"We believe that the fundamentals are firmly in place for our operating business segments to continue to grow. Although our products business is still affected by the contraction in oil and gas expenditures, we maintain and improve our position in alternative markets for our industry-leading real-time 3D sub-sea sonar technology. We are also expanding our product sets to include new offerings to our markets. In addition, our engineering service business is looking forward to another strong year of continued growth from both existing and new defense programs that it supports."
