associated with marine emergencies."

Don continued: "T&T Marine's trademark is technical expertise and rapid response, and the Echoscope compliments this – from rapid deployment to real time visualization, it helps us to make the right calls in critical situations in less time."

Blair Cunningham, our President of Technology, said, "We welcome T&T Marine Salvage Inc. to the ever expanding community of Echoscope® real-time 3D sonar users. We are very pleased that Echoscope® has been so instrumental in enabling T&T Marine to progress this high profile project, and that it has brought sufficient benefits to T&T Marine that they already regard it as one of their primary tools for rapid appraisal and assessment. We look forward to working with T&T Marine on many other projects over the coming years and developing new ways of working in marine salvage using our patented real-time 3D sonar."

About Coda Octopus Group, Inc.

Originally founded in 1994 as Coda Technologies, the Coda Octopus Group is now headquartered in Lakeland, Florida.

The Group consists of a Marine Products business located in Lakeland, Florida, Edinburgh, Scotland, Perth, Australia, and Bergen, Norway, and engineering businesses, Coda Octopus Colmek in Salt Lake City, Utah and Coda Octopus Martech in Weymouth, England. Each of the Group companies are technology innovators with a particularly high level of sonar expertise. The Group has facilities in Florida, Utah, the UK, Australia, and Norway.

Alongside providing bespoke engineering and development for defense applications one of

the Group's key products is the patented Coda Echoscope® - the first real time 3D sub-sea sonar which is used in oil and gas, underwater construction, search and rescue operations and port and harbor security and constructions. The top end software which runs on the Echoscope® (Underwater Survey Explorer) is also proprietary to Coda Octopus. The Echoscope® is also at the heart of the Underwater Inspection System which is being adopted for port and harbor security, and other applications globally. We have a number of products which are based on our real time 3D technology (Echoscope®, Underwater Inspection System and Dimension® (the latter being a forward looking real time sonar targeted at ROV applications)).

With this patented revolutionizing sub-sea visualization capability, and the existing systems integration skills within Coda Octopus Colmek, Inc. and Coda Octopus Martech Ltd., the Coda Octopus Group believes it can become a world leading integrated sonar technology supplier.
